We Provide Solutions, Not Just Software

### ► Microsoft Dynamics GP

Dynamics GP is a mature, robust, SMB accounting and ERP Suite. It helps growing organizations gain control over their financials, manage inventory and operations, and collect powerful business intelligence to make informed business decisions.

We build solutions that leverage Dynamics GP to improve accountability, efficiency and visibility.

### ► Microsoft Dynamics 365 for Sales

Make it easy for your sales team to turn relationships into revenue! How do you do this? By making it easy for your customers to do business with you!

Today's consumers are more informed and sophisticated than ever before. Dynamics 365 for Sales gives your sales team the information they need to sell effectively and close deals faster.

**Enterprise \$115.50 | Professional \$79.00**

**For a free trial visit:** [www.prophet.ca/365trial](http://www.prophet.ca/365trial)

### ► Microsoft Dynamics 365 Business Central

Order, sell, invoice and report – the core of every business. The businesses that do these things the best, succeed! Turn multiple disconnected systems into one and make ordering, selling, invoicing and reporting easier and quicker and do it all from anywhere!

Dynamics 365 Business Central can be tailored to suit your needs – even if it means starting small and adding modules or integrations as you grow.

**Essentials \$85.10 | Team \$9.70 per user**

**For a free trial visit:** [www.prophet.ca/365trial](http://www.prophet.ca/365trial)

### ► Microsoft Office 365

It is not just email in the cloud – it is the anywhere, always-on mobile productivity platform. Give your workforce the tools they need and remove productivity roadblocks.

**Starting at \$4.90 Depending on Capabilities**

**For a free trial visit:** [www.prophet.ca/365trial](http://www.prophet.ca/365trial)

### ► IT and Managed Services

Focus your time and energy on your business; not managing the equipment in your environment. Managed IT Services can reduce downtime by identifying problems before they occur, by automating critical tasks and improving the overall health of your network.
