

QServices:

Leading Financial Efficiency
& Cost Optimization

www.qservicesit.com

Introduction

Welcome to QServices!

QServices is a premier software and mobile application development firm, specializing in process automation and digital transformation for small and medium-sized businesses (SMBs). As a Microsoft Certified company, QServices leverages cutting-edge technologies, including Microsoft Azure, Dynamics 365 CRM, Power Automate, and Generative AI, to deliver tailor-made solutions that enhance customer experience and operational efficiency.

Services

a. Resource Augmentation

1 IT Staffing

We provide top-tier talent to fill skill gaps and drive project success.

2 Project Management

Ensure your projects are delivered on time and within budget.

3 Technical Support

Maintain and optimize your IT infrastructure with our comprehensive support.

b. Software Solutions

1 AI Chatbot Development

We provide top-tier talent to fill skill gaps and drive project success.

2 Mobile App Development

Create innovative mobile applications that give your business a competitive edge.

3 Custom Software Development

We craft tailored software solutions to meet your unique business needs.

4 Cloud Computing

Enhance your operations with scalable and secure cloud services.

5 Data Analytics

Transform data into actionable insights for smarter decision-making.

6 Low Code / No Code Solutions

Enable teams to swiftly develop and deploy applications with minimal coding using intuitive low code/no code platforms.

Engagement Models

Extended Team Model

Integrate our experts with your in-house team for extended capabilities and collaboration.

Case Study - 1

Loan Cirrus

Project Overview: Loan Cirrus is designed to streamline and enhance the lending process, leveraging advanced technology to provide a seamless experience for both borrowers and lenders.

