IoT Accelerator - Timeseries PoC: 1 Week

A one-week during implementation track

Use Case Discovery

Discover which use case drives your business

Timeseries Options

Which service suits you best? Discover the differences.

Proof of Concept

Together we implement a Proof of Concept, showing how Timeseries can help you

Through the Internet of Things (IoT), you are now able to detect and act more quickly on potential problems that arise. You might for example see a valve leaking, detect that your tyre pressure is decreasing, or even see that your aircraft is going down while it should be going up.

With our customer, we sit together for a 1 week analysis where we discover and implement the usage of Timeseries on Azure with services such as Azure Time Series Insight, Azure Storage or even Azure Data Explorer

1 & 2	>	3 & 4	>	5

Use Case Discovery

Together we discover the use cases that are relevant for your organization

Timeseries Solutions

There are several Timeseries solutions on the market, during this time we will discover and implement the one suitable for you

Documentation + Presentation

Finally we document all of this and present the final document

About Proximus

Proximus is a provider of digital services and communication solutions operating in the Belgian and international markets. We offer products and services adapted to each customer and we are the partner of citizens, businesses, and Belgian society in their digital evolution. The customer is at the heart of everything we do. Our aim is to deliver the best customer experience and to simplify the customer journey by offering accessible and easy-to-use solutions.
