4-Week Migration for up to 10 servers on Azure

4-Week Landing Zone Deployment and Migration of up to 10 servers to Azure

Jumpstart your adoption of cloud in just 4-weeks with Protera, the preferred SAP on Azure migration partner. With Protera Arion, Protera's automated enterprise cloud migration and management platform, achieve scalability and speed of performance with a deployment on Azure securely, architected correctly the first time.

This 4-week engagement includes:

Customized migration assessment for migrating up to 10-servers to Azure	Cloud Adoption Plan (CAP)	Automated VM build and migration using Protera Arion	Potential access to funding programs

As the Preferred Migration Partner of SAP to Azure in North America, Protera's proprietary migration platform, Protera Arion, saves you up to 50% in time and cost versus other migration methodologies.

Protera Arion® is a migration automation services and solutions platform for enterprise workloads on Azure. The certified Protera Arion® platform allows you to accelerate your journey to Azure reducing risk, downtime, and cost. Starting with an automated cloud plan, easily see your timeline, project plan, architecture, migration and run costs, and understand your options for Azure cloud cost optimization along with Azure infrastructure optimization.

A partner with a deep engineering relationship with Microsoft, Protera uses a well-architected cloud adoption framework backed by automation to reduce complexity, accelerate timelines, and drive down the cost of critical application migrations versus a traditional approach:

1 Design target cloud ecosystem architecture	**2** Model cloud costs	**3** Design and validate migration plan
Design Azure architecture based on extensive experience and Arion® library of transformation rules.	Automatically model migration and run costs based Azure infrastructure options.	Finalize and validate migration method and timelines.

Jumpstart your cloud modernization plan today.