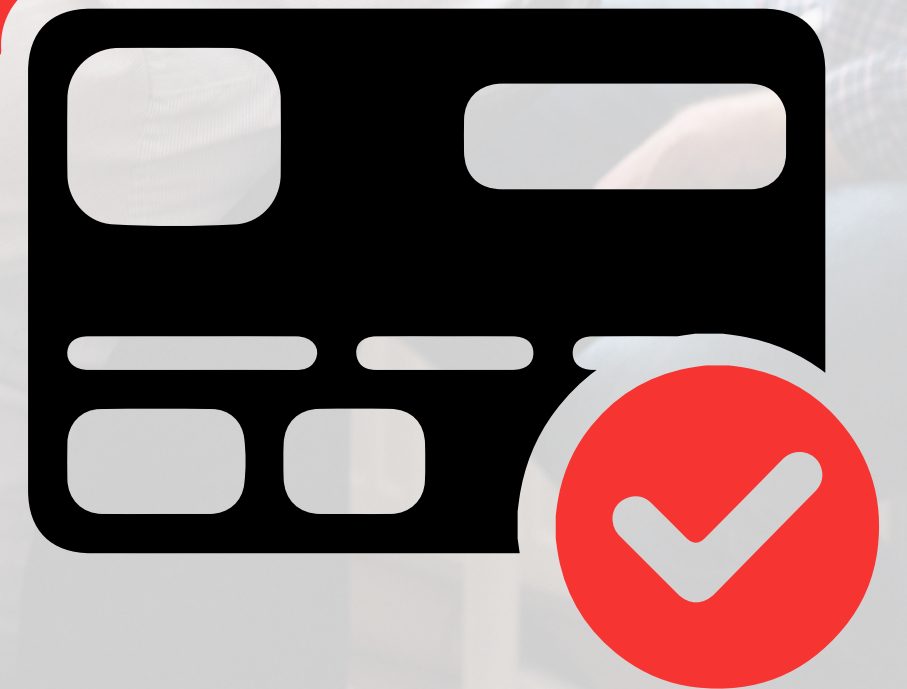

Case Study: <https://www.qservicesit.com/loancirrus>

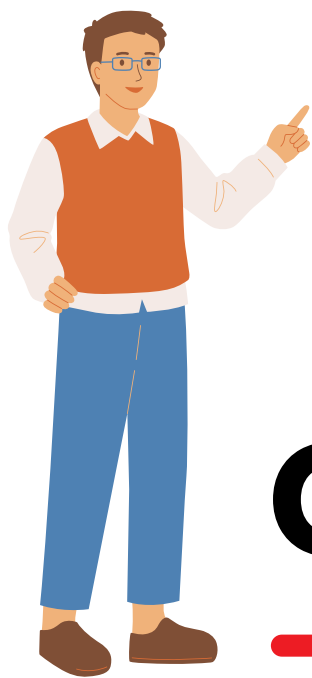

Developing a Secure Payment Gateway

LoanCIRRUS

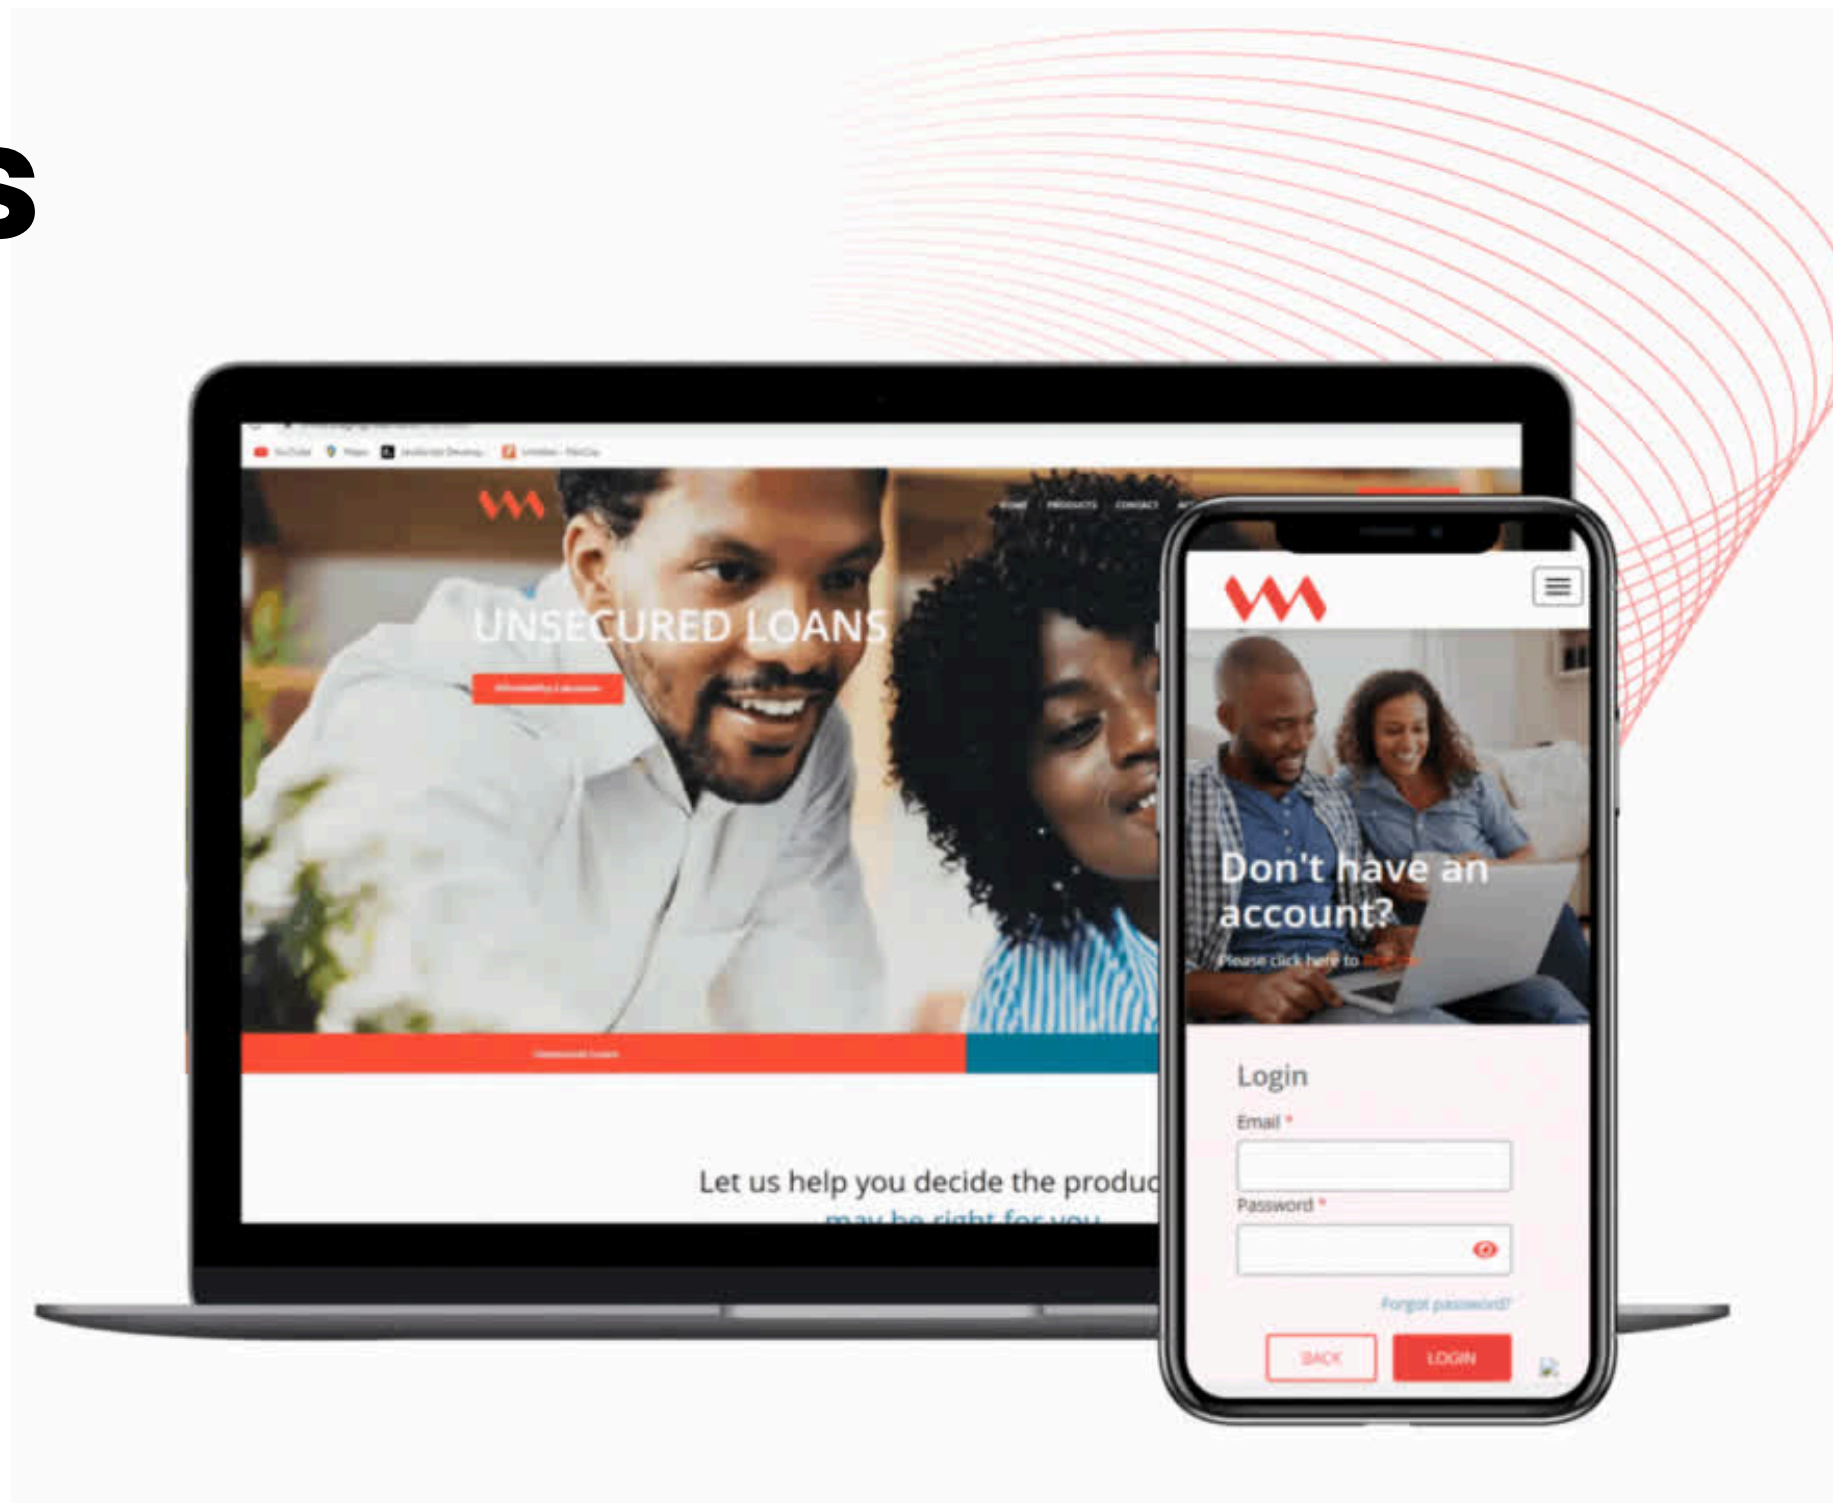

LoanCIRRUS represents a modern financial companion, reimagining the lending experience. It offers tailored loan solutions aligned with clients' goals and dreams. The platform facilitates fast processing, affordable payments, and expert guidance, making the financial journey seamless, accessible, and filled with opportunity.

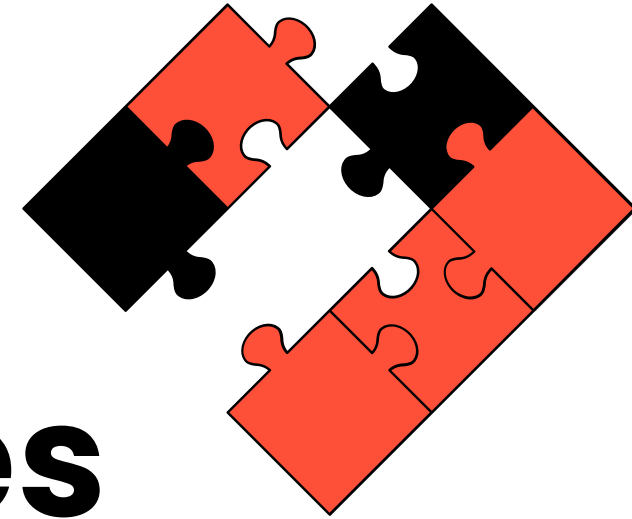

Client Requirements

Client needs stemmed from the challenges faced by borrowers and lenders in the lending journey. Borrowers sought a simplified loan application process, greater clarity in application status, and the ability to compare loan products and rates easily. Lenders grappled with manual processes, compliance issues, and the demand for robust analytics. The response was the LoanCirrus platform, designed to automate the borrower's journey and empower lenders with enhanced decision-making capabilities.

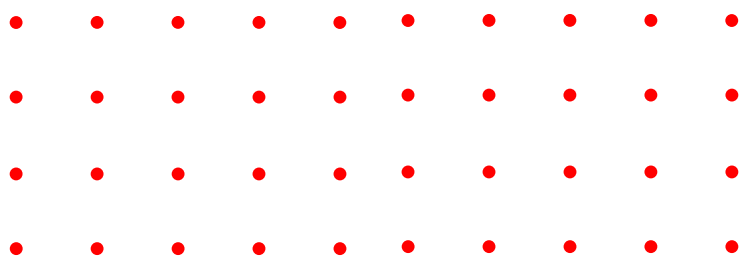

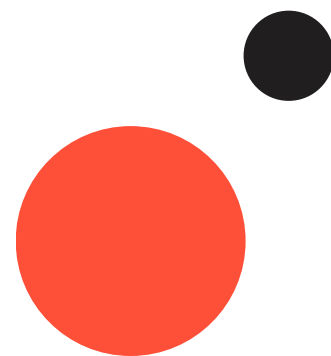

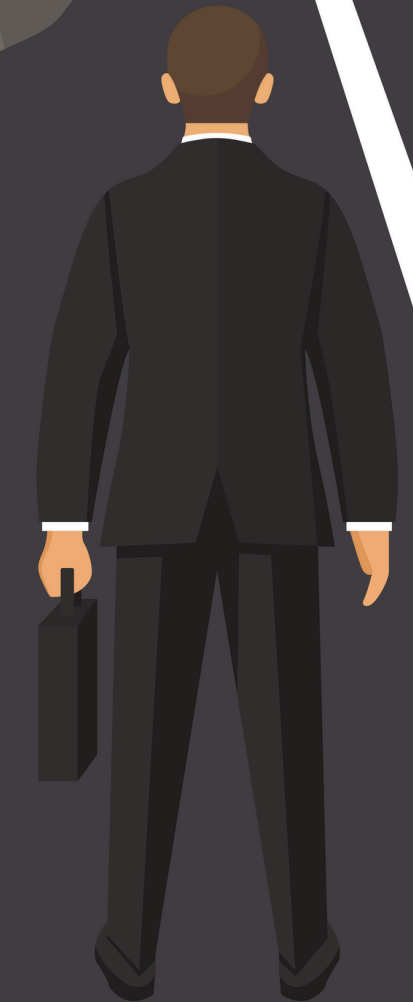

Challenges

The journey encountered technical, design, regulatory, and organizational challenges. Technical hurdles included integration with legacy systems. Design focused on creating user-friendly steps for borrowers and lenders. Regulatory compliance was pivotal, and organizational alignment was crucial.

Our Journey

For Borrowers:

The journey involved a deep exploration of loan types, the design of a comprehensive platform, the crafting of a borrower portal, integration with credit bureaus and core banking systems, and the implementation of robust security measures.

For Lenders:

The journey began with an understanding of lender needs, followed by the build phase, testing, and deployment. A user-friendly borrower portal was created, integrating with credit bureaus and banking systems, a decision engine was developed, and security controls were established.

Tech Stack

LoanCirrus leverages a tech stack that includes Angular and Laravel for front-end and back-end development, respectively. It integrates seamlessly with credit bureaus, core banking systems, and utilizes AWS for hosting cloud infrastructure.

Figma

Angular

My SQL

Adobe XD

Amazon Web
Services

Laravel

Results

LoanCIRRUS has revolutionized lending operations. Lenders now experience faster loan processing, higher approval rates, lower loan costs, and quicker product launches. Borrowers benefit from simplified applications, faster decisions, 24/7 access, and increased satisfaction. These transformations result in a 50% portfolio growth for businesses, reduced fraud losses, regulatory compliance, and informed strategies.

Nuworkz

A Tool For Modernizing Financial Reporting For businesses.

