PROVOKE

Running applications in **legacy** hosting environments can be **costly, insecure, and challenging** to maintain.

Moving to the cloud is the logical choice to reduce costs, future proof your solutions, and reach a global userbase. However, getting there without help can be intimidating and risky.

EXPENSIVE TO RUN

60 – 80%

of IT budgets are used to manage legacy and outdated systems and 61% of IT leaders say that cost-cutting is the top reason for their organization to adopt cloud software.

NEED HELP

31%

of businesses lack of the right skill sets to manage and derive the maximum value from Cloud investments.

CHALLENGES

Poorly planned and executed Cloud migrations can end up being more costly, difficult to maintain, can introduce security vulnerabilities and be disruptive to business operations. Getting expert help is essential.

Move your **applications, VMs** and **data** to the Cloud with **Azure Migrate** from **Provoke**.

Provoke will help your business realize the security, power, cost savings, and innovation that Microsoft Azure has to offer. Our cloud experts will make the process painless and empower your team.

SCALE IN THE CLOUD

Grow your userbase locally and globally without sacrificing the performance, security, and reliability of your applications.

REDUCE COSTS

Reduce operating and hosting costs by moving off aging hardware and technology stacks. Leverage the Cloud to speed up development times and improve security and reliability of your applications.

FUTURE PROOF

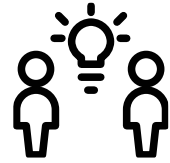

Combining Azure services, modern technologies, and DevOps practices will enable you to continue to operate and evolve your solutions in an ever-changing world.

Azure Migrate Approach

ASSESS

- Review current operating environment including hosting, security, workloads, technologies, people, and processes

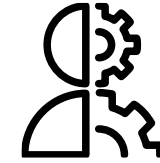

PLAN

- Identify pilot workloads
- Design refactoring of workloads to optimise for the Cloud
- Design on-going DevOps and support approach
- Create detailed migration plan

MIGRATE

- Script environments and Infrastructure as Code
- Configure Azure platform and infrastructure
- Automate migration
- Cutover production systems

MAINTAIN

- Define support processes and tooling
- Implement CI/CD pipelines for automated testing and deployment
- Upskill your team to enable ongoing support or let Provoke look after it for you

AZURE PLATFORM

Monitoring, Alerts, Security, Access, Cost Management, Policies and Procedures, Best Practice

Common migration / refactoring scenarios

LEGACY WEB APPS

- Simplify maintenance by leveraging Azure PaaS websites
- Enable scalability with containers in Azure Kubernetes Service

VIRTUAL MACHINES

- Maintain current model but reduce maintenance overheads with Azure VMs
- Reduce OS maintenance overheads by leveraging serverless technologies such as Azure functions

DATABASE SERVERS

- Reduce costs with PaaS SQL Azure
- ETL processes with Data Factory and other data services
- SaaS reporting with Power BI

FILE SHARES AND STORAGE

- Reduce costs and complexity with Azure Storage and its built in redundancy features

Case Study: Trustpower

As one of New Zealand's leading electricity and telecommunications companies, Trustpower was committed to leveraging Azure to drive internal productivity and engagement with their customers. Provoke assisted their team in planning the migration to Azure and modernization of several key applications.

SOLUTION GOVERNANCE

Provoke implemented a framework that allowed for distributed management of key resources, enabling teams to manage their own applications while still ensuring consistency across the platform and monitoring solutions.

APPLICATION MODERNIZATION

Provoke provided expert guidance on rearchitecting six legacy applications. The applications were migrated to the cloud, upgraded to modern supportable frameworks and leveraged Azure PaaS services to speed up development.

DEVOPS STRATEGY

Provoke developed a solid DevOps strategy through the automation of deployments, monitoring, and environments. The Trustpower team can now confidently maintain and evolve these products over time.

Provoke loves Microsoft Azure!

Provoke has helped countless customers realize true business benefits by using our proven approach to get the most out of Microsoft Azure platform.

SCALABLE AND SECURE

Regardless of your solution type, current user base or technology stack there are cost effective Azure services to support your workloads. And as your business grows the platform scales with you.

EASY WINS

There is a plethora of features and components that, with the right expertise, can add value to your solutions without massive cost overheads. From streamlining deployments to adding AI to solutions, Azure helps to delight both your staff and customers.

REDUCED OPERATING COSTS

Through smart architecture, implementation choices, and automation not only can you minimize hosting costs but also drive down your development and maintenance overheads without compromising reliability.
