ABOUT PROTOTYPE:IT

Since our inception in 2005, **Prototype:IT** has been delivering custom IT solutions and management services to our growing number of customers located within the Dallas-Fort Worth Metroplex and throughout the country. Our team of certified and experienced IT consultants and project managers assist our clients by providing best-in-class services and support that enable you to focus your attention away from day-to-day IT challenges and back to your core business.

Whether as your sole IT service provider or an extension of your IT team, **Prototype:IT**'s proactive approach ensures stability of your infrastructure resulting in maximum business continuity, minimal downtime and the safety and security of your information. By providing custom solutions to fit your needs, we not only supply the tools and resources, but a dedicated team to support your business success.

WHAT SETS US APART

What differentiates us from competition is our people. We have highly-experienced IT staff that provide outstanding services from design and deployment of key IT initiatives to exceptional levels of proactive ongoing support. Our technologists are experts in the industry and as we continue to grow, we continue to invest in our talent pool in order to stay ahead of demand, evolve with the ever-changing technology landscape and deliver the best possible IT solutions for our clients.

WHAT WE DO

CLOUD HOSTED SERVICES

Our enterprise-class servers can provide scalable, secure environments for your applications, eliminating the need for local equipment while providing quick access to your work environment anytime, anywhere.

MANAGED IT SUPPORT SERVICES

Our managed services address the full range of your day-to-day IT needs including 24x7 monitoring and management, centralized patching, back-ups, email and 3rd-party IT vendor coordination. Our team works to proactively identify and mitigate issues and threats to ensure the stability and security of your infrastructure and data.

PROJECT & APPLICATION SERVICES

Our scalable team of effective and highly-experienced technologists can efficiently design, deploy and manage your key IT initiatives and core deliverables.

STRATEGIC IT CONSULTING

From technology design and implementation to budget and strategic planning, our consulting and vCIO services take your business to the next level and support the achievement of your company's goals.
