Future proof your existing investments with **Azure Application Modernization** from Provoke.

Provoke's Azure Application Modernization programme enables organisations to extend the life span of your legacy applications as well as add new modern features to empower and delight your users.

Provoke's expert team of Architects, Developers, Cloud Engineers and User Experience Designers will assess your current application and help you execute the optimal modernisation strategy. It includes a re-architecture of the solution to enable it to scale and improve supportability, minor refactoring to support cloud features or an entire rebuild to maximise the value of new technologies and AI features.

What we offer

ENGAGE YOUR USERS

Our Design team will refresh your application and dramatically improve user satisfaction and productivity for staff and customers across devices and locations.

REDUCE COSTS

By moving off aging hardware and technology stacks not only will you reduce hosting and operating costs but also speed up development effort and improve security and reliability.

FUTURE PROOF

By combining modern Azure services, technologies, architecture, and DevOps practices we will enable you to continue to operate and evolve your application in an ever changing world.

WHAT OUR CUSTOMERS ARE SAYING

"We were really delighted with both the approach and the outcomes of our app modernization projects with Provoke. The transparent, agile way in which Provoke engaged with us built our trust and confidence from early on."

– Stephen Bunce , Technology Delivery Manager, Trustpower

PROVOKE

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection

WHY AZURE

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
