PROTOS LABS
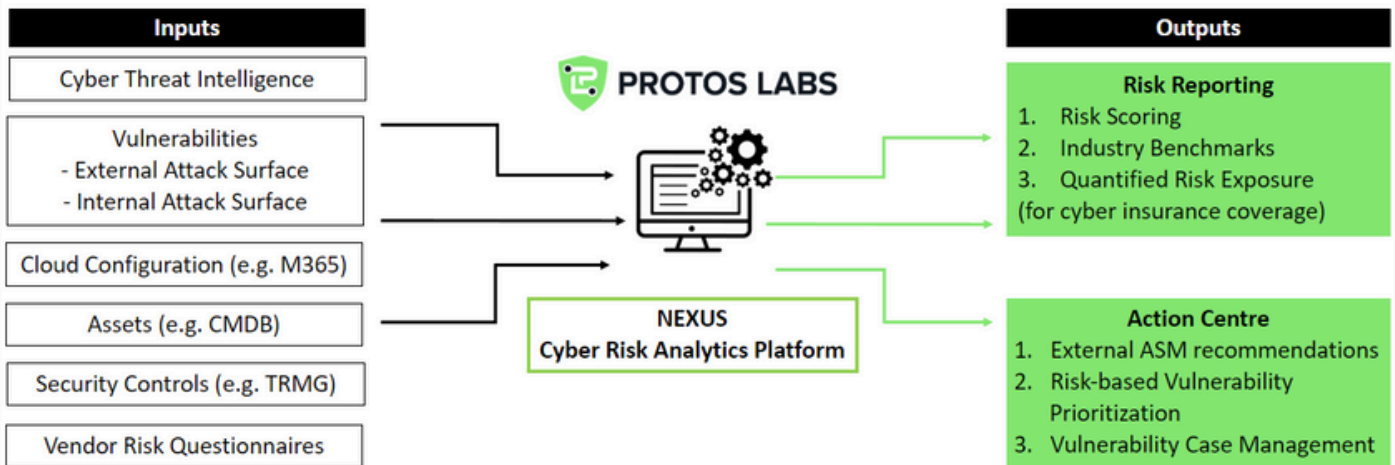

Unify data, tools and teams for smarter cyber risk decisions with NEXUS.

NEXUS is an **integrated cyber risk analytics platform** that combines data from external feeds, internal security tools and third-party questionnaires to deliver the clearest, most cohesive view of cyber risk.

Inputs
Cyber Threat Intelligence
Vulnerabilities - External Attack Surface - Internal Attack Surface
Cloud Configuration (e.g. M365)
Assets (e.g. CMDB)
Security Controls (e.g. TRMG)
Vendor Risk Questionnaires

PROTOS LABS

NEXUS Cyber Risk Analytics Platform

Risk Reporting
1. Risk Scoring
2. Industry Benchmarks
3. Quantified Risk Exposure
(for cyber insurance coverage)

Action Centre
1. External ASM recommendations
2. Risk-based Vulnerability Prioritization
3. Vulnerability Case Management

Build, Act, Report – NEXUS' BAR Approach to Cyber Risk Management

NEXUS **Builds** a contextualised risk profile for your organisation. It offers actionable insights and a centralised platform for users **to Act** on. It then creates a **Report** with qualitative and quantitative metrics that are easy to digest for the board, regulatory bodies, and cyber risk teams.

Build your Risk Picture — NEXUS builds a complete cyber risk picture through our patented risk model, fusing data from sources wider than many close competitors and comparing it against emerging threats.

Act on your Risk — NEXUS provides actionable recommendations and centralises all risk remediation activities in one platform, from vulnerability case management to automated MITRE threat modelling.

Report your Risk — NEXUS produces a comprehensive cyber risk report in consistently clear qualitative and quantitative terms.

Performance-Oriented Outcomes

300%
increase in productivity

Advance the timely remediation of vulnerabilities

100%
increase in coverage

Improve the visibility of attack surfaces

200%
increase in speed

Accelerate the speed of risk reporting

PROTOS LABS

4 critical cyber risk management problems and how NEXUS solves them.

Cyber risk reporting is unable to keep pace with the evolving threat landscape.

NEXUS automatically measures the organisation's cyber risk posture against new and emerging threats.

Data collation for risk reporting across data silos and disparate functions is highly inefficient.

NEXUS provides easy reporting by unifying all data silos and assets into a single platform.

The measurement of cybersecurity performance is subjective and inconsistent.

NEXUS automatically builds a data-driven cyber risk picture using a patented risk exposure model that pulls directly from technical sensors.

Lack of visibility across all assets and systems limits the effectiveness of operational controls.

NEXUS offers comprehensive visibility of cyber risks across all attack surfaces - external, internal and third-party.
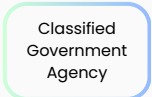

About Protos Labs

Protos Labs is an award-winning cyber risk management company that serves the intersection of cyber and insurance through their patented, AI-driven cyber risk analytics technology.

We offer advanced cyber risk software to identify and mitigate risk and cyber insurance products to transfer residual risk. Protos Labs is accoladed by the cybersecurity regulator in Singapore.

Who We Help

- Cyber Risk Managers
- IT Security Specialists (Line 1.5)
- Vulnerability Managers
- CISOs
- BISOs
