

Azure AD Integration for SAP Cloud Products and SAP IAS: 4-hour Workshop

Boost your organization's efficiency and security with Azure AD Integration for SAP Cloud Products (SaaS and PaaS) and SAP Identity Authentication Service (IAS) workshop. Our team of experts will guide you through a comprehensive 4-hour session designed to streamline your identity management and access control processes. With our hands-on workshop, you will unlock the full potential of your cloud environment by leveraging SSO with Azure AD while using SAML and OpenID Connect protocols. You can choose between using Azure AD directly as identity provider for your SAP Cloud Service (SAP Business Technology Platform, SAP Analytics Cloud, SAP Data Warehouse Cloud, etc.) or via Authentication Service (SAP Cloud Identity Services). Key features of our workshop include:

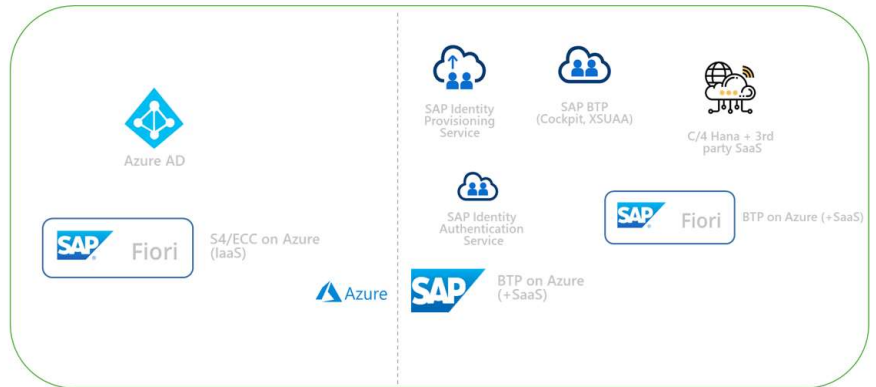

1. **Seamless Integration:** Establish Azure AD as your central identity provider, ensuring a secure and efficient environment for your SAP Cloud Products and SAP IAS.
2. **Centralized User Management:** Ensure users and their roles are managed centrally in Azure AD, eliminating the need for multiple administration points.
3. **Role Mapping:** Simplify access control by mapping Azure AD groups to SAP Cloud roles and SAP IAS, streamlining the authorization process.
4. **Single Sign-On (SSO):** Enhance user experience and reduce login friction by enabling SSO with Azure AD for your SAP Cloud applications. Enrichment of assertion attributes for fine-grained permissions using Azure AD profile information like Country, Department, etc.
5. **Automated Governance:** Implement custom automated governance processes to maintain compliance and mitigate risks associated with user access.
6. **Dynamic User Management:** Dynamic user creation and shadow user management, optimizing the onboarding and offboarding processes.

Beyond the workshop, we are open to partnership in further implementations. Our team of experienced professionals will provide ongoing support and guidance, ensuring a smooth transition and continued optimization of your SAP Cloud environment. By choosing Q_PERIOR as your trusted partner, you will benefit from our expertise, tailored solutions, and commitment to excellence. Join us for this informative 4-hour workshop to integrate Azure AD with your SAP Cloud Products and SAP IAS seamlessly. Our experts will provide you with the knowledge and tools required to enhance your security, efficiency, and user experience. Take the next step in your cloud journey today and make your organization more agile and secure with our Azure AD Integration workshop.

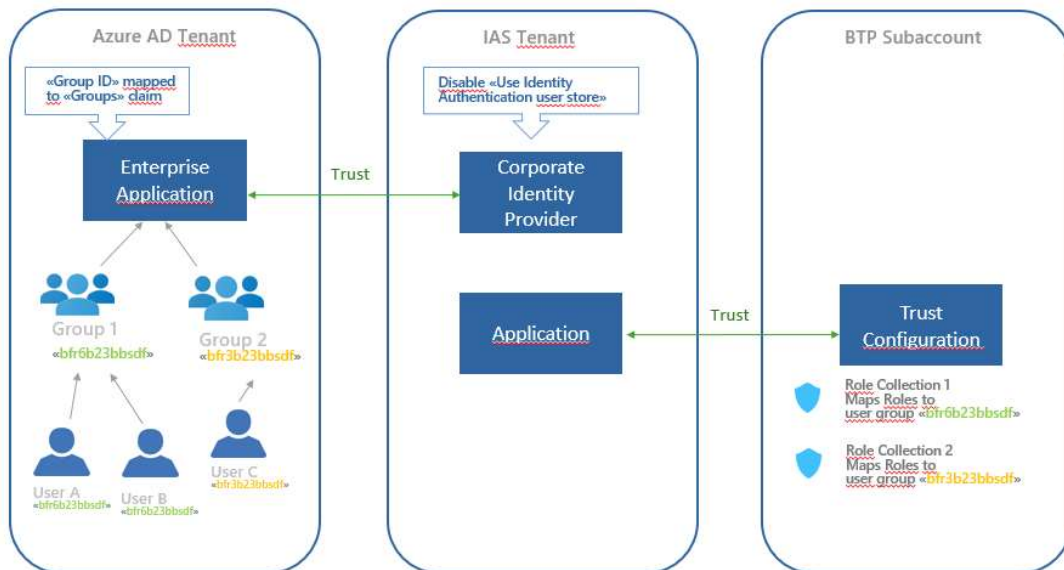

Offering overview:

Azure AD Integration for SAP Cloud Products and SAP IAS: 4-hour Workshop

- Seamless Integration: Establish Azure AD as your central identity provider for your SAP Cloud environment
- Centralized User Management with group and role mapping
- Streamlining the authorization process with SAP Cloud and SAP IAS
- Reduce login friction with Single Sign-On (SSO)
- Integration with and without SAP IAS
- Mitigate risk through automated governance, dynamic user access management
- Enhance security, efficiency, and user experience with Azure AD Integration.
- Possible further partnership with ongoing support and guidance beyond the workshop
