PHILIP MORRIS
INTERNATIONAL

"We far exceeded our goals for time and cost savings, and Astronaut is a key part of our new digital end-to-end talent acquisition process."

Calvin Tjiang, Recruitment Executive, Philip Morris International, Sampoerna

We also create custom platforms (built on our technology) & make our video technology available as an API. Consult with us about your future plans. We support innovation.

Reduce your reliance on CVs.

Resumes are poor proxies for humans. They do not help understand personality, character or ability to communicate.

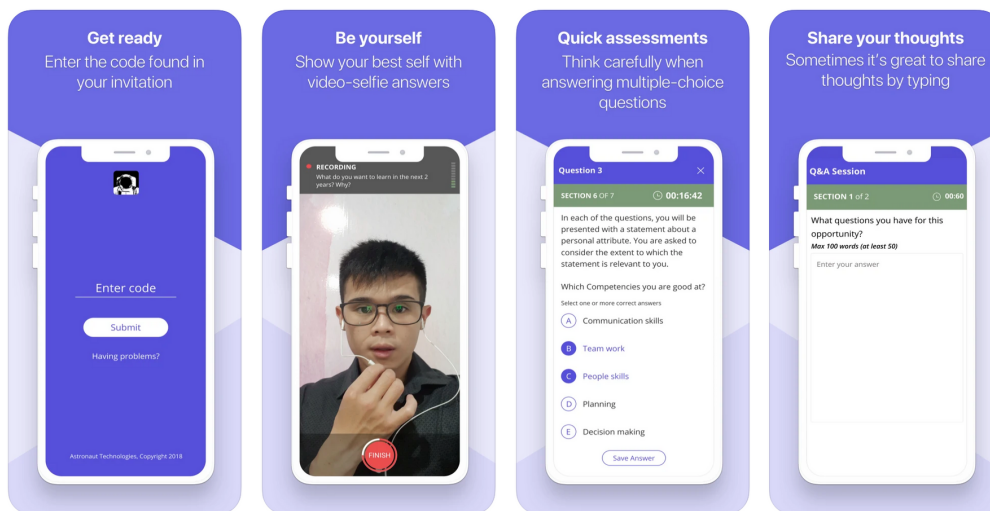

Our technology helps you move away from making decisions based on unverified and non-predictive CV data.

“Resumes are terrible. They don’t capture the whole person. At best, they tell you what someone has done in the past and not what they’re capable of doing in the future.”

Laszlo Bock, Google's former Head HR

Build trust with convenience, reliability.

Your candidates, students and employees live in a world filled with convenient & effective digital experiences, raising the bar for their expectations of you. Choose wisely, gain their trust,

All the features you expect, and more.

Creating a seamless experience that matches your organisational needs is critical. Mix & match these self-service features, or talk with us about a custom configuration, quickly delivered.
