Modern Work

Target Audience: Organizations looking to:

- Modernize legacy systems.
- Empower citizen developers while maintaining governance.
- Optimize existing Power Apps for better performance.

Duration: Typically, 4-6 weeks for initial deployment.

Deliverables:

- Fully functional Power App(s) aligned with business requirements.
- Integration setup with critical systems.
- Documentation and training materials for internal teams.

Pricing: Fixed or flexible pricing models based on the complexity and scale of the engagement.

Empower businesses to quickly create tailored applications with Microsoft Power Apps. Our program accelerates development, ensures best practices, and aligns solutions with organizational needs.

Service Offerings:

Discovery & Requirement Gathering:

- Conduct workshops to understand business processes and application requirements.
- Define use cases for automation and integration using Power Apps.

Custom App Development:

- Rapid development of proof-of-concept apps.
- Deliver fully functional, user-friendly apps tailored to specific business needs.

Integration with Microsoft Ecosystem:

- Seamless integration with Microsoft Teams, SharePoint, Dynamics 365, and other Microsoft 365 services.
- Custom connectors for external data sources and APIs.

Optimization & Governance:

- Review existing Power Apps solutions for performance and scalability.
- Implement governance policies for security, compliance, and cost control.

Enablement & Training:

- Provide hands-on training sessions for internal teams.
- Equip users with knowledge to maintain and enhance their apps independently.

Ongoing Support & Enhancements:

- Offer post-deployment support to ensure continuous improvement.
- Add new features and adapt apps to evolving business needs.
