

Microsoft
Solution Partner

Process Automation Partners

QServices is a premier software and mobile application development firm, specializing in process automation and digital transformation for small and medium-sized businesses (SMBs). As a Microsoft Certified company, QServices leverages cutting-edge technologies, including Microsoft Azure, Dynamics 365 CRM, Power Automate, and Generative AI, to deliver tailor-made solutions that enhance customer experience and operational efficiency.

Services

a. Software Solutions

1 AI Chatbot Development

We provide top-tier talent to fill skill gaps and drive project success. E.g. Copilot Studio.

2 Mobile App Development

Create innovative mobile applications that give your business a competitive edge. E.g. Power Apps.

3 Custom Software Development

We craft tailored software solutions to meet your unique business needs. E.g. Power Pages.

4 Cloud Computing

Enhance your operations with scalable and secure cloud services. We have established numerous Azure Cloud platforms.

5 Data Analytics

Transform data into actionable insights for smarter decision-making. We have enabled Power BI workflows.

6 Low Code / No Code Solutions

Enable teams to swiftly develop and deploy applications with minimal coding using intuitive low code/no code platforms. E.g. Power Platform.

7 Process automation

We have Streamlined and optimize business processes across organization to save time and focus with our Power automate solutions

b. Business Application

1 Sales

We automate sales processes, track leads, integrate with HubSpot, and prioritize deals to boost efficiency.

2 Marketing

Automate email campaigns, personalize messages, nurture leads, and track performance to enhance engagement.

3 HR

We manage employee data, track performance, provide insights, and streamline HR operations for better efficiency.

4 CRM

We centralize customer data, automate tasks, manage support, and enhance customer satisfaction for seamless operations.

c. Managed Services

Licensing : Our model that allows customers to bring their own licenses for certain software deployed on Azure infrastructure.

Cloud Migration: Azure Database Migration Service currently we offer : Database Migration Service – via Azure SQL

IT Consultation: Since 2014, QServices has been a reliable partner to over 1,300 clients, driving digital transformation, implementing innovative software

Engagement Models

Extended Team Model

Integrate our experts with your in-house team for extended capabilities and collaboration.

Per Day Model

We provide top-tier talent to fill skill gaps and drive project success on per day basis.

Project Highlights

1 Nuworkz

Industry: Finance

Nuworkz is an all-in-one solution that simplifies the complex task of creating financial reports.

2 T-Plus Payment Solution

Industry: Finance

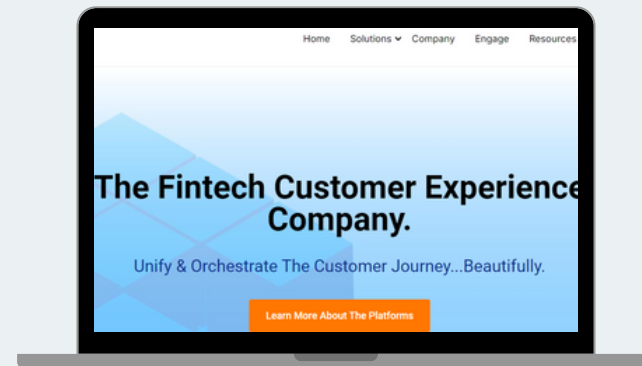

The T-Plus Payment Mobile Application streamlines customers financial transactions, providing a secure and efficient way to manage their money, pay bills, and make purchases.

3 LoanCIRRUS

Industry: Finance

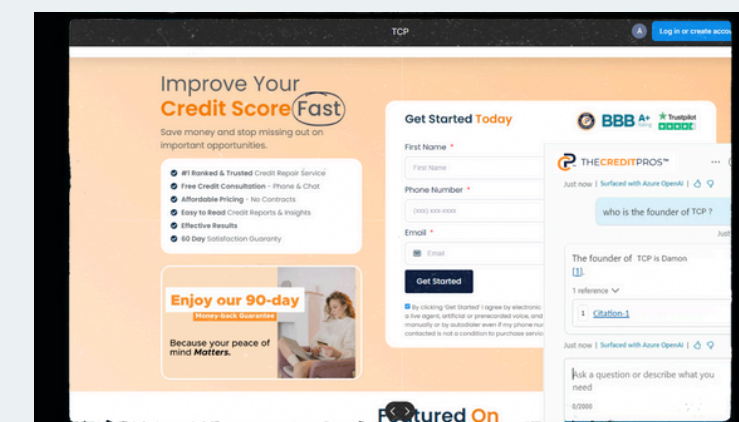

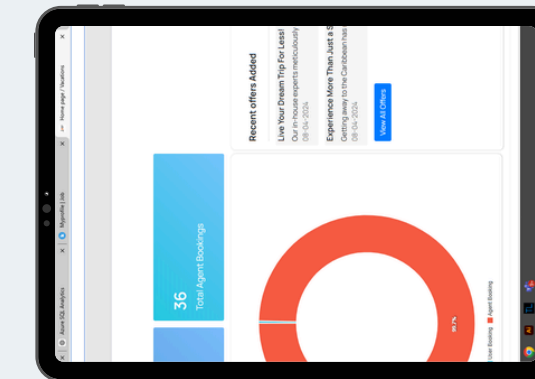

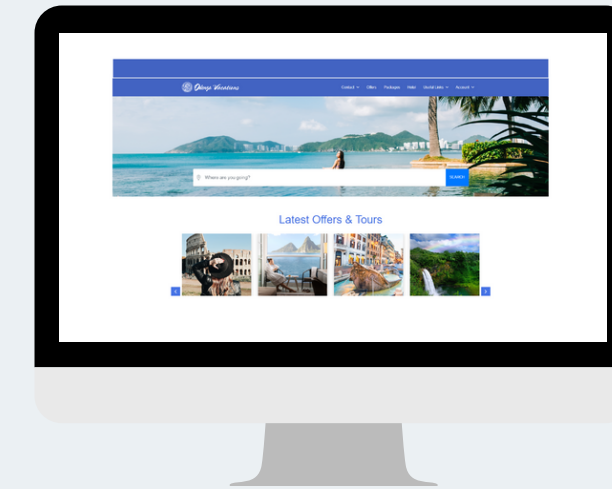

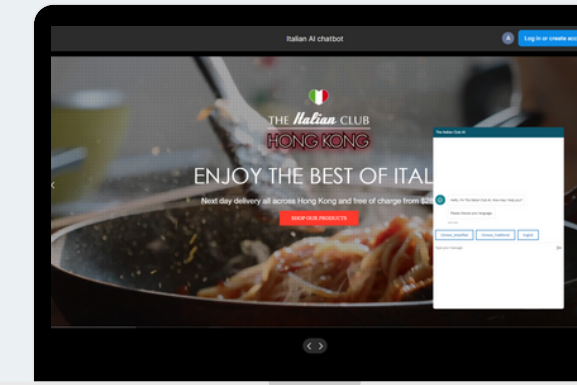

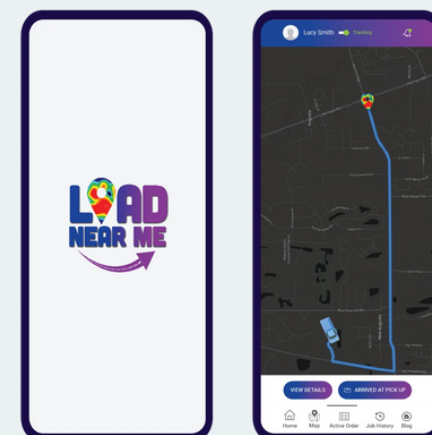

LoanCIRRUS is a white labelled solution which help financial institution to automate the lending.

