MSP GROWTH ACCELERATION PLATFORM

Secure your business hassle-free

MSP's challenges

- ⬈ Scale

- ⏱ Speed

- ▭ Vendors &Technologies

- 👤 Human resource

- 📋 Standardization

- ↔ Moving from single to **multiple mature security service provider**

What problem we solve?

Managing a small-scale MSP is relatively easy → **Scaling it up? a HUGE challenge**

Our solution

Our SAAS platform is transforming managed security with a **revolutionary UI standardization** that removes significant obstacles and enables MSPs to boost their growth by leveraging shared services and optimizing economies of scale.
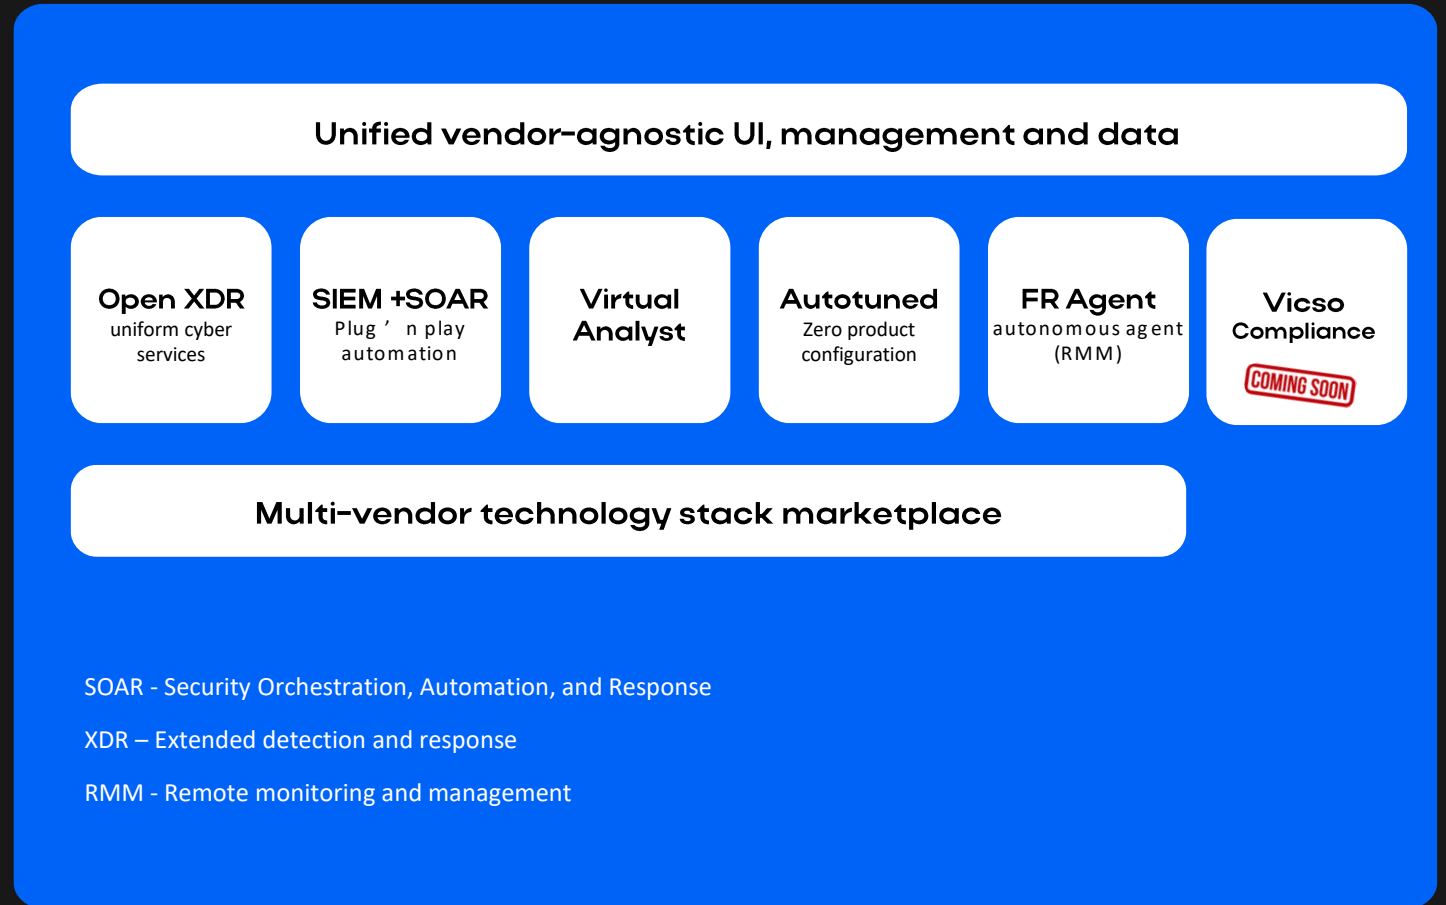

