TECHNICAL WRITING SERVICES FOR DEVELOPER PORTALS

HIGH QUALITY DOCUMENTATION TO:

- ✔ Simplify the onboarding process
- ✔ Reduce support queries
- ✔ Enhance user experience

A SUCCESS STORY

Helping a telecommunications company to get their **documentation to the next level**

GOALS

- To improve overall devportal **documentation quality**
- A structure that better serves their **developer community**
- **Eliminate inconsistent documentation** all across the portal
- Framework for a **solution with long-term maintainability**

SCOPE OF WORK

CONTENT AUDIT

We conducted a comprehensive content audit of the existing API documentation, scrutinizing grammar, structure, organization, and user interaction.

DETAILED REPORT

We delivered a content quality report with actionable insights and recommendations to elevate the user experience. The report highlighted areas of improvement, best practices, and strategic action points.

STYLE GUIDE CREATION

We developed a style guide designed to ensure long-term quality and consistency in their documentation.

RESULTS

- **Improvement in 9 Complete Documentation Sets:** We reviewed, evaluated, and enhanced nine full product documentation sets, providing marked-up documents with suggestions and improvements.
- **Foundation for Future Success:** The findings were utilized during an internal documentation hackathon, allowing the company to build upon our work and continuously improve their documentation.
- **Long-Term Impact:** Our approach was not just about providing a one-time solution but equipping the company with the tools and guidelines necessary for sustained success in their documentation efforts.

BENEFITS

- ✓ **Enhanced user experience**
- ✓ **Consistent documentation**
- ✓ **Long-term solution**