4 Load near me

Industry: Logistics

Load Near Me is a web and mobile application platform that manages the important interfaces of the platform and facilitates the trucking business process.

5 The Italian AI Chatbot

Industry: E-commerce

The Italian AI Chatbot project aims to transform how businesses manage customer inquiries by automating the process with intelligent chatbot technology.

6 Odenza Vacations

Industry: Travel and Hospitality

An AI-powered platform that simplifies the process of finding and reviewing properties, with a browser extension for seamless access.

7 Melegacy AI Chatbot

Industry: Finance

Melegacy AI is a sophisticated chatbot developed using Copilot Studio, designed to assist users in managing their investments and legacies seamlessly.

8 The Credit Pros

Industry: Finance

The TCP Copilot Studio Bot is a sophisticated AI-driven assistant designed to provide users with accurate information and support.

Project Brief

1 Nuworkz

Industry: Finance

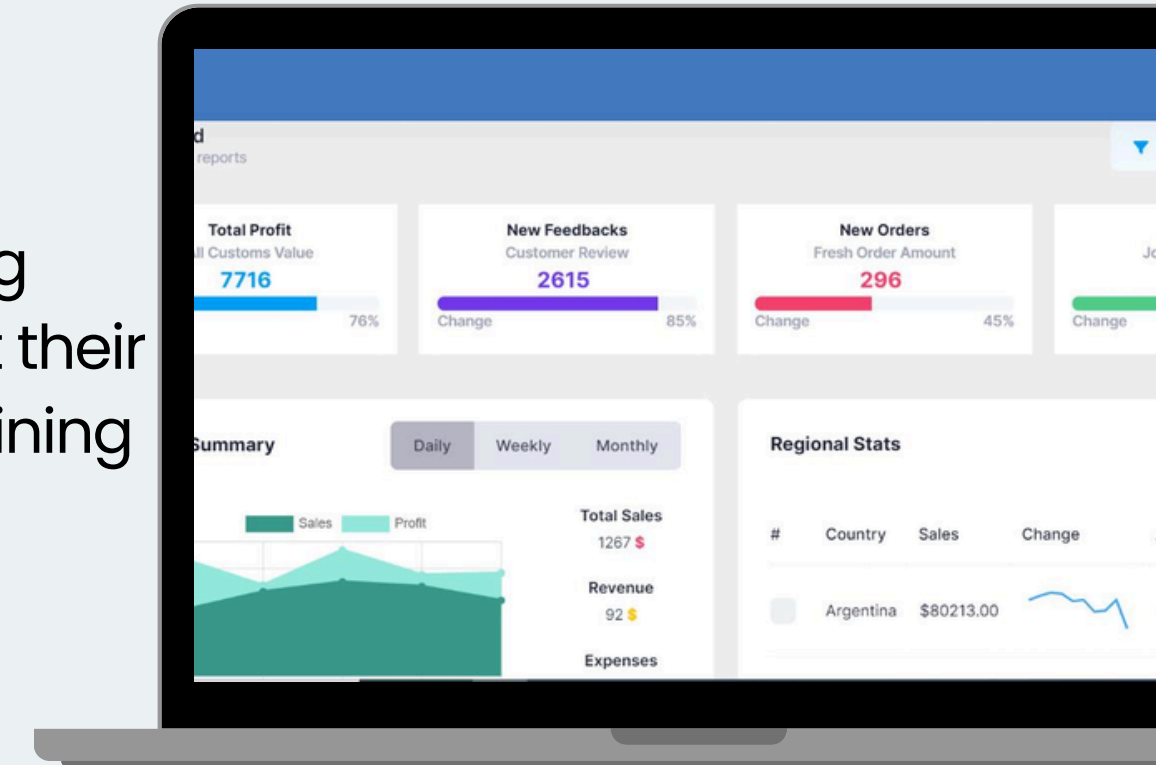

A versatile software tool designed to simplify the often-complex process of creating financial reports. With Nuworkz, businesses can effortlessly tailor their reports to suit their unique needs, integrating effortlessly with existing accounting applications and gaining valuable insights into their financial health in real-time.

Clients Pain Points –

- Manual and time-consuming financial reporting processes
- Difficulties in customizing reports to meet specific needs.
- Limited access to real-time financial data.
- Challenges in integrating various accounting systems.

Our Solution –

- **Accessibility:** Nuworkz is often cloud-based, allowing users to access their financial data from anywhere with an internet connection. This is particularly valuable for remote work, collaboration among teams, and on-the-go tasks.
- **Real-time Data:** Nuworkz provides real-time updates, giving users immediate access to the most current financial information. This enables faster decision-making and better insight into the company's financial health.

T-Plus Payment Solution

Industry: Finance

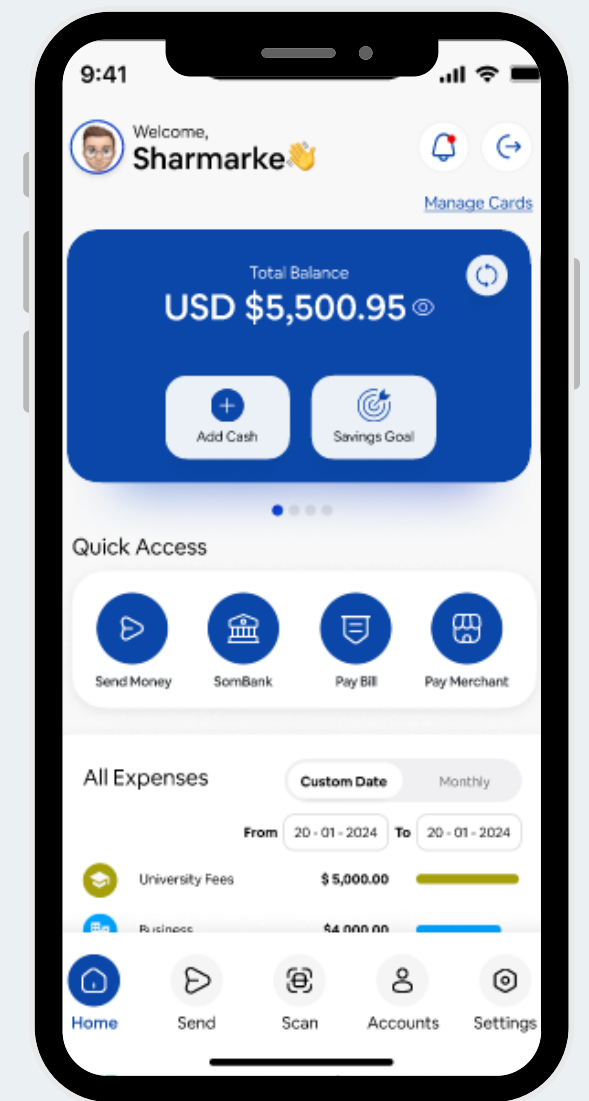

The T-Plus Payment Mobile Application streamlines customers financial transactions, providing a secure and efficient way to manage their money, pay bills, and make purchases. T-Plus offers a comprehensive feature to meet all financial needs. With support for various payment methods, instant transfers, and robust security features like –Adding Payment Methods, Making Transactions, Expense Tracking and Management,

Clients Pain Points –

- **Complex Registration and Login Process:** Lengthy and complicated registration or login process can frustrate users.
- **Poor User Interface and Experience:** A cluttered or unintuitive interface can make it difficult for users to navigate the app.
- **Transaction Failures:** Failed transactions can lead to frustration and loss of trust in the app.

