QπAI Agent Hive

An Enterprise Multi-Agent Orchestration & Automation Platform

· Design · Orchestrate · Automate

GUI-based No-Code Platform for Enterprise Agent Development & Deployment

| Agent Design | → | Knowledge Integration | → | Multi Agent Orchestration | → | Evaluation & Testing | → | Deployment & Monitoring |

Supported Integrations & Differentiated Features

Task Decomposition & Intelligent Routing

Automatically splits complex tasks and routes them to the best-suited agents—enabling faster execution and efficient multi-agent coordination.

Cross-Agent Collaboration

Agents communicate and share memory in real time—solving problems collectively without hardcoded dependencies or manual coordination.
Memory Graph Visualization

Persistent, interactive memory graph that tracks entities and timelines—maintaining context across sessions for personalized, long-term agent reasoning.

Composable Agent Tools

Turn any workflow component into a reusable tool with dynamic discovery—enabling modular, scalable, and faster agent-based development.

MCP Tool Integration

Connect securely to 50+ tools using native Model Control Protocol—ensuring governed access, auditability, and enterprise-grade compliance.

Self-Improving Agent Framework

Agents optimize through continuous feedback and evaluation—improving over time with zero manual tuning.

Flexible Deployment Options

QpiAI Pro supports enterprise on-premise, hybrid public clouds - bring your own cloud, and managed SaaS deployments.

Key Product Highlights

✨ **Multi-Agent Orchestration Platform**
Coordinate specialized agents with intelligent routing and seamless collaboration.

✨ **Contextual Intelligence**
Persistent memory enables pattern recognition and personalized experiences.

✨ **Unified No Code GUI**
Design agent workflows with drag-and-drop—no coding required.

✨ **Enterprise Security & Compliance**
Granular permissions and audit trails ensure automated policy enforcement.

✨ **Centralized Knowledge Discovery**
Connect data sources with autonomous processing for informed agents.

✨ **Self-Improving Agents**
Automatically optimize performance through analysis—evolving capabilities without intervention.

About the Company

QpiAI is a deep-tech startup vertically integrating AI and quantum technology to provide the next-generation of extreme modeling, compute, and automation. We enable enterprises to maximize the first-mover advantage in quantum & AI adoption by providing value-based solutions today and a roadmap for seamless technology transition in the future.
