

Project and Portfolio Management for the Modern Workplace

Prosperi PPMfast provides rapid deployment templates for immediate adoption of **Microsoft Project Online**, crafted to meet the requirements of the best practices of most organizations, our experience, and those recommended by the Project Management Institute (PMI).

Rapid Deployment

Deployment of your Microsoft Project Online environment could take as little as 4-8 hours, which means your teams can be productive, up and running immediately.

Maximum ROI

With PPMfast you are able to maximize the results of project management without the need for a high upfront investment, requirements/needs analysis and methodology preparation.

Pre-Configured Reports and Analysis

PPMfast comes pre-configured with cockpits and dashboards, containing various measures that enable the effective management of portfolios, programs and projects.

Among the measures: Key Performance Indicators, Cost, Progress Reports, Monitoring of Resources, their Assignments and Availability.

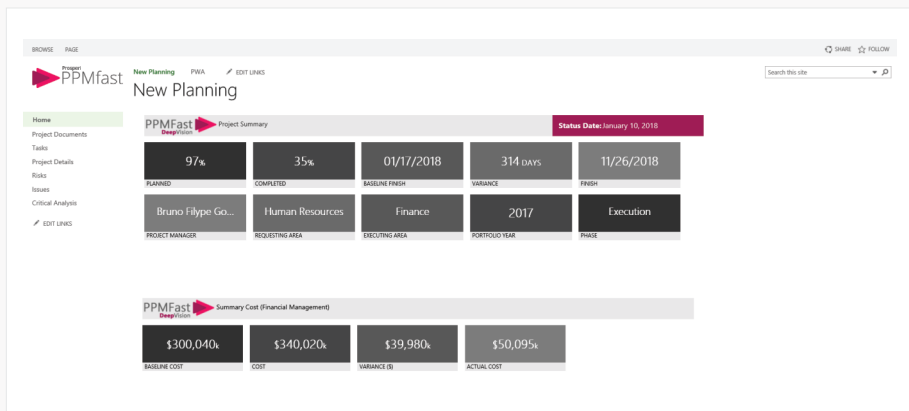

Seamless Integration

PPMfast provides seamless integration with Microsoft SharePoint and Microsoft Office applications, which enables you to have total control of project documents in a structured way, with indexed searches that speed up access to information.