Our Solution –

To overcome the challenges in developing the T-Plus Payment mobile application, our developers should implement strong encryption and secure coding practices for security, utilize well-documented APIs for seamless payment gateway integration, and balance user convenience with robust multi-factor authentication.

LoanCIRRUS

Industry: Finance

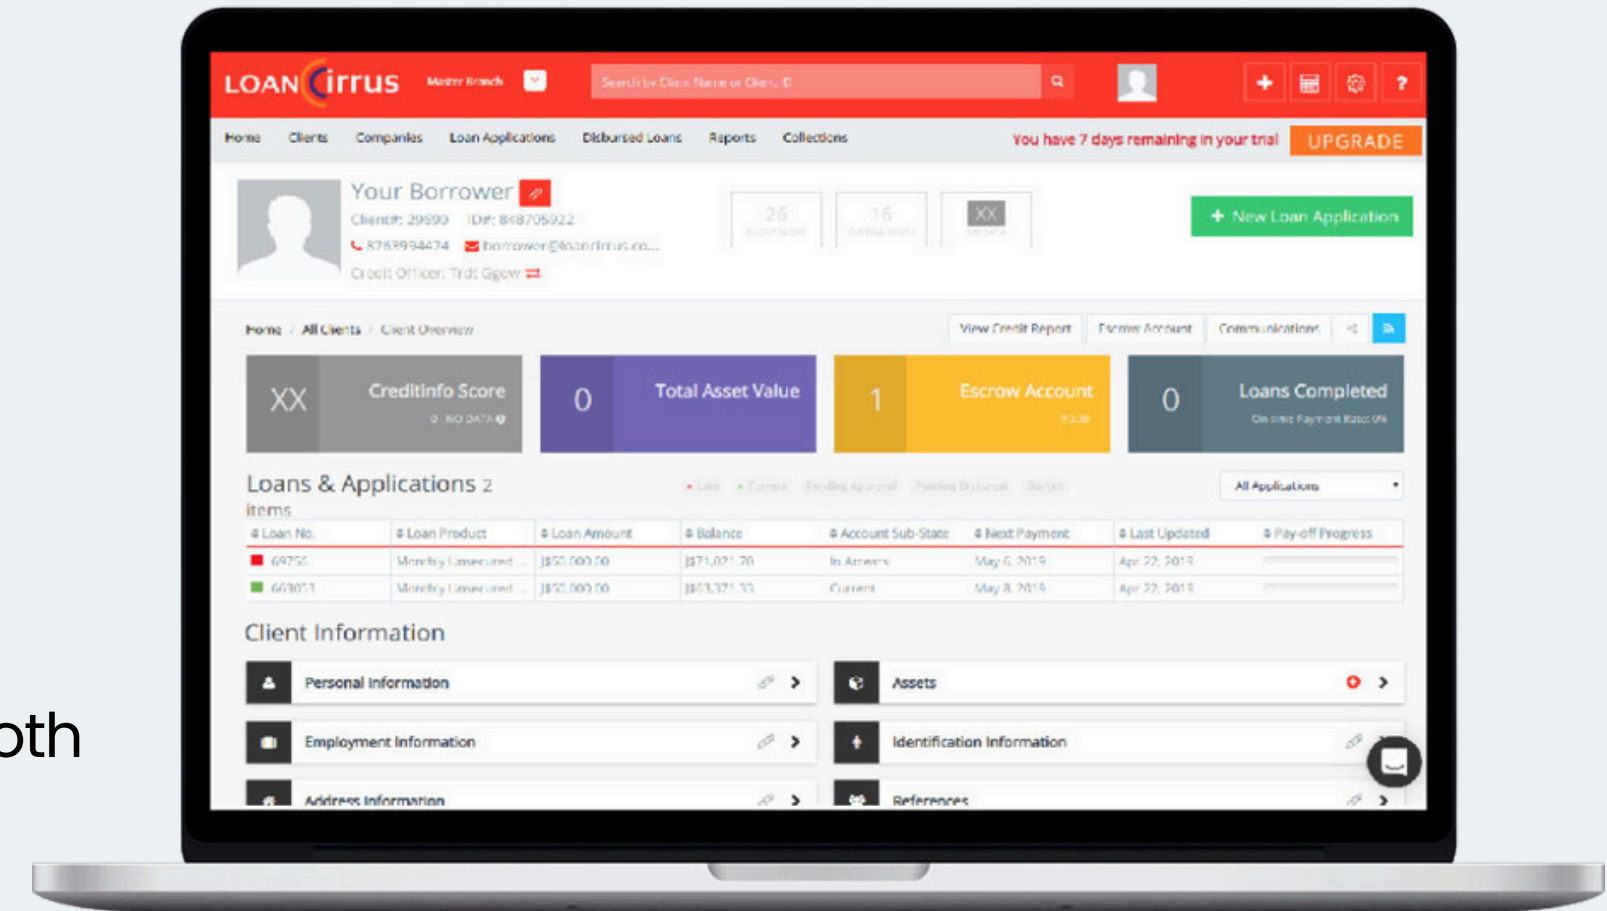

LoanCIRRUS is a SAAS based digital lending platform for lenders of all types, including consumer finance businesses, digital banks, credit unions, microfinance institutions, and others. The platform supports both in-branch and online borrower onboarding.

Clients Pain Points –

- Stable Digital Platform
- Streamline Approval process from different modules

Our Solutions –

- It is the best paperless way to apply for applications like Auto Loans, Credit Cards etc.
- More and more R and D is done to fix bugs related to application workflow

4 Load Near Me

Industry: Logistics

An integrated solution for enhancing operational efficiency and user experience for dispatchers and drivers.

Clients Pain Points –

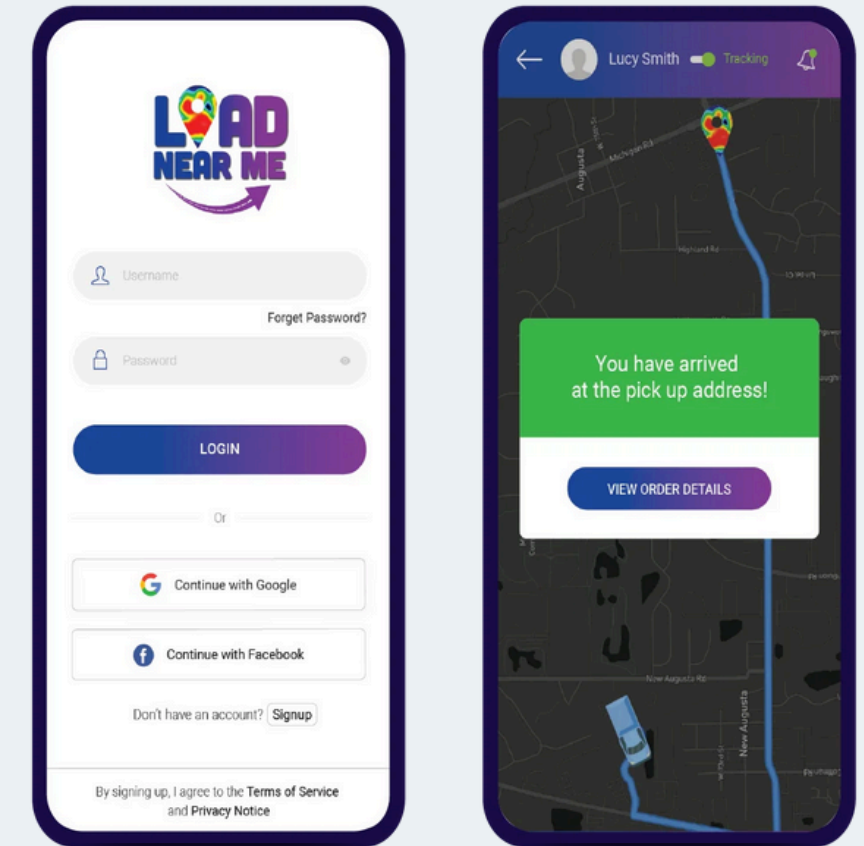

The Client faced several challenges:

- Users often struggled with a slow and confusing interface, leading to frustration and lost time.
- Lack of communication resulted in difficulties for customers in obtaining up-to-date information on their shipments.
- Drivers weren't always given timely updates or instructions, leading to confusion and poor coordination.