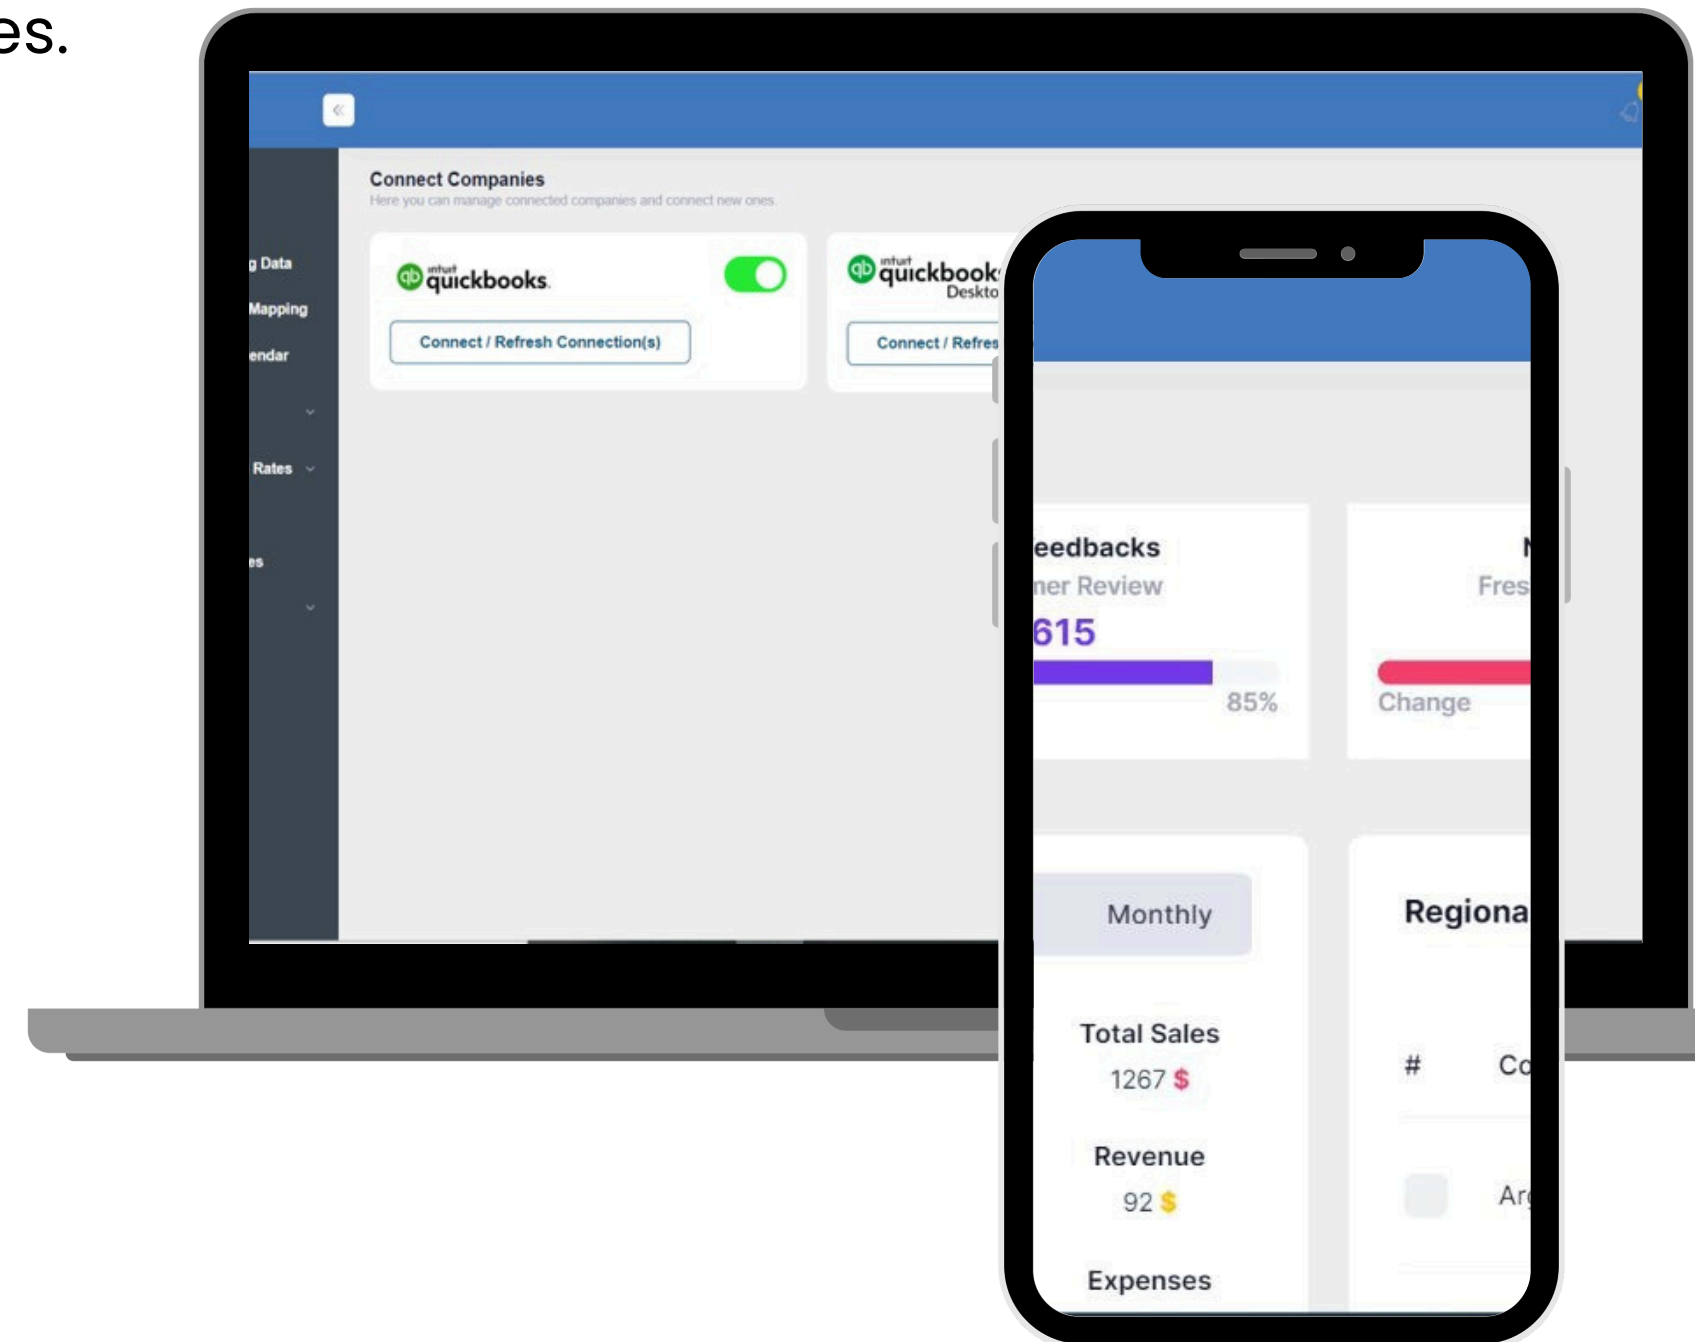

Project Overview: A versatile software tool designed to simplify the often-complex process of creating financial reports. With Nuworkz, businesses can effortlessly tailor their reports to suit their unique needs, integrating effortlessly with existing accounting applications and gaining valuable insights into their financial health in real-time.

