

2-Week Cloud Assessment

Jumpstart your modernization plan with a custom cloud assessment

Jumpstart your adoption of cloud in just 2-weeks with Protera, the preferred SAP on Azure migration partner. Achieve scalability and speed of performance with a customized cloud assessment and Cloud Adoption Plan for migrating workloads to Azure securely, architected correctly the first time.

This 2-week, in-depth cloud readiness assessment engagement includes:

Strategy & Govern Workshop for migrating servers to Azure

Protera Arion

Cloud Adoption Plan for migrating servers to Microsoft Azure

As the Preferred Migration Partner of SAP to Azure in North America, Protera’s proprietary migration platform, Protera Arion, saves you up to 50% in time and cost versus other migration methodologies.

Protera Arion® is a migration automation services and solutions platform for enterprise workloads on Azure. The certified Protera Arion® platform allows you to accelerate your journey to Azure reducing risk, downtime, and cost. Starting with an automated cloud plan, easily see your timeline, project plan, architecture, migration and run costs, and understand your options for Azure cloud cost optimization along with Azure infrastructure optimization.

A partner with a deep engineering relationship with Microsoft, Protera uses a well-architected cloud adoption framework backed by automation to reduce complexity, accelerate timelines, and drive down the cost of critical application migrations versus a traditional approach:

<p>1 Design target cloud ecosystem architecture</p>	<p>2 Model cloud costs</p>	<p>3 Design and validate migration plan</p>
<p>Design Azure architecture based on extensive experience and Arion® library of transformation rules.</p>	<p>Automatically model migration and run costs based Azure infrastructure options.</p>	<p>Finalize and validate migration method and timelines.</p>

Jumpstart your cloud modernization plan today.
