## What is Microsoft Dynamics 365?

It's how you become more agile to delight your customers. With Dynamics 365, you'll have the only portfolio of intelligent business applications that empowers everyone to deliver operational excellence and create more engaging customer experiences.

Dynamics AX has been re-branded Dynamics 365 for Finance and Operations, On-Premises and cloud. Takes you to the next steps to modernize you business with the advanced intelligent ERP solution which can help you flourish your business.

Microsoft Dynamics 365 is the next step in Microsoft's investment in its cloud business software. As such, it reinvents critical business applications for the cloud and provides significant benefits for businesses.

Dynamics 365 business applications include:

- Dynamics 365 for Finance and Operations
- Dynamics 365 for Project Service Automation
- Dynamics 365 for Marketing
- Dynamics 365 for Field Service
- Dynamics 365 for Customer Service
- Dynamics 365 for Sales
- Dynamics 365 for HR & Talent

Each application provides a modern experience and actionable insights delivered from natively embedded Power BI, IoT, and Cortana Intelligence experiences.

Dynamics 365 also offers a flexible licensing structure that will allow businesses to just deploy the required functionality and to expand as business grows.

Dynamics 365 for Finance and Operations is available in the cloud, on-premises, or through hybrid deployment options that adjust to changing requirements, comply with regulations, and maximize your existing investments.

Dynamics 365 benefits for business are:

- Agile and Quick deployment.
- Automate and modernize your business operations and monitor performance in real time, predict future outcomes, and make data-driven decisions to drive business growth.
- Significant cost savings on cloud deployment.
- Flexible integration with other business applications.
- Full business insights and efficiencies
- Improved productivity, customer service and business performance
- Dynamics 365 vision aims to free businesses from monolithic, inflexible business systems that, traditionally, have taken years to develop and deploy, and years to gain any semblance of user adoption and acceptance.
