

unlimited possibilities

Potential Benefits

- 40% - 75% operational cost saving (**Lower TCO**)
- Fast and inexpensive deployment of SAP landscapes (**minutes vs. weeks**)
- Automation provisioning of SAP landscapes to support simple, repeatable Azure infrastructure configurations (**operational innovations**)
- Ability to run all certified SAP database solutions, including S/4 HANA (**Choice**)

Microsoft Azure helps organizations reduce the complexity of managing their SAP landscapes while introducing innovation and cost savings. SAP customers today are looking for the right path forward to assess and adopt SAP S/4 HANA while also considering the best cloud strategy.

SAP and Microsoft have tested and certified Azure infrastructure against the same standards as those used for on-premises infrastructure. Azure offers a low cost and highly scalable deployment option for your SAP workloads.

Increased efficiency

- Reduce overall cost: pay for use, rationalize peaks
- Simplify and reduce operations
- Avoid complex capacity planning

Lower cost

- 40 – 75% TCO Cost Saving
- Minutes instead of weeks
- 60% Less storage costs

Agile provisioning

- Immediate Access to computing resources and applications
- Fast Time to Market / Quicker Time to Value
- Overall improvement on Business Agility

Scenarios

Development and Test

Quick provisioning of development and test environments with the ability to stop the environments any time

Production Environments

Production environments for new customers

Disaster Recovery

Keep environments for recovery purposes without additional cost

Archiving

Archive data and the corresponding SAP systems audit-proof without running costs and always available

Potential Benefits

- Tailored sizing specific to your desired-state landscape
- Knowledge transfer to your SAP Basis team during workshop
- You receive a client specific SAP landscape architecture for Azure

SAP on Azure Discovery Workshop

This one to two day onsite workshop is a great way to have your staff gain deeper insights on the benefits and operational aspects of running SAP on Microsoft Azure infrastructure from our cloud experts. During the workshop our experts perform a detailed assessment of your current IT environment, including SAP landscape and your future IT strategy.

Inputs from Customer

- SAP Early Watch Report/ SAP Quick-sizer Report
- Current hardware specifications (server, storage, network)
- Current software utilization (e.g., OS, DB, SAP, Non-SAP)
- DB Metrics (e.g., DB volume)
- Availability/security needs (Uptime, RPO/RTO, DR, Network)
- Backup/Archival needs

Workshop Agenda

- Discovery Workshop Overview
- Gather details of your SAP Environment
- Educate you on best practices for running SAP on Microsoft Azure
- SAP on Microsoft Azure Systems Architecture Design (sizing, HA/DR/security, performance, networking, automation)
- SAP on Microsoft Azure Migration Strategies
- Q&A and Wrap-up

Workshop Deliverables

- Analysis of existing SAP landscape
- Azure for SAP - opportunities, strategy and current SAP certification status
- Identify use cases for private, public or hybrid cloud scenarios
- Create business case and cost estimation (Azure consumption forecast, Azure migration estimate, SAP on Azure Managed Services estimate)
- Suggested Project Roadmap with Phase 1 Pilot scenario identified
- Define high-level project timelines
- High-level technical approach

unlimited possibilities

SAP HANA on Azure Readiness Workshop

One-to-two day workshop designed to provide a high-level understanding of what would be required in implementing SAP HANA on Azure for your organization and perform a review of the overall readiness and cost potential of migrating your organization to SAP HANA.

Key Deliverables

- Review and propose best seamless migration strategy to support your specific business needs to Azure
- Hardware and sizing recommendations on Azure based on identified long-term business needs
- Comprehensive system readiness review to support SAP HANA migration to Azure
- A high-level project plan including estimated timeline and staffing requirements
- Review of business benefits in justifying SAP HANA on Azure investment
- An estimated total project cost to support the identified migration path for SAP HANA to Azure

Qnovate Differentiator

We have proven experience in SAP implementations and support as well as creating workloads on Microsoft Azure. Our SAP on Azure practice consists of highly experienced basis and infrastructure experts with experience in providing a range of services from assessment to migration to managed services.

- Microsoft Gold Cloud Platform Partner
- SAP Silver Partner
- SAP Services Partner

Business Consulting

- Cloud Transformation Strategy
- Azure Migration Architecture & Roadmap
- Value Engineering: ROI/Business Case development
- Application Governance Assessment

SAP Deployments

- POC/Prototypes
- Active Directory Integration between OnPremise and Azure AD
- Migration for SAP Solutions

Managed Services

- Azure technical support, maintenance and enablement
- Different Service packages based on service levels
- Standardized support and delivery process based on ITIL best practices
- SLA-based management and performance measurement

unlimited possibilities

Qnovate Azure services for SAP

Azure Migration Assessment & Strategy for SAP

Implementation and Deployment of SAP Solutions on Microsoft Azure

Migration of On Premises SAP systems to Azure

SAP Benchmarking on Azure

Integrating Microsoft Dynamics CRM with SAP ERP

Disaster Recovery of SAP to Azure

Hybrid SAP system landscapes configuration

Managed Services: Azure and SAP technical support, maintenance and enablement