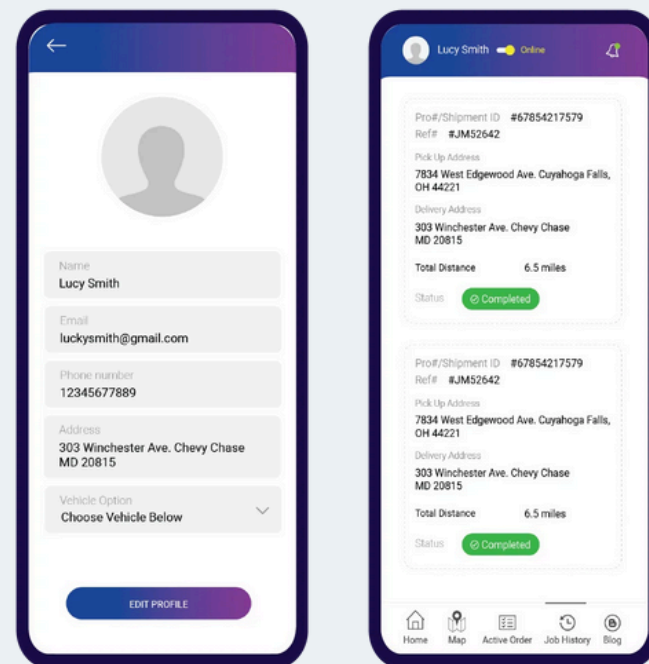

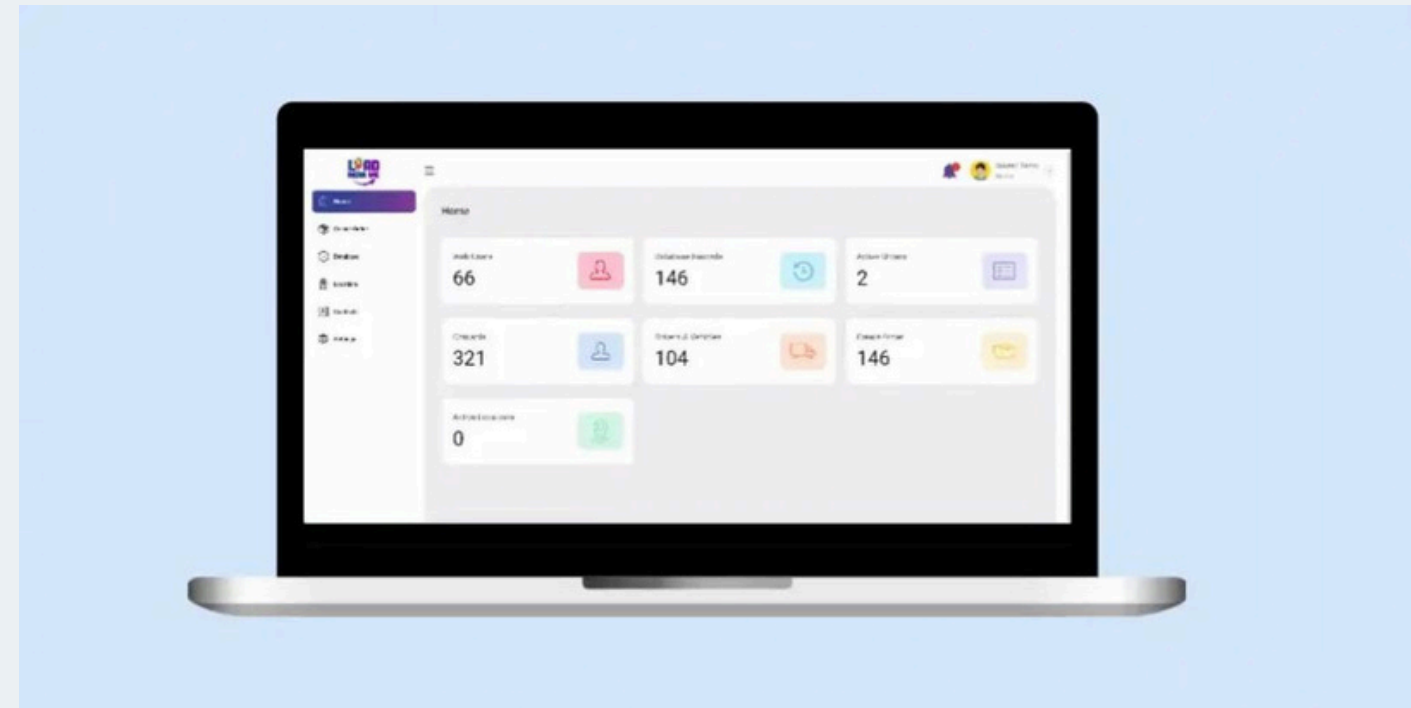

Our Solution –

We implemented Microsoft Dynamics 365 CRM and provided comprehensive solutions including:

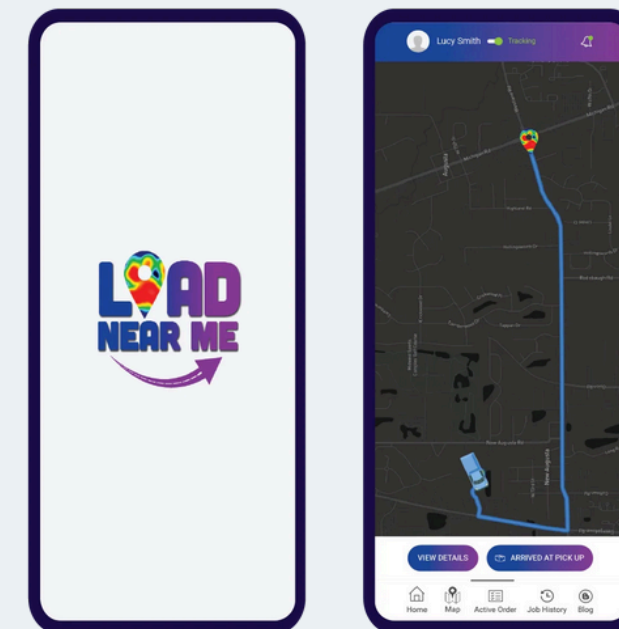

- **Centralized data management** using Dynamics 365 to create a single source of truth.
- **Real-time mobile access** via the Dynamics mobile CRM for seamless communication among all parties.
- **Timely automated notifications** through Dynamics 365 to reduce delays and miscommunications.
- **Integrated analytics tools** with Power BI, connected to Dynamics 365, for actionable insights into operational performance.

