The first step towards cybersecurity resilience

Assess your organization's current cybersecurity status in just two hours using this free Self-Service Cybersecurity Assessment and receive prioritized recommendations to take the right remedial actions. It is the indispensable first step in protecting your organization from cyber-attacks in a targeted and efficient way. It bolsters your understanding of cybersecurity vulnerabilities and business risks.
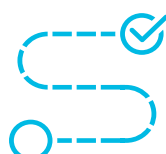

Discover the benefits

While the landscape of cybersecurity can seem vast and intricate, having the right tools and knowledge can make all the difference. Our Self-Service Cybersecurity Assessment is designed to be that guiding compass, offering a holistic overview and actionable insights tailored to your unique needs.

Here's how this assessment can be a game-changer for your organization:

Know your threats:
Get a clear view of potential risks to your organization, helping you better protect against them.

Step-by-step guide:
A simple guide to begin your cybersecurity journey.

No cost, big value:
The assessment is offered free and it requires only two hours of your time.

Best for when you need to...

- Learn more about potential cybersecurity threats and business risks in your hybrid IT environment

- Quickly determine your organization's current cybersecurity status

- Review the secure configuration of your Microsoft Cloud environment

60% of small and midsized businesses that fall victim to a cybersecurity incident go out of business within six months.
