SharePoint Jumpstart
Design, Implementation & Support

Tired of your plain SharePoint installation? Working with Office 365 but don't know where to start with SharePoint?

ProServeIT designs and implements your SharePoint Intranet Portal that will match your company's identity. Not only does it allow you to display a welcoming, custom site, but you will also enhance user adoption.

What is the process?

1 - We Meet (up to 4 hours included)
The meet-and-greet allows us to gain a deeper understanding of your expectations in regards to your SharePoint environment.

2 - We Design (up to 10 hours included)
We will work collaboratively with your organization to design a branded SharePoint Intranet Portal to fit your company's identity.

3 - We Implement (5-10 business days)
We will adjust a core solution to the validated design composition. Once the package is ready for deployment, we will prepare your SharePoint environment for setup/configuration of the features & pages you want.

4 - We Train (up to 4 hours included)
We will ensure that your team is trained to fully leverage your newly branded SharePoint Intranet Portal.

5 - We Support (for 90 days)
We will stand by and support your recently deployed SharePoint environment for 90 days. This allows your team the opportunity to ease into the adoption of the solution and ensures there is always someone at hand to assist, if necessary.