7 Melegacy AI Chatbot

Industry: Finance

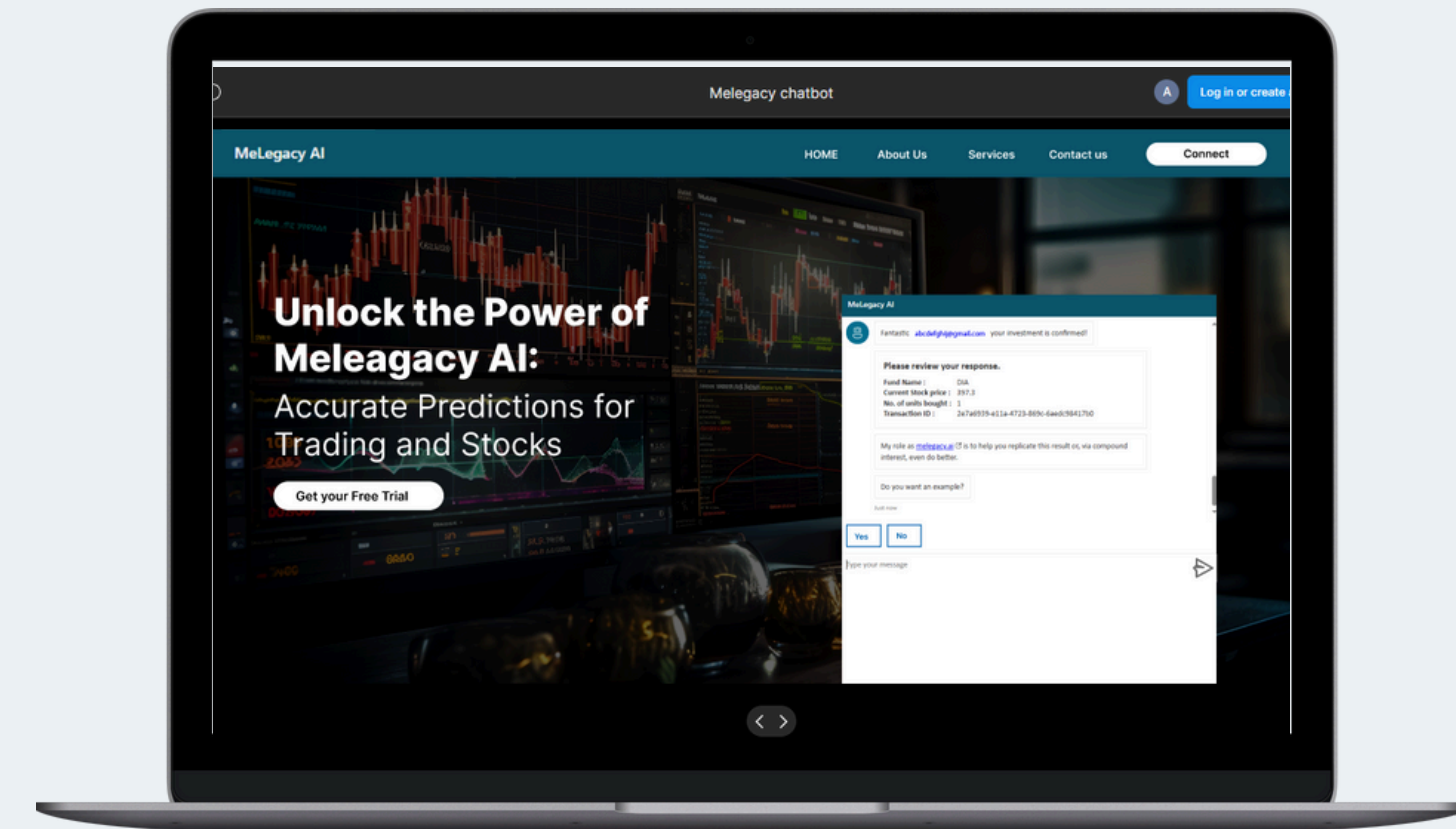

Melegacy AI is a sophisticated chatbot developed using Copilot Studio, designed to assist users in managing their investments and legacies seamlessly. This chatbot offers a range of features from buying stocks and predicting stock performance to sharing legacy information and performing charitable activities. With Melegacy AI, you gain a comprehensive tool for both financial management and personal legacy planning.

