Conference room management

Manage Certified Microsoft Teams Rooms

The screenshot displays the Microsoft Teams admin center interface. The left-hand navigation pane includes links to Dashboard, Teams, Devices, Phones, Teams Rooms (highlighted), Collaboration bars, Locations, Users, Meetings, Messaging policies, Teams apps, Voice, Policy packages, Analytics & reports, Org-wide settings, Planning, Legacy portal, and Call quality dashboard. The main content area is titled 'Teams Rooms' and provides an overview of managing Teams Rooms devices. It includes a 'Devices summary' card showing 1 Device, 0 Unhealthy, and 0 Offline. Below this is a table of devices with columns for Name, Health status, Manufacturer, and Model. A single device, 'Boardroom', is listed with a 'Healthy' status, 'Logitech' manufacturer, and 'SmartDock' model. Action buttons for 'Edit Settings', 'Restart', and 'Remove' are visible above the table. The bottom right corner contains 'Need help?' and 'Give feedback' links.

Microsoft Teams admin center

Teams Rooms

You can control and manage all of the Teams Rooms devices such as consoles, microphones, cameras, and displays, in your organization. You can configure settings, view activity information, manage updates, and perform diagnostics to help with troubleshooting. [Learn more](#)
