

# GitHub

# Implementation Accelerator

*Accelerate Your GitHub Adoption*

## Our Scope

### Assessment Strategy

- Conduct readiness assessments to understand the current development environment, tools, and workflows.
- Identify gaps and define an adoption roadmap aligned with business and technical objectives.

### Migration & Deployment Support

- Provide guidance and best practices for migrating repositories, workflows, and integrations to GitHub.
- Assist in configuring environments, setting up governance models, and implementing CI/CD pipelines.

### Education & Awareness Sessions

- Deliver targeted training and enablement sessions for development teams, IT administrators, and stakeholders.
- Host awareness workshops and hands-on labs to promote adoption of GitHub features, including AI-powered capabilities like GitHub Copilot.

## Key Outcomes

### Clear Adoption Roadmap

Actionable strategy and measurable milestones for successful GitHub adoption

### Seamless Migration & Deployment

Smooth transition with optimized workflows and stable integrations

### Empowered & AI-Driven Teams

Boosted developer productivity through modern DevOps and GitHub Copilot adoption