Clients Pain Points –

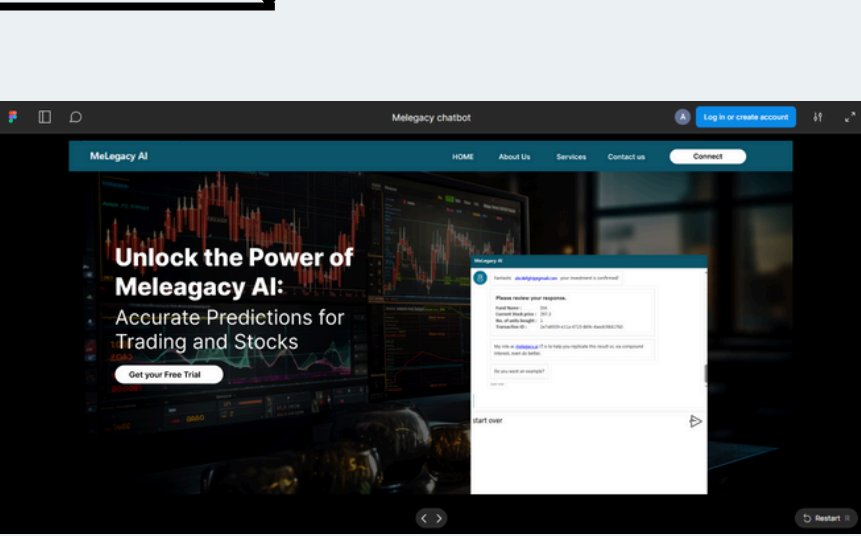

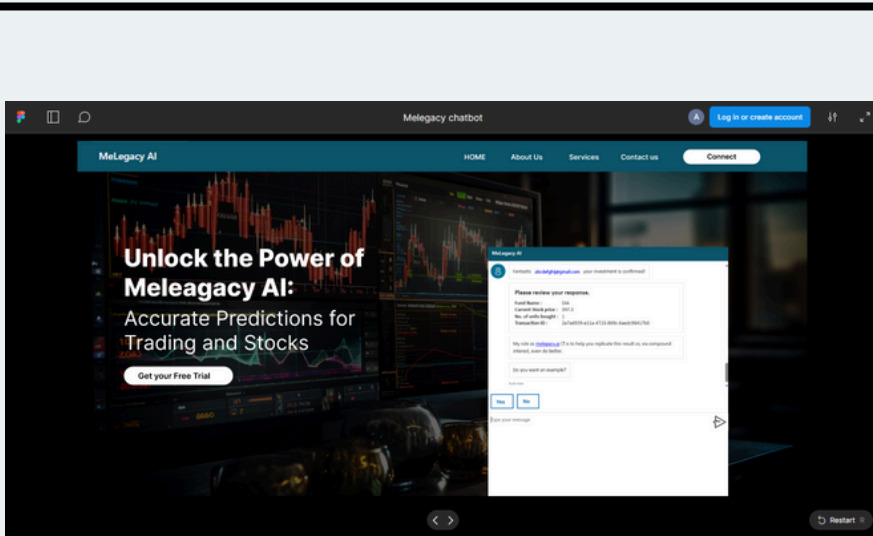

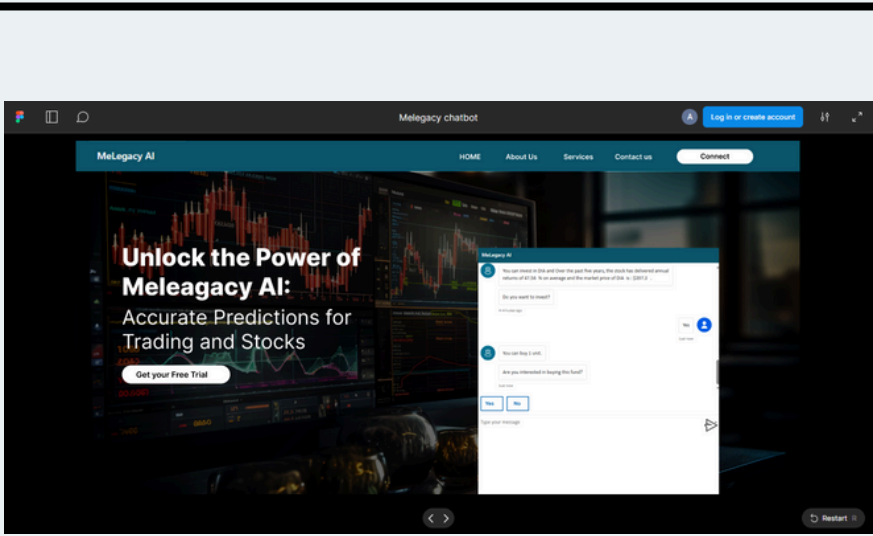

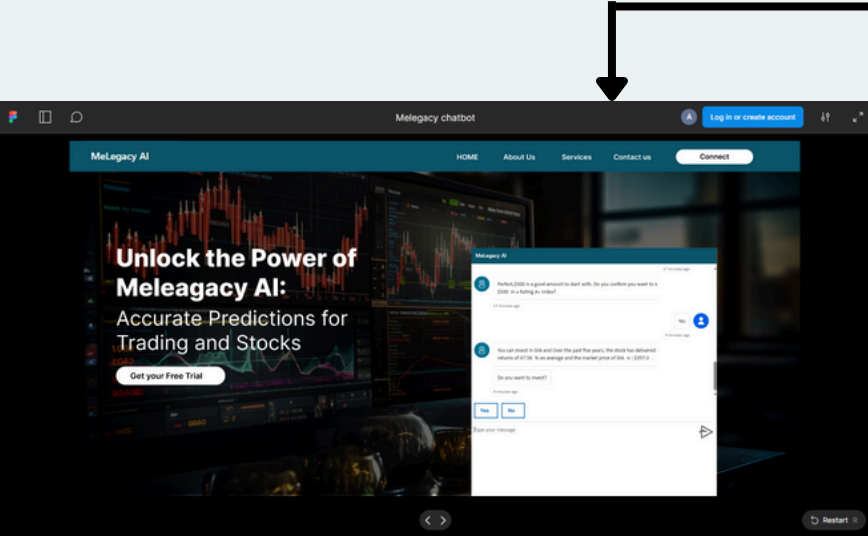

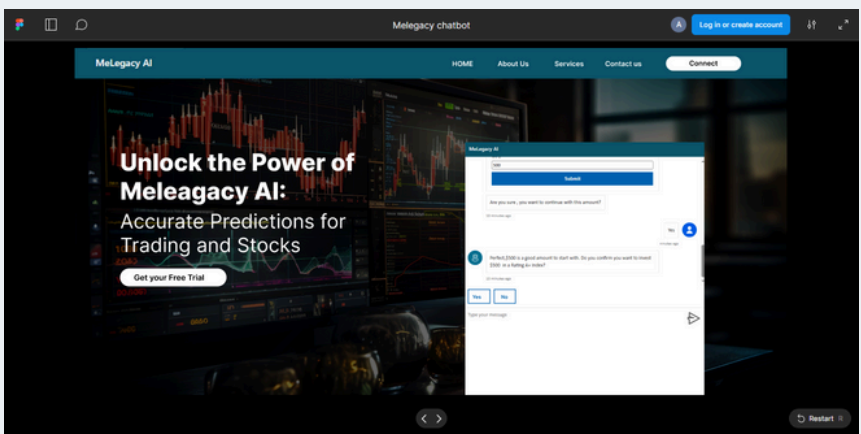

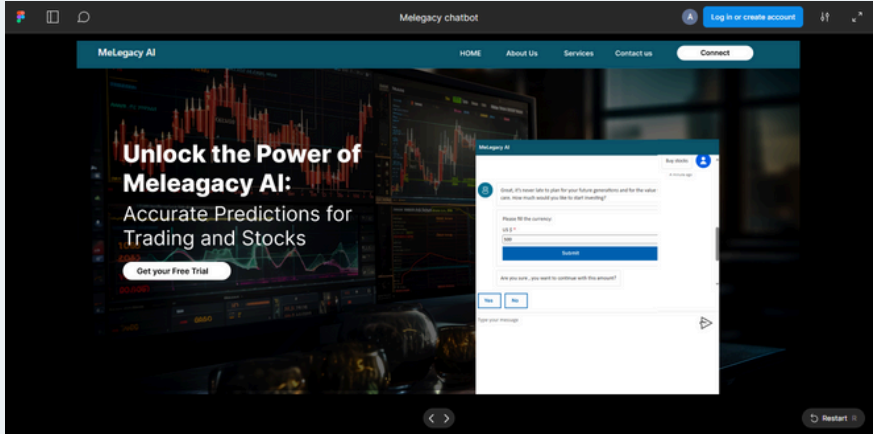

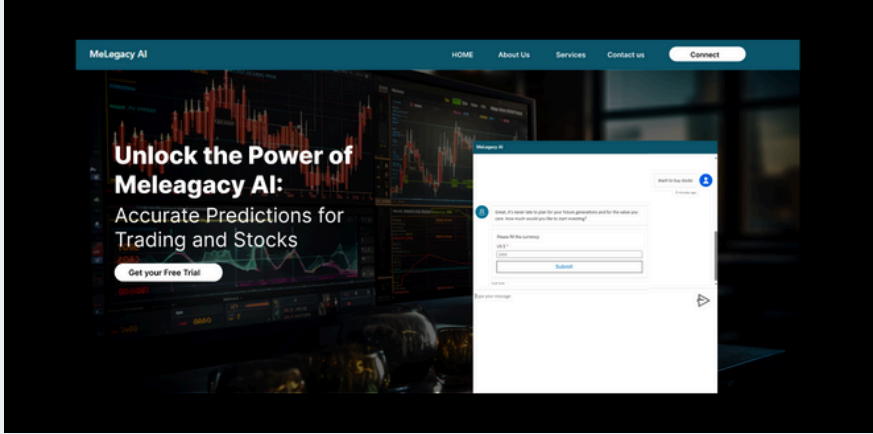

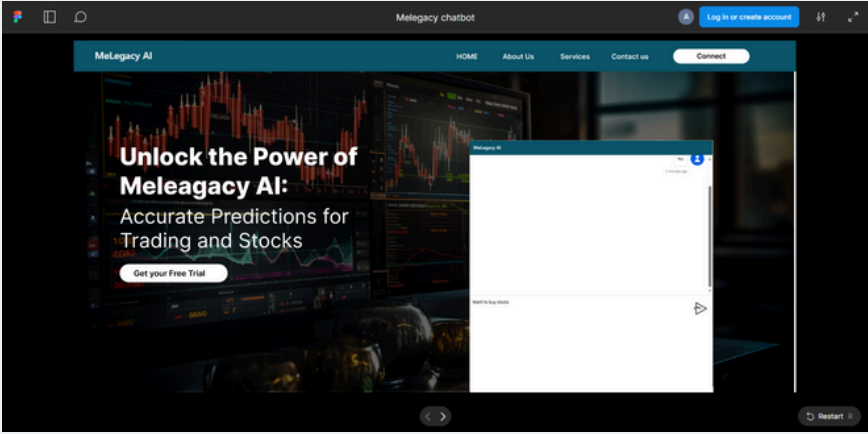

- Managing investments and legacy information.
- Accurate stock predictions

Our Solution –

- Melegacy AI focused on creating an intuitive chatbot that effectively manages user investments and legacy information.
- Rigorous testing and feedback loops were employed to refine the chatbot's functionality and performance.