Case Study: <https://www.qservicesit.com/nuworkz>

Client Requirements

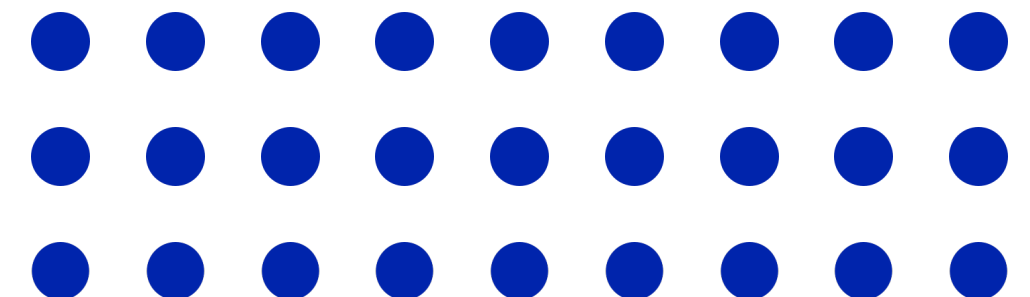

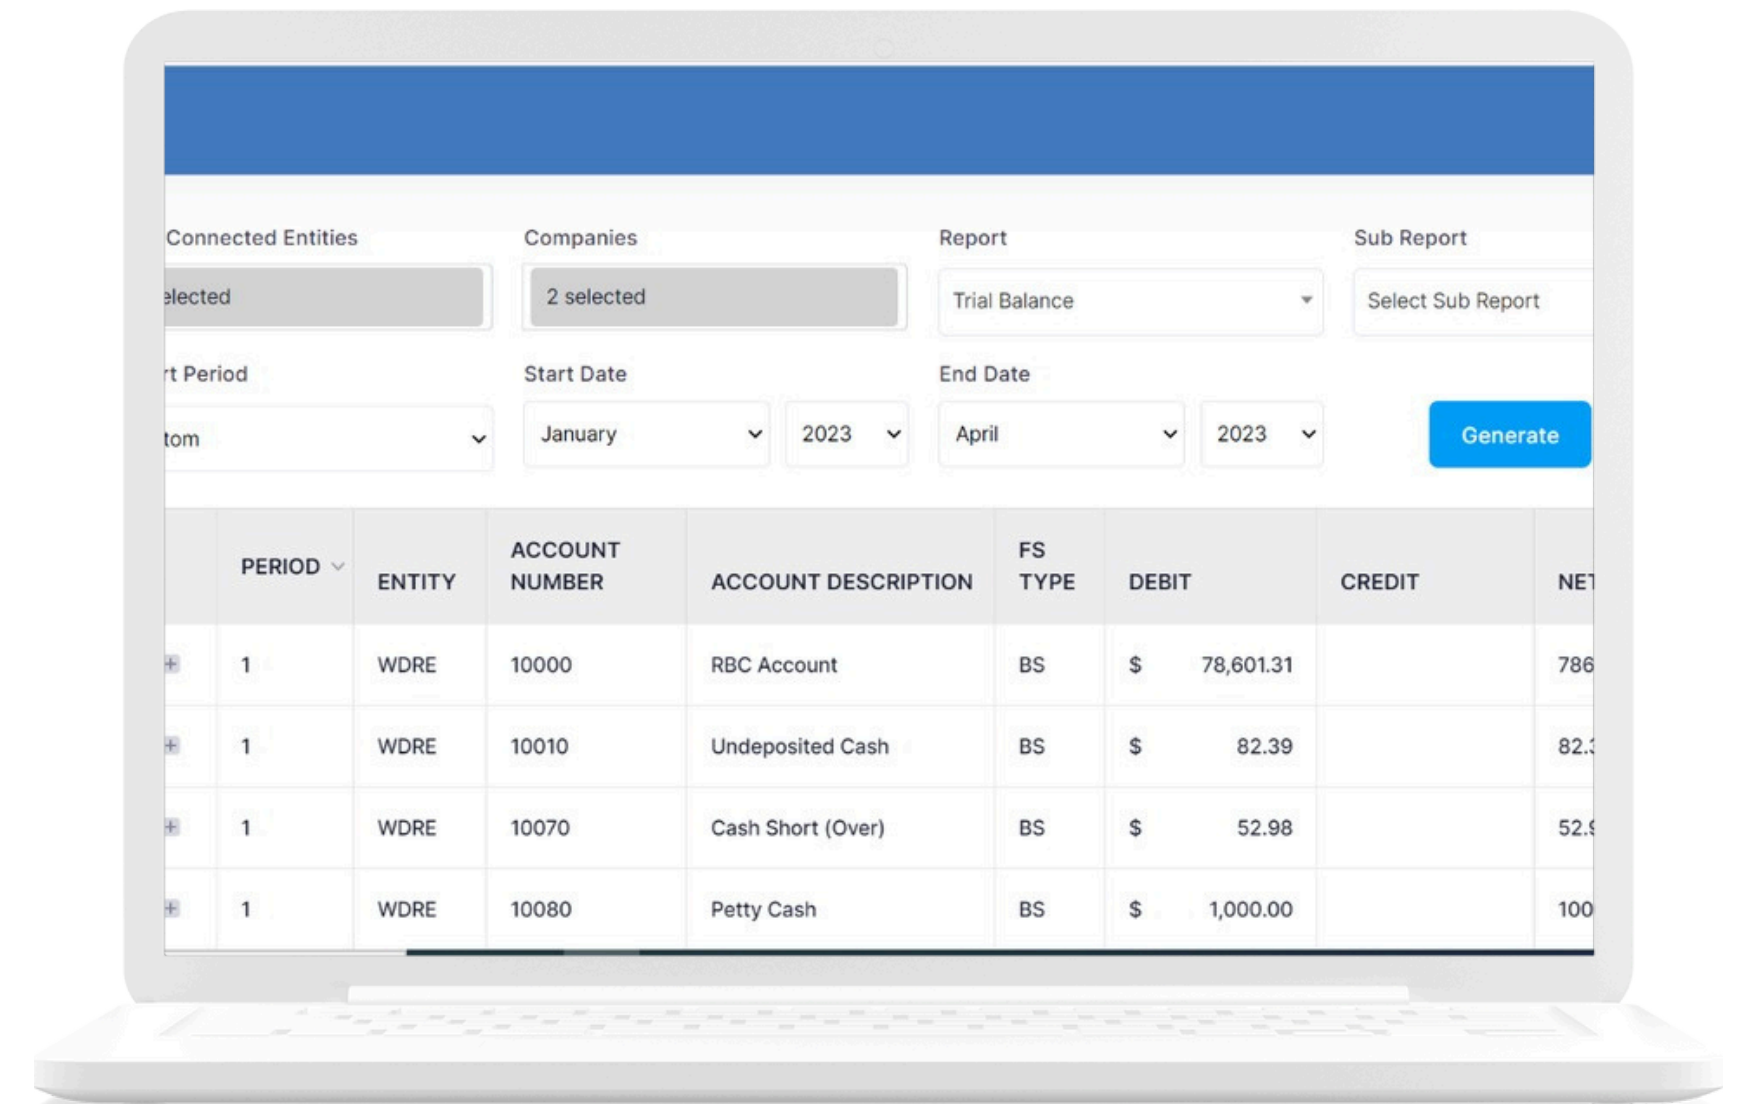

- Manual and time-consuming financial reporting processes.
- Difficulties in customizing reports to meet specific needs.
- Limited access to real-time financial data.
- Challenges in integrating various accounting systems.
- Concerns over data security and confidentiality.

