# Azure Foundations

Accelerate your cloud journey with a robust, scalable, and secure Azure foundation.
Our turnkey offer provides a structured approach to designing and deploying your Landing Zone, ensuring full alignment with Microsoft's Cloud Adoption Framework and enterprise-grade governance standards.

Approach

Foundation (A)
- Kick-off meeting
- Technical and organizational assessments
- Team interviews and collaborative workshops
- Definition of prerequisites for the target solution
- Deliverables: Workshop and assessment reports, prerequisite checklist with associated actions

Definition & Workshops (B)
- Governance model
- Network topology
- Identity Strategy (Entra ID & AD)
- Security posture (Defender for Cloud)
- CI/CD pipelines (GitHub)
- Tooling and operational framework

Build & Deploy (C)
- Implementation using GitHub, Terraform, and GitHub Actions
- Deployment of core Azure components
- Governance setup: policies, RBAC, tagging strategy, etc.
- Full implementation of the defined solution

Final Validation (D)
- Final technical architecture documentation
- Workshop materials and meeting summaries
- Reusable Infrastructure as Code (IaC) modules
- Project tracking and acceptance testing documentation
- Technical architecture documentation

Prerequisites

Licenses & subscriptions
At least 4 Azure subscriptions – we also recommend Entra ID P2 for high privilege users/admins

Express Route
If ExpressRoute is used, dedicated workshops with the WAN provider will need to be scheduled.

3rd Party Firewall
Ensure the required licenses are in place for the deployment and operation of the Firewall service in Microsoft Azure.

A sample of our expertise

Identity & Security
Defender XDR suite, Entra ID & Active Directoey, Purview, audit, hardening, PKI...

Infrastructure & Cloud
Azure, Azure Local, Azure Arc, Hyper-V, Windows Server, FinOps, IaC, Sentinel...

Modern Workplace
Microsoft 365, Exchange, Intune, MECM...