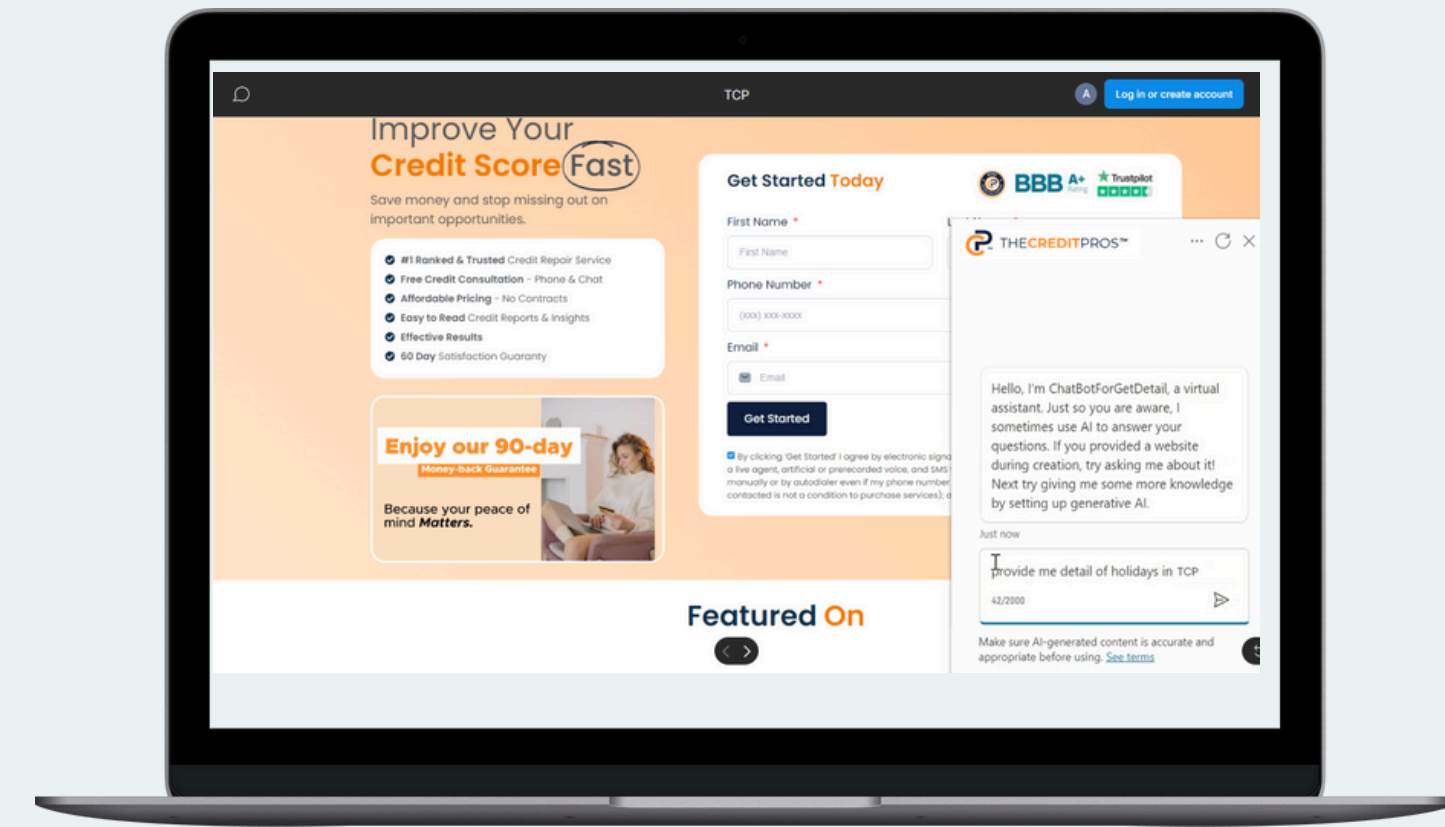

Melegacy Chat Bot in Action - https://www.figma.com/proto/gQphms1XkezeLOzbn3VJip/Melegacy_chatbot?node-id=0-1&t=LCadlzksTDhzTjSE-1

The Credit Pros

Industry: Finance

The TCP Copilot Studio Bot is a sophisticated AI-driven assistant designed to provide users with accurate information and support. Using Azure AI Studio and Azure AI Search, the bot processes user queries and retrieves answers from a vast repository of uploaded documents. Additionally, the GPT-4o model API is utilized to handle more general questions, ensuring comprehensive assistance. Users interact with the bot by sending messages and receiving relevant answers seamlessly.

