

# IoT Accelerator AI @ Edge POC: 2 Weeks

A two-week during implementation track

## Use Case Discovery

Discover which use case drives your business

## POC Implementation

Which service suits you best? Discover the differences.

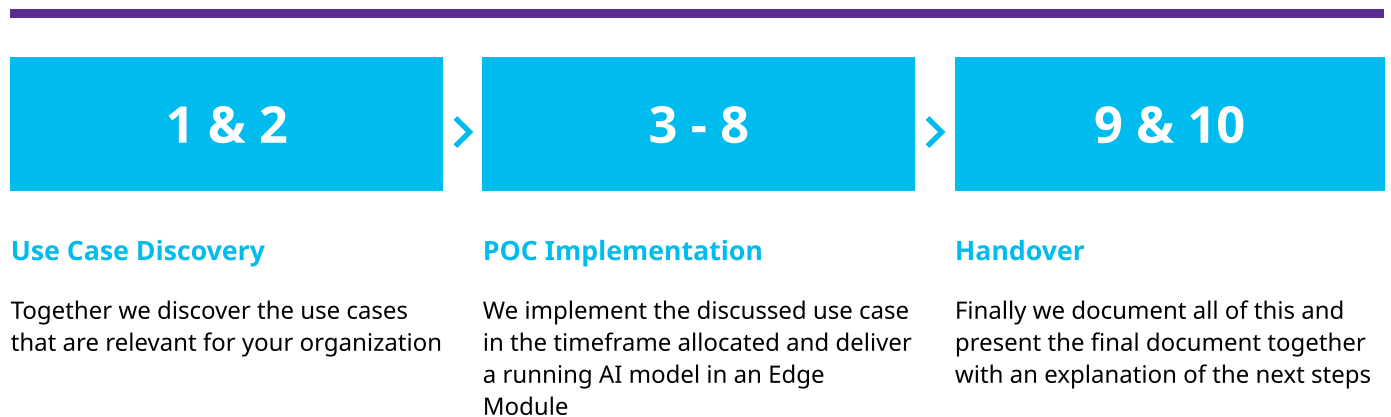

## Handover

Together we implement a Proof of Concept, showing how Timeseries can help you

*Cloud enabled new use-cases for us, being able to process massive datasets and generate insights from those. At this moment, there is a need to now utilize the trained model results and deploy them on our devices to minimize latency impact for a lot of applications.*

*During this 1 week workshop, we sit together with you and demonstrate the value of Azure IoT by implementing Azure IoT Edge modules for a given use case.*

## About Proximus

Proximus is a provider of digital services and communication solutions operating in the Belgian and international markets. We offer products and services adapted to each customer and we are the partner of citizens, businesses, and Belgian society in their digital evolution. The customer is at the heart of everything we do. Our aim is to deliver the best customer experience and to simplify the customer journey by offering accessible and easy-to-use solutions.