Project Features

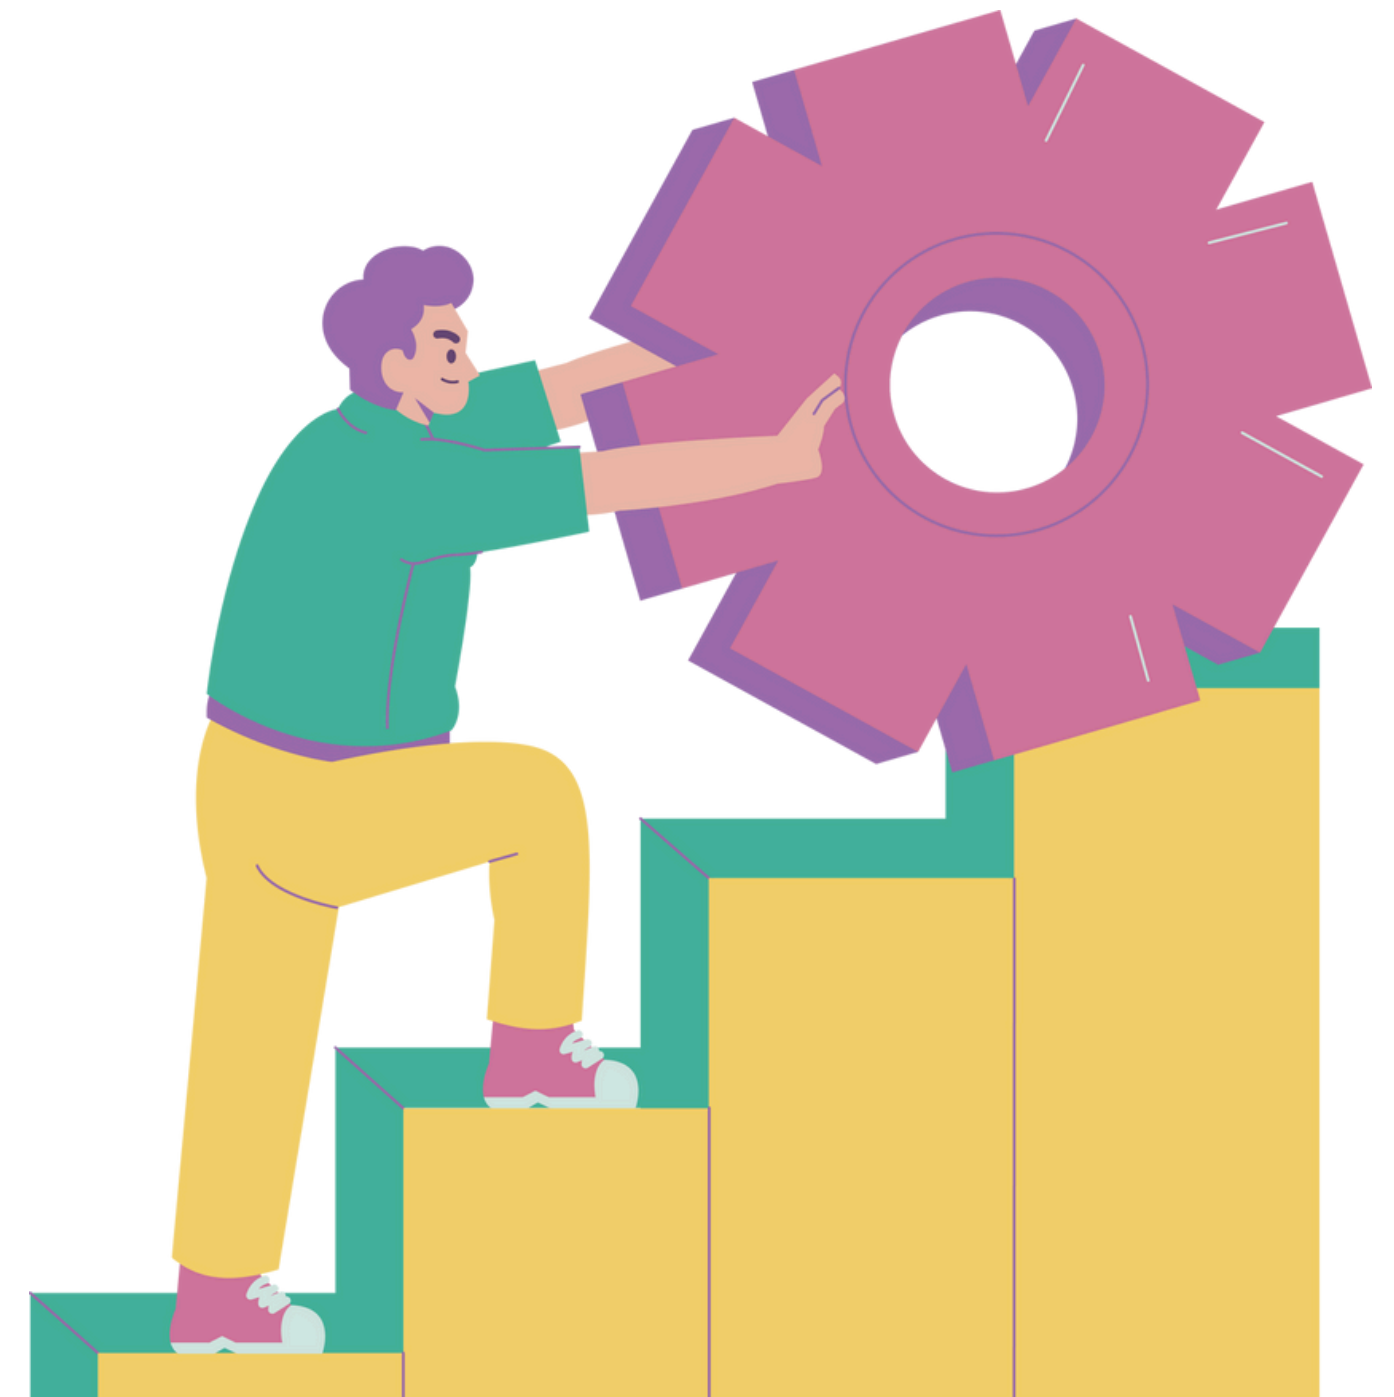

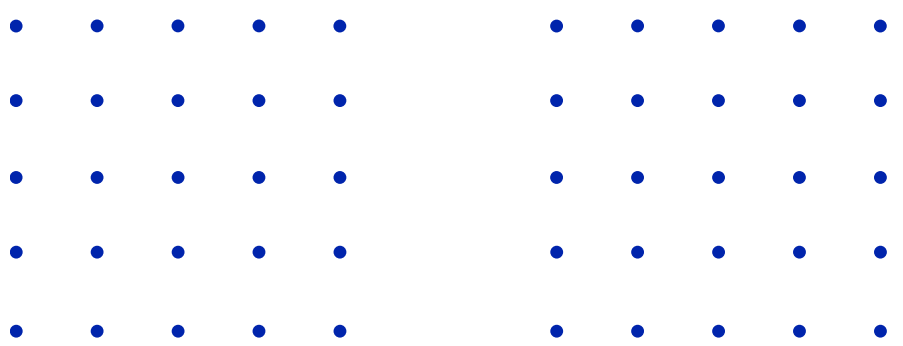

Nuworkz has numerous following features:

- Financial Reporting
- Data Analysis
- Easy - Integration
- Customization
- Security