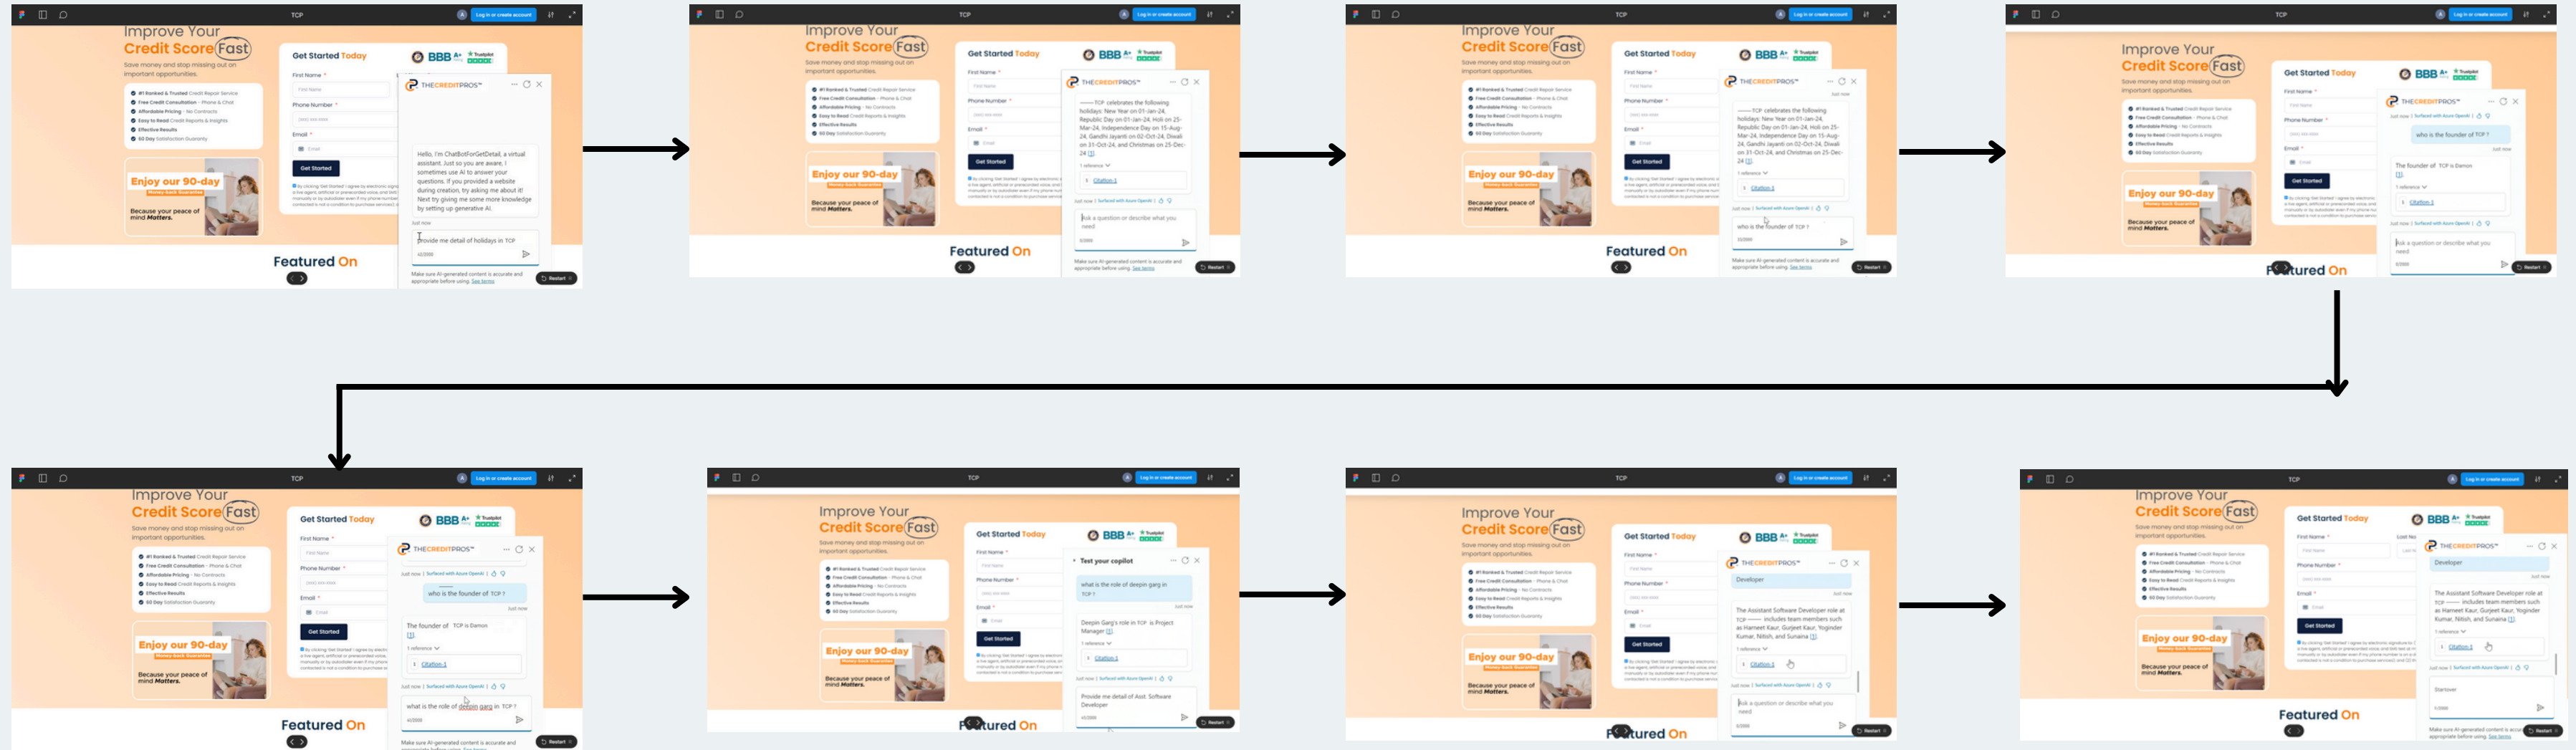

Clients Pain Points –

- AI assistant capable of handling user queries
- Accurate responses to both specific document-based queries

Our Solution –

- The TCP Copilot Studio Bot successfully delivered a powerful AI-driven assistant capable of handling a broad range of queries with high accuracy and efficiency.
- The bot's real-time capabilities and advanced content moderation ensured a reliable and user-friendly experience

Industries We Serve

Food & Beverage

Streamline supply chain and inventory management with advanced software solutions.

BFSI

Develop secure and innovative fintech applications to enhance customer experience and regulatory compliance.

Travel & Tourism

Create seamless booking systems and enhance customer engagement through digital platforms.

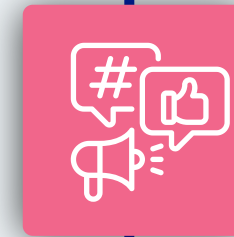

Energy & Oil & Gas

Implement predictive maintenance and optimize supply chain operations with AI-driven technologies.

E-Commerce

Boost online sales with robust, user-friendly e-commerce platforms and mobile applications.

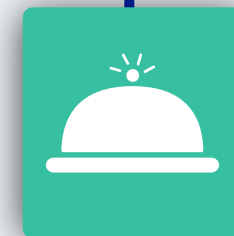

Media & Social

Streamline supply chain and inventory management with advanced software solutions.

Healthcare

Improve patient care with advanced mobile EHR solutions and healthcare analytics applications.

Hospitality

Enhance guest experiences with AI-powered booking and comprehensive management apps.

Education

Develop e-learning platforms and educational tools to support digital learning.

Real Estate

Simplify property management and client engagement with AI-powered platforms.

Technology

Mobile Development

Our mobile development service specializes in creating seamless mobile applications that enhance user experience and provide businesses with a competitive edge.

Frontend Development

We create visually stunning, user-friendly interfaces for websites and web applications.

Backend Development

Our backend development services offer robust and scalable server-side applications that power seamless interactions between the frontend and backend.

Microsoft Power Platform

Empower your business with Microsoft Power Platform, an integrated suite of tools:

- **Power BI:** Create interactive reports, dashboards, and data visualizations for informed decision-making.
- **Power Apps:** Quickly develop custom applications with low-code development, suitable for mobile apps, web apps, and forms.
- **Power Automate:** Automate workflows across applications and services to streamline processes and reduce manual tasks.
- **Power Virtual Agents:** Develop AI-powered chatbots to efficiently handle customer inquiries and automate responses.

Microsoft Azure Technologies

- App Services
- SQL server – MSSQL & MySQL
- Virtual Machine
- Azure Blob Storage
- Key Vault
- Azure Bot
- Microsoft Azure Devops

Advanced AI Solutions

- **AI Chatbot Development:** Build intelligent chatbots that enhance customer interaction and automate tasks effectively.
- **MS Copilot:** Integrate Copilot capabilities for real-time decision support and task automation.

Dynamics 365

Enhance business operations and customer relationships with Dynamics 365's comprehensive suite of ERP and CRM applications.

Azure AI

Create innovative solutions using machine learning, natural language processing (NLP), computer vision, and more.

20