It is the first "pick-n-play" enterprise cybersecurity marketplace, setting new standards in innovation.

01 Pick a service or connect your own.

02 Start using\providing cyber technology.
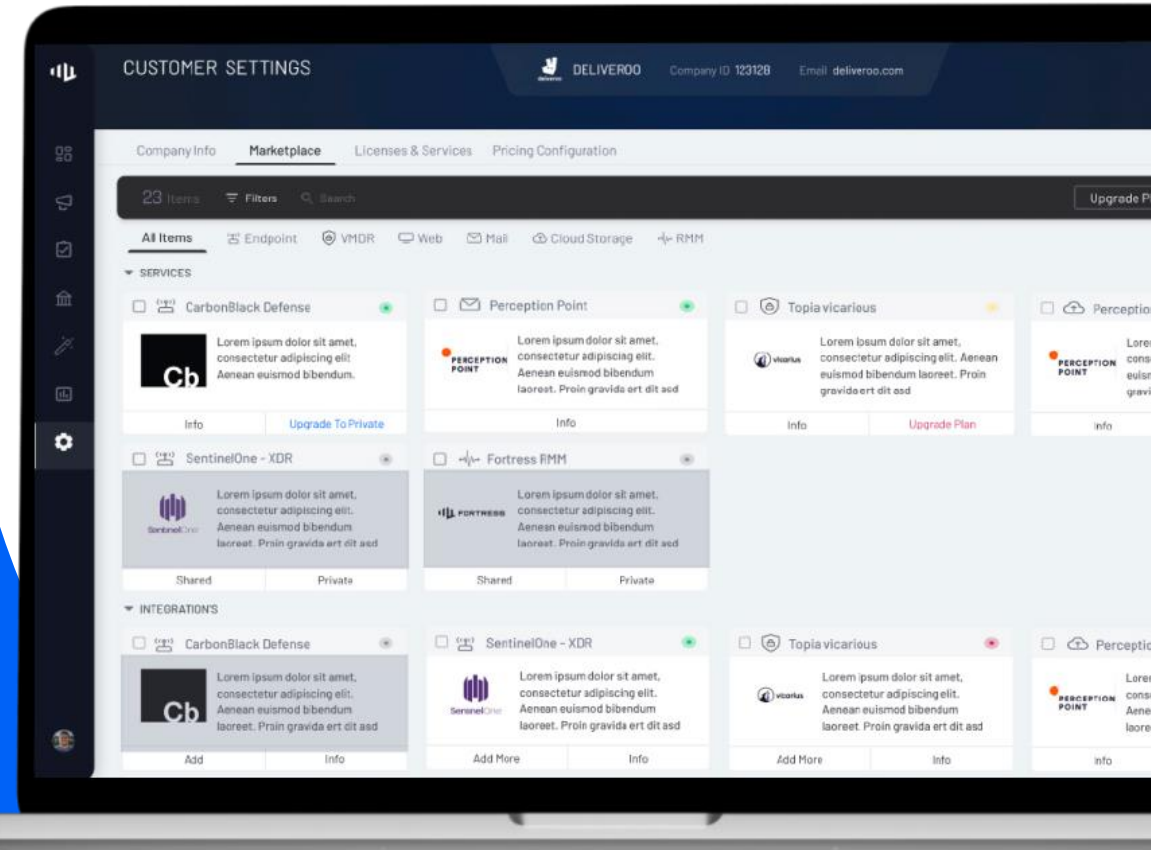

Fortress Open XMDR Platform

01 "One UI to rule them all" – Novel unified, vendor-agnostic UI

02 No need to purchase and integrate technologies & data lakes

03 Single licensing source at a manageable pricing

04 Zero-touch configuration with continuous optimization

05 Proprietary AI & IP inside, usually sold separately by other vendors.

Unified vendor-agnostic UI, management and data

Open XDR uniform cyber services	**SIEM +SOAR** Plug ' n play automation	**Virtual Analyst**	**Autotuned** Zero product configuration	**FR Agent** autonomous agent (RMM)	**Vicso Compliance** COMING SOON