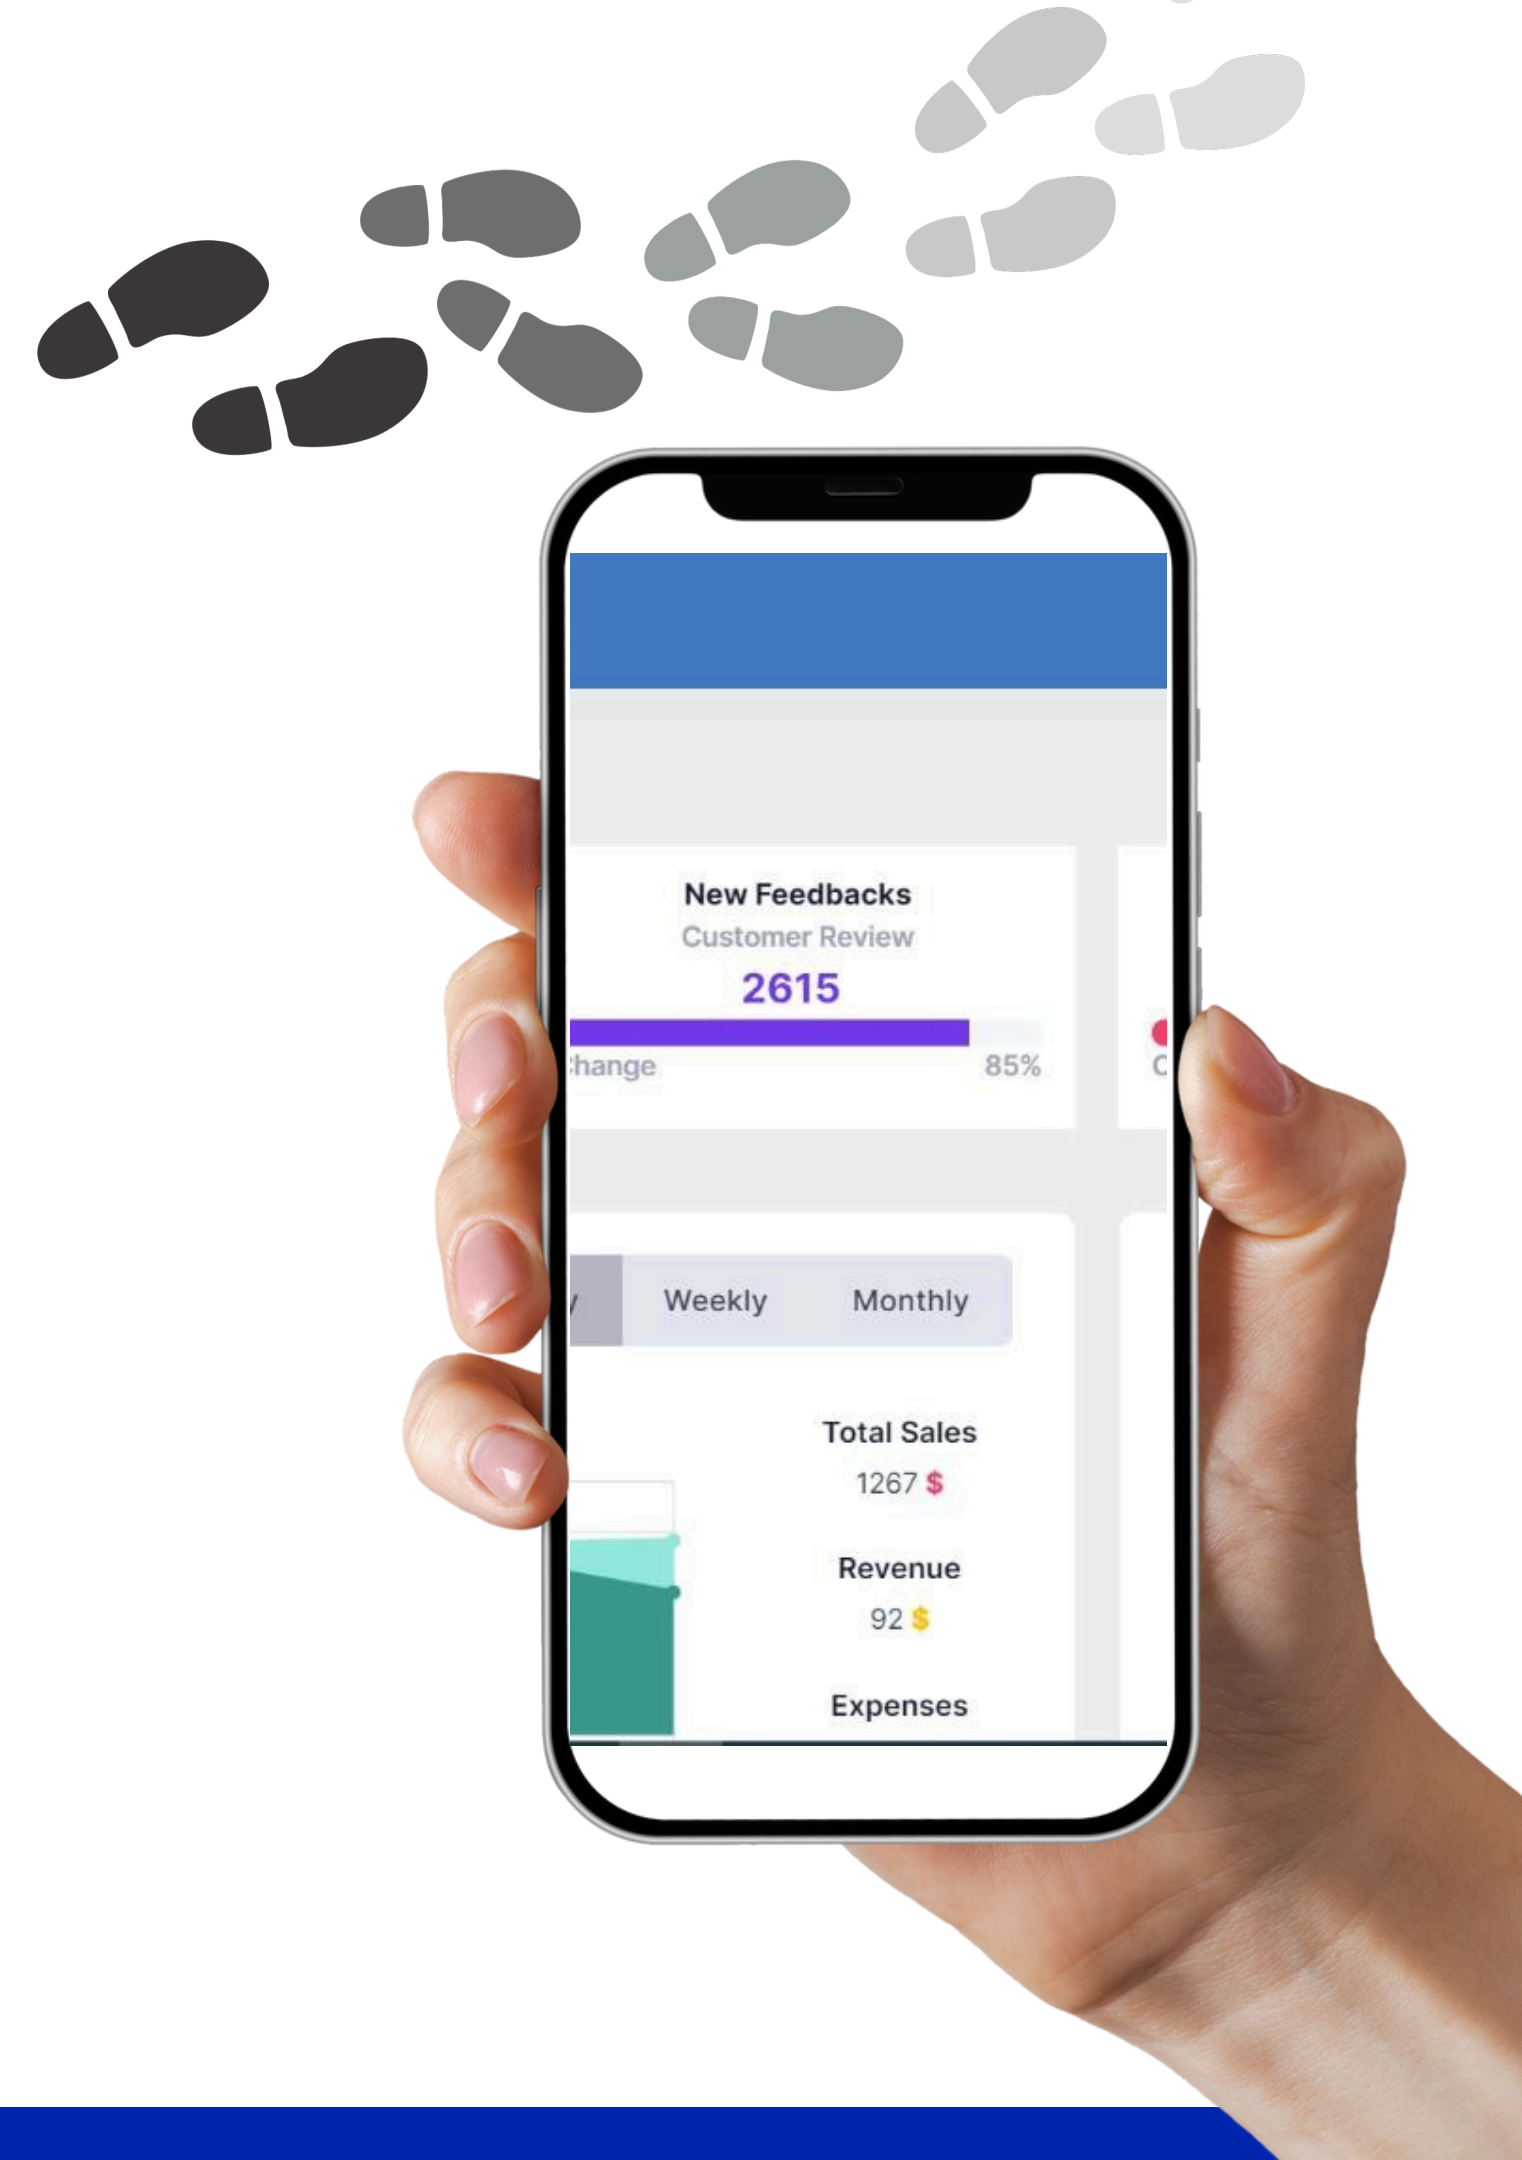

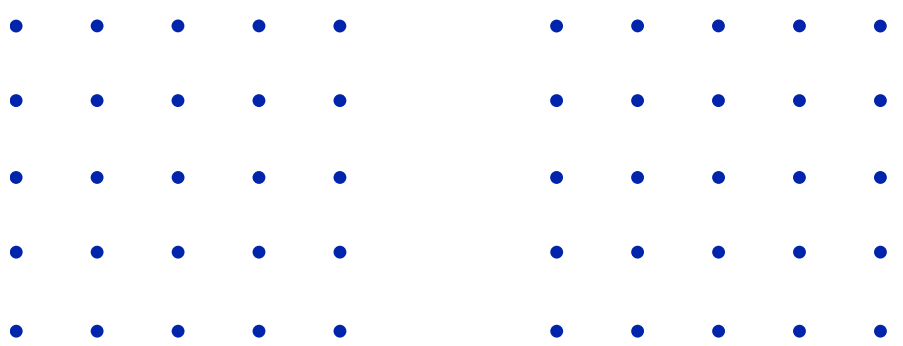

Challenges

Ensuring smooth integration with multiple accounting software platforms, each with its own unique specifications and requirements, presented a significant challenge. Maintaining data accuracy and consistency throughout the integration process was significant, as any discrepancies could lead to inaccuracies in financial reporting and decision-making.

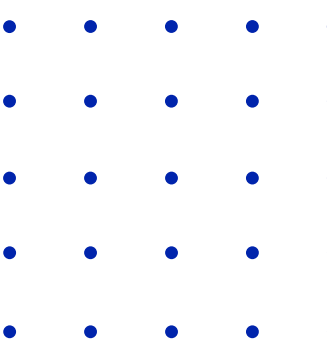

Our Journey

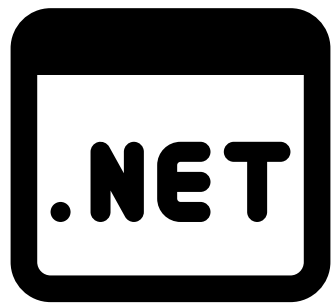

We committed ourselves to modernizing financial reporting for businesses. With meticulous attention to detail, we crafted a robust software solution, navigating the intricacies of manual processes. Overcoming compatibility challenges with various accounting software platforms, we seamlessly integrated our system, ensuring precision and reliability in data handling.

Tech Stack

We used special tools and software to build the NuWorkz project, making sure everything worked well together. Here's what we used:

Asp.net Core

Sage 50

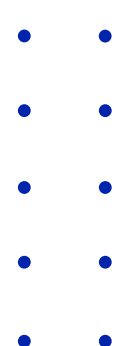

Syspro

Ms SQL

Quickbooks online,
Quickbooks desktop

Results

Our efforts led to significant outcomes. Businesses found improvements in their financial reporting processes, reducing time spent on manual tasks. Through seamless integration, they accessed precise and current financial data, facilitating informed decision-making.

Implementing robust security measures guarantees the safeguarding of sensitive information, instilling trust in data integrity. In summary, our solution offered businesses clarity, efficiency, and assurance in their financial management pursuits.

