Assessment

Cloud Assessment

Are you stuck in your cloud journey?

If you are looking at either starting your cloud journey on the right foot or realigning your efforts to meet long-term business objectives, Proximus is the trusted partner who can not only advise & create a roadmap for modernization but also execute the strategy.

HOW CAN YOU BENEFIT FROM AN ASSESSMENT?

> **Receive transparent pricing for your migration**

> **Properly size your workload & profit from seamless migration**

> **Compare different cloud providers**

> **Increase business efficiency & innovation opportunities**

What is Cloud Assessment?

Cloud Assessment is the process of identifying what workloads are cloud compatible and how they can be virtualized so that they function as good as they did physically on the premises. This is done using a strategical migration roadmap in the form of a move group and other necessary treatments.
