Managed Services

OT Security

Cyber Defense

Incident Response

Zero Trust

Data Protection

Cyber Operations

Securing SAP

Cybersecurity & Risk Capabilities

PwC excels in cybersecurity and risk capabilities, acknowledged by Microsoft as an early MISA joiner and winner of multiple Partner of the Year awards.

Cyber Operations

Migrate to or implement Sentinel, with the capability to develop an operating model that is right for you—not one size fits all.

Operational Technology (OT)/Internet of Things (IOT):

Empower your OT/IoT with PwC's experience: design, build and enhance Microsoft Defender for IoT (D4IoT) for innovative and discreet risk reduction in complex environments.

Cyber Technology Rationalizer

Evaluate where you can rationalize your security portfolio and further utilize your investment in Microsoft.

Managed Services and Microsoft-verified MXDR services:

Rapidly prevent cybersecurity threats from impacting businesses including assessment, migration, deployment, engineering and 24x7 operational assistance across the Defender suite.

Zero Trust

A strategic approach across the five pillars—identity, devices, networks, applications and data—using Microsoft's Security Service Edge to build a secure foundation.

Identity & Access Management

Confront IAM challenges head-on, shape a strong risk-based governance strategy and unleash the power of Microsoft Entra for impactful solutions.

Copilot Readiness

Prepare, secure, de-risk, implement and accelerate your Copilot for Security & M365 solutions using personas, data and risk profiles for custom plug-ins, prompt books & engineering.

Incident Response

PwC, in conjunction with Microsoft DART & ISD, fortifies your cybersecurity defenses, enabling swift incident response and empowering you to proactively prevent future threats.

Data Risk and Privacy

Unlock the value of data in a secure and ethical manner across the overall data lifecycle using Microsoft solutions. Tailored approach to data discovery, governance, protection, minimization and privacy.

Securing SAP on MS Cloud

Design and implement Microsoft's cloud-native security capabilities to secure SAP and use Enterprise Control, a PwC product built on Microsoft to automate operation and testing of controls.

Cyber Defense

Embrace digital transformation with an approach focused on speed, scale and efficiency while reducing, mitigating and responding to threats with the Microsoft Defender suite.
