

proMX 365 Absence Management AI Agent

proMX 365 Absence Management AI Agent helps organizations handle employee leave and availability with ease. It automates requests, approvals and holiday tracking, integrates with Dynamics 365, and keeps your projects on schedule – all through conversational AI within Microsoft Teams.

Natural-language leave management

Create, view or update absence requests by simply asking, "Create a new absence request" or "Show me all absences for next month."

Instant visibility

Quickly access approved, pending and draft requests in one place with real-time synchronization across your Dynamics 365 data.

Smart approvals

Review and approve requests directly through the agent without switching systems or manual follow-ups.

Automatic tracking & notifications

Automatic holiday tracking and timely reminders keep you informed about your remaining allowance and prompt you to submit pending requests.

About proMX

Founded in 2000, proMX has grown into a leading Microsoft Partner and trusted advisor for digital transformation. We help organizations modernize their business by implementing Dynamics 365 and related technologies, enhanced by our own proMX 365 Productivity Suite.