A Payment Mobile Application Handle Your Finances

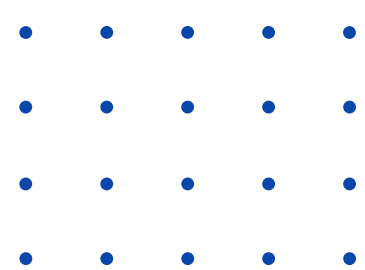

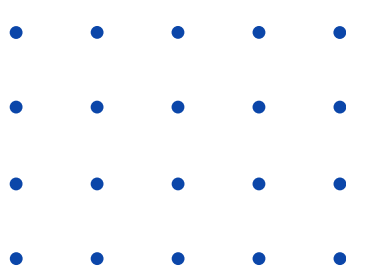

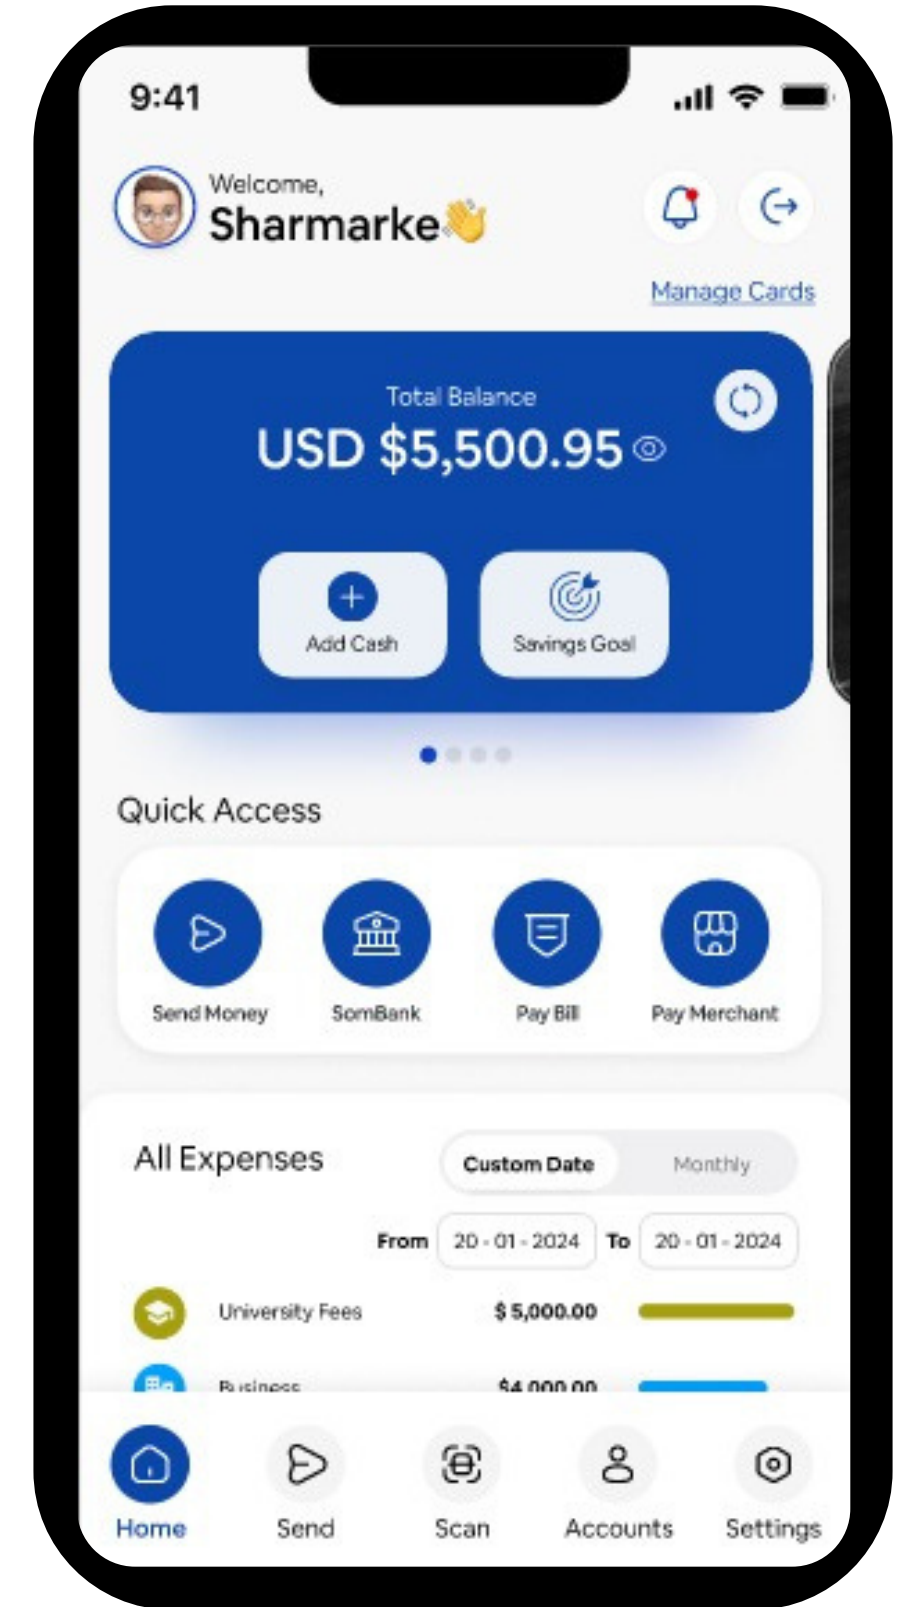

T-Plus

Plus combines cutting-edge technology with an intuitive user experience to bring you a seamless, secure, and efficient payment solution. Whether you're managing personal expenses, running a business, or shopping online, T-Plus offers a comprehensive platform to meet all your financial needs. With support for various payment methods, instant transfers, and robust security features, the T-Plus Payment Mobile Application ensures that your transactions are fast, safe, and hassle-free.

Client Requirements

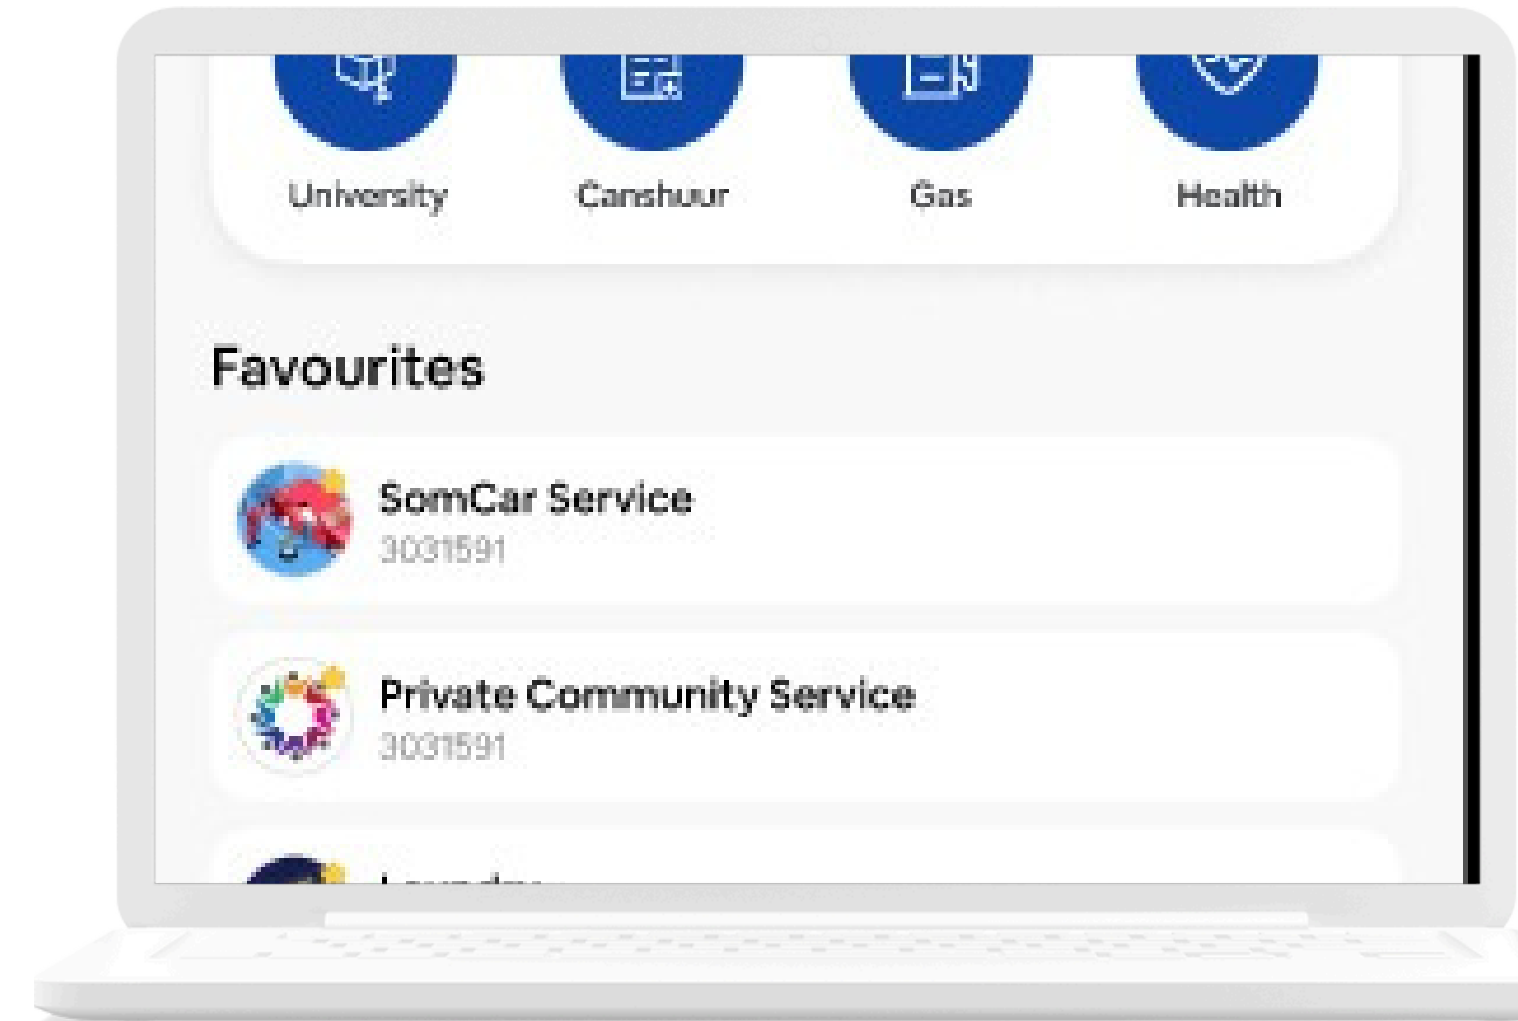

Client's main hurdle was to make an easy to login but a secure payment method app for banking. The client needed a very personalized app for everyone with quick response time. In past the former app did not work well on all devices or operating systems.

Project Features

The T-Plus Payment Mobile Application offers a variety of features designed to provide a seamless, secure, and efficient financial transaction experience. Financial Reporting

- One can maintain the Wallets and Bank payments at one place
- Send Money to different mode of providers
- One can receive money as well
- Cash could be added to the Wallet
- One can add goals to save and plan for his expenditures
- Can pay the bills
- Bank accounts will be added and a new request for a car can also be initialized within the app only

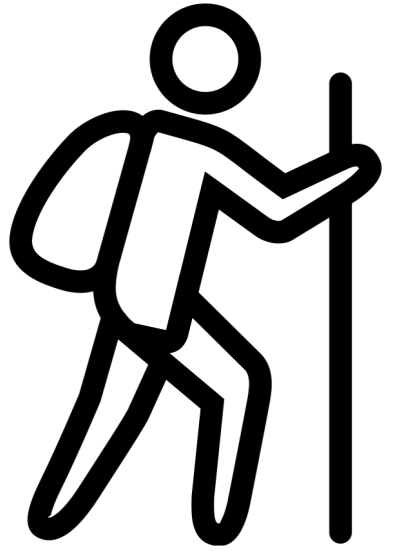

Challenges

Developing a mobile payment application like T-Plus Payment presents several challenges for developers. We had to Ensure the security of financial transactions and user data. Furthermore, Integrating multiple payment gateways and ensuring compatibility with various financial institutions.

