NUMBER CONNECT

The online number management service that gives your business visibility over all of your telephone numbers in a single location.

Number Connect allows organizations to manage all of their telephone numbers in one place, regardless of the platform or carrier providing those numbers.

With multiple filter options and the ability to interrogate the details of allocated numbers, Number Connect simplifies the management of enterprise-wide telephone numbers, saving valuable time and money.

Ideal for large or multi-site organizations, Number Connect consolidates data from the Microsoft Teams tenant, Pure IP's carrier voice systems, and data uploaded from other platforms into at-a-glance dashboards and reports.

Ideal for organizations with scenarios:

Using Microsoft Teams Calling	Decentralised telephony	Multiple Platforms	Have lots of phone numbers	Using various providers	Dispersed sites & geographies	Manual Number Management

Pure IP
Just voice.

Faster. Smarter. More

OVERVIEW

How does it work

Number Connect harmonises Company and User information sources from the O365 Teams Voice platform, together with Pure IP's carrier voice systems and data uploaded from other platforms or providers.
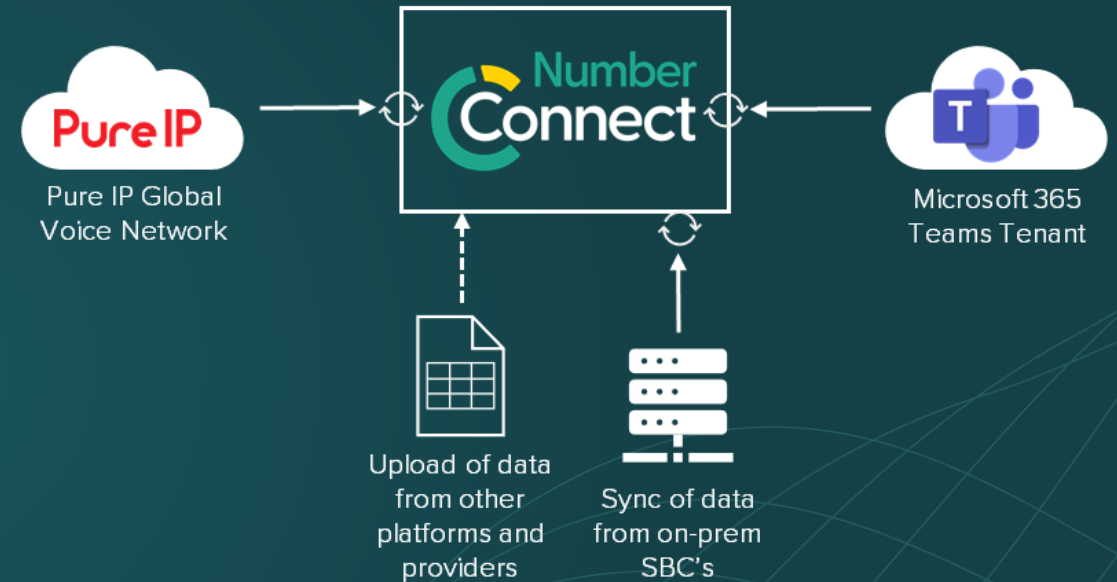

The data residing in the Microsoft Teams Tenant and SBC's is regularly sync'd with Number Connect to ensure it remains current.

Benefits

- Simplifies and accelerates the management of enterprise-wide phone numbers
- Save time, effort and cost by eliminating manual management process
- Provides quick visibility of allocated and unallocated numbers
- Reduces the need for offline spreadsheets to manage data
- Consolidates data from different sources into a single location

Value statement

Up to 10x more efficient at managing numbers than traditional methods
Reduces number management time by up to 60%

AN ENABLER OF ENTERPRISE COLLABORATION

What we do:
We help organisations unlock the potential of collaborative working by empowering enterprise-wide communication to enable change.

How we do it:
We do that by connecting the old with the new, **integrating voice** across the ever-evolving platforms, systems and applications to provide **a single connected communications service** to enable businesses to collaborate effectively in more locations than other providers.

We offer a **progressive** suite of services that continues to **evolve** to meet new technologies and customer requirements. Built around our own secure, reliable and adaptable global voice network, our services are underpinned by a technical-led team steeped in voice experience and expertise.

Faster. Smarter. More.
