**Unlock the full potential** of Microsoft Copilot, Agents & Azure AI for your organization

PROVECTUS

AI Potential Workshop

→

A 1–2 day, hands-on workshop that helps your organization understand AI opportunities, evaluate concrete use cases, and develop a clear roadmap for implementing AI solutions using Microsoft technologies.

What the AI Potential Workshop Delivers

→

PROVECTUS

Inspiration meets implementation, understanding possibilities and identifying real impact
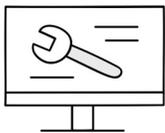

AI Potential Explained

- Opportunities, risks & real-world examples of Microsoft-based AI solutions
- Deep dive into Copilot, agents, automation & Azure AI

Structured Ideation

- Use-case discovery based on business processes & pain points
- Guided evaluation using impact–effort analysis

Hands-on Learning

- Live demos, real implementations, practical exercises
- Experience how AI can automate, streamline and enhance workflows

From Understanding to Action – Your AI Enablement Journey

PROVECTUS

→

1.

Knowledge Build-Up

- Copilot Advanced: beyond text assistance (agents, bots, integrations)
- Power Platform & Copilot Studio: automation meets AI
- Azure AI Services: secure & compliant integration of intelligent solutions

2.

Ideation & Use Case Development

- Identify AI-ready processes and specific pain points
- Structured ideation along business processes
- Live examples & mini-implementations
- Prioritization via impact–effort matrix

3.

From Idea to Execution

- Immediate validation of use-case feasibility
- Actionable recommen-dations and next steps
- Clarity in the AI jungle → structured roadmap

What Your Organization Gains

PRO
VEC
TUS

→

Clarity & Strategic Direction
Understand the potential, limitations & risks of Copilot, agents & Azure AI.

Company-Specific AI Use Cases
Structured ideation leads to validated, prioritized use cases with concrete benefits.

AI-Enabled Processes & Efficiency Gains
Identify automation opportunities with and without AI, supported by best practices and real customer projects.

Fast Knowledge Build-Up
Learn to use the Microsoft AI ecosystem effectively—from M365 Copilot to Azure AI.

Direct Transition Into Action
Hands-on examples, real implementations, and clear next steps for execution.
