

# Take your business to the Cloud with Azure Migrate from Provoke.

Azure Migrate from Provoke will get your business safely and securely to the Cloud and help you maximise your existing application, virtual machine and data technology investments. Our team of Cloud Architects, Engineers and Developers will help you every step of the way, providing peace of mind during your business transformation activities.

The Provoke team will assess your current environments, people, and processes to define a tailored migration approach. This approach will include setting up your Azure platform's monitoring, security and governance models, and upskilling of your internal team. As part of the migration, workloads will be refactored to be cloud optimised and cost-effective.

## WHAT WE OFFER

### SCALE IN THE CLOUD

Grow your userbase locally and globally without sacrificing the performance, security or reliability of your applications.

### REDUCE COSTS

Reduce operating and hosting costs by moving off aging hardware and technology stacks. Leverage the Cloud to speed up development and improve security and reliability of your applications.

### FUTURE PROOF

By combining modern Azure services, technologies, architecture, and DevOps practices we will enable you to continue to operate and evolve your applications in an ever-changing world.

## WHAT OUR CUSTOMERS ARE SAYING

*“Provoke has been instrumental in enabling OneHealthPort to migrate to Azure through the design and implementation of our environment.”*

– Ryan McNeilly, Director of Operations, OneHealthPort

PROVOKE

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## KEY USE CASES

### WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

### CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

### BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

### MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

### MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection.

## WHY AZURE

### FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

### ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

### DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions and then manage your hybrid applications from a single console with Microsoft System Center.

### GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users wherever they are.