Multi-vendor technology stack marketplace

SOAR - Security Orchestration, Automation, and Response

XDR – Extended detection and response

RMM - Remote monitoring and management

Practical & Affordable Cyber Security

FORTRESS CYBER platform was developed to enable access and simplification of Enterprise grade Security for SMB'S and SME's. Get high level visibility and responsivity immediately.
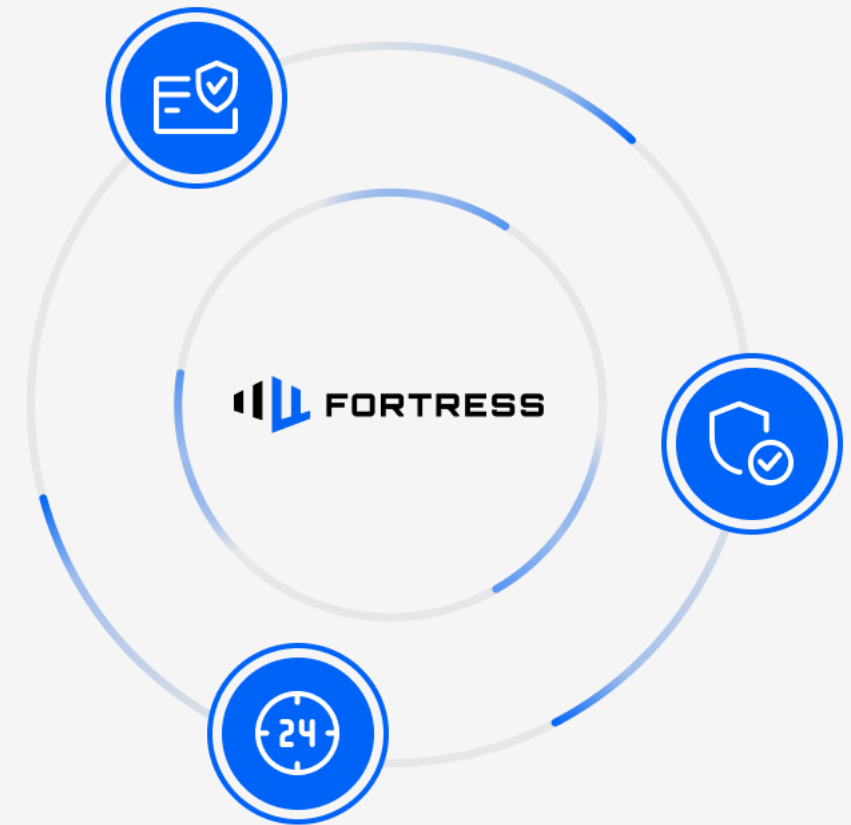

01 No up-front costs	**02** Quick setup & self-onboarding
03 Pay as you GO	**04** 24\7 Monitoring MDR - addon
05 Flexible control of licensing, match SMB needs support	**06** Professional services - addon

FORTRESS

Merlin AI

The Merlin AI̍, proprietary technology, and IP orchestrates and automates security operations, incident response, and threat hunting, allowing to immediately validate threats.

No manual processes and time wasted with out-of-the-box automation workflows, powered by our novel **AI**

OPEN, Security Automation, Incident Mitigation Mitigation and **beyond**

Immediately detect threats

Utilize MITRE ATT&CK within Marlin AI̍ AI̍ to find unknown, stealth or sophisticated attacks, continuously improving your cyber defense.

Scale with speed

Improve the speed and quality of your SecOps with ready-made playbooks, scalable integrations and zero configuration.

Open tools and teams

Orchestrate across SecOps and Infrastructure with our multi-vendor powerful integrations and optimize your your SOC.

Automated mitigation

Streamline manual investigation and and incident response tasks with automated workflows.
