

Information for certification

ISV Public test offer is created for offer creation with resource provider validation purposes .

This offer is not available for general public, except for a dummy public plan not intended for purchase. The private plan has a restricted audience: only Microsoft and Pure Storage tenants.

We need to make this offer to go live because of a Marketplace limitation:

Resource provider team could not test our offer in the "Publisher sign-off" stage because the Reservation resource is created under a different tenant than the tenant of the user account used to issue the request. This tenant mismatch is not supported in the "Publisher sign-off" stage but only when the offer "goes live".

Please let's certify the offer so that we move forward with the validation and then work on a real offer.

Thank you for your cooperation.