Our Journey

PLANNING PHASE

It includes selecting the appropriate technology stack and platforms, designing user-centric UX/UI prototypes, and conducting usability testing. The phase also encompasses developing a comprehensive project plan with clear timelines, milestones, and resource allocations.

TESTING PHASE:

Before finishing, we checked everything carefully. We looked at each part by itself to make sure it worked right. Then we put everything together to see if they worked well as a team. We also tested how the whole process went from start to finish to make sure it went smoothly. If we found problems, we fixed them to make things better.

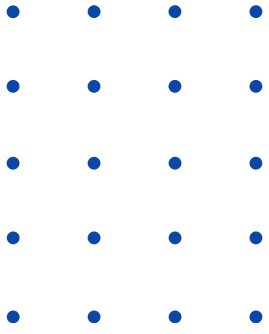

BUILD PHASE:

The build phase of the T-Plus Payment mobile application involves developing both the front-end and back-end components to ensure a seamless and secure user experience. Front-end development focuses on creating an intuitive and responsive user interface

RELEASE PHASE:

Once everything was working well and tested, we got ready to share the app with everyone. We looked at it one more time to make sure it was perfect. We fixed any small problems we found and made sure it was safe to use.

Technologies Behind Our Seamless Financial Solution

We used special tools and software to build the T-Plus project, making sure everything worked well together. Here's what we used:

My SQL

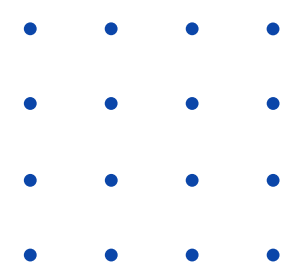

Azure Service Bus

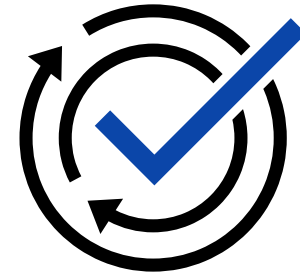

Azure B2C

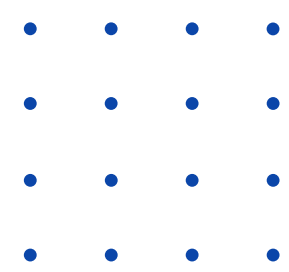

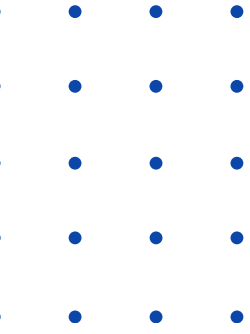

API Gateway

Results

The T-Plus Payment mobile application, upon successful development and deployment, will significantly enhance user experience through an intuitive interface, robust security, and versatile payment options, leading to increased user satisfaction and trust. For the business, this translates to higher adoption rates, improved customer retention, and operational efficiency, bolstered by regulatory compliance and scalable infrastructure. The application's reliability and performance will provide a competitive edge, driving revenue growth and fostering partnerships, while also promoting financial inclusion and trust within the community. Overall, the end product will solidify T-Plus's market position as a leading mobile payment solution provider, driving long-term success and growth.

Industries We Serve

Food & Beverage

Streamline supply chain and inventory management with advanced software solutions.

BFSI

Develop secure and innovative fintech applications to enhance customer experience and regulatory compliance.

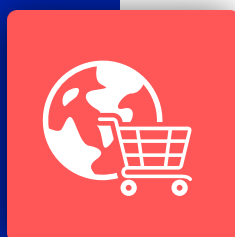

Travel & Tourism

Create seamless booking systems and enhance customer engagement through digital platforms.

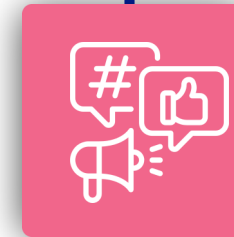

Energy & Oil & Gas

Implement predictive maintenance and optimize supply chain operations with AI-driven technologies.

E-Commerce

Boost online sales with robust, user-friendly e-commerce platforms and mobile applications.

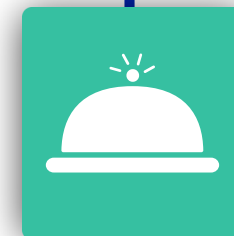

Media & Social

Streamline supply chain and inventory management with advanced software solutions.

Healthcare

Improve patient care with advanced mobile EHR solutions and healthcare analytics applications.

Hospitality

Enhance guest experiences with AI-powered booking and comprehensive management apps.

Education

Develop e-learning platforms and educational tools to support digital learning.

Real Estate

Simplify property management and client engagement with AI-powered platforms.

Technology

Mobile Development

Our mobile development service specializes in creating seamless mobile applications that enhance user experience and provide businesses with a competitive edge.

Frontend Development

We create visually stunning, user-friendly interfaces for websites and web applications.

Backend Development

Our backend development services offer robust and scalable server-side applications that power seamless interactions between the frontend and backend.

Microsoft Power Platform

Empower your business with Microsoft Power Platform, an integrated suite of tools:

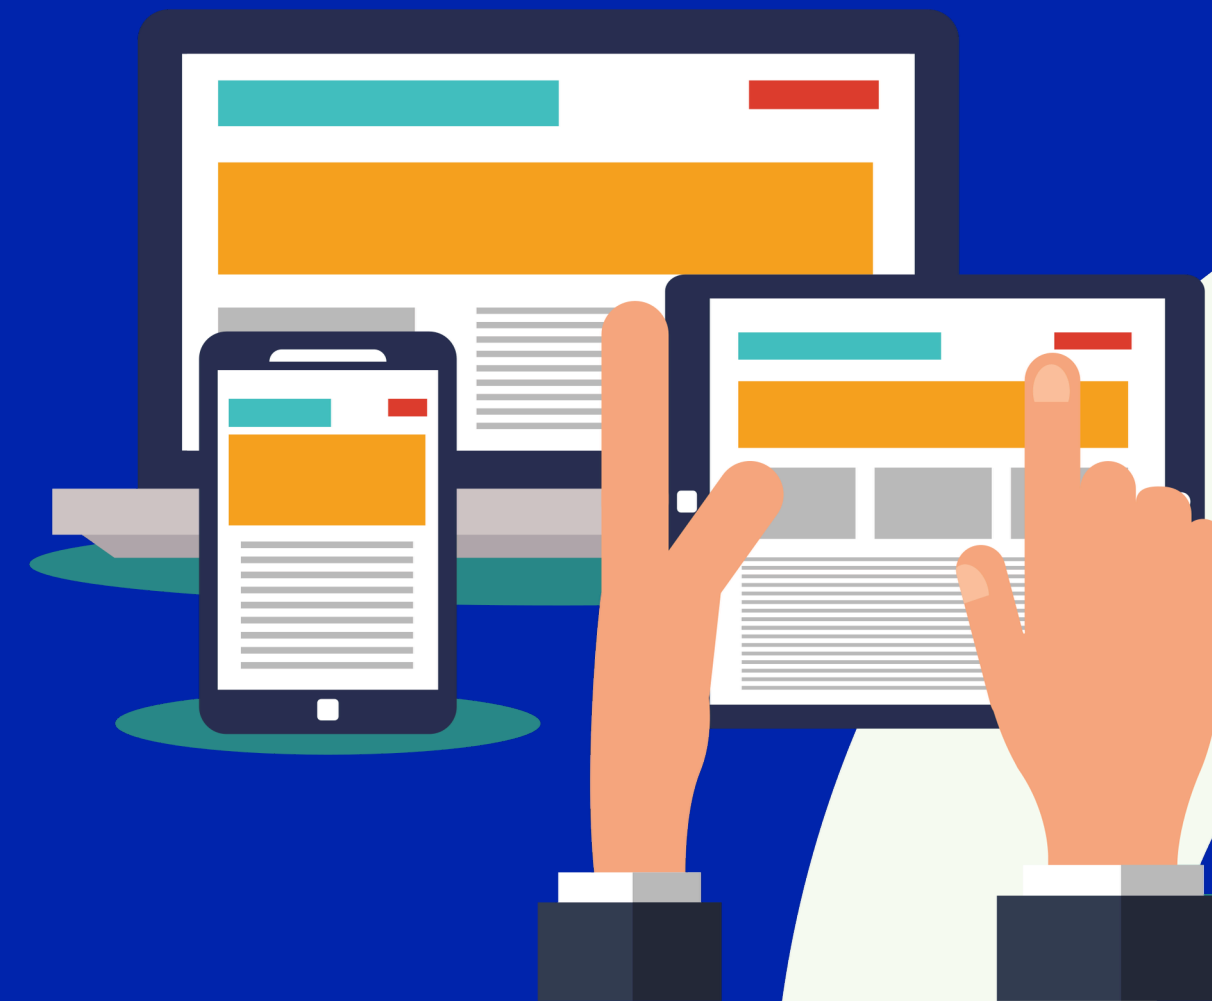

- **Power BI:** Create interactive reports, dashboards, and data visualizations for informed decision-making.
- **Power Apps:** Quickly develop custom applications with low-code development, suitable for mobile apps, web apps, and forms.
- **Power Automate:** Automate workflows across applications and services to streamline processes and reduce manual tasks.
- **Power Virtual Agents:** Develop AI-powered chatbots to efficiently handle customer inquiries and automate responses.

Advanced AI Solutions

- **AI Chatbot Development:** Build intelligent chatbots that enhance customer interaction and automate tasks effectively.
- **AI Copilot:** Integrate AI Copilot capabilities for real-time decision support and task automation.

Dynamics 365

Enhance business operations and customer relationships with Dynamics 365's comprehensive suite of ERP and CRM applications.

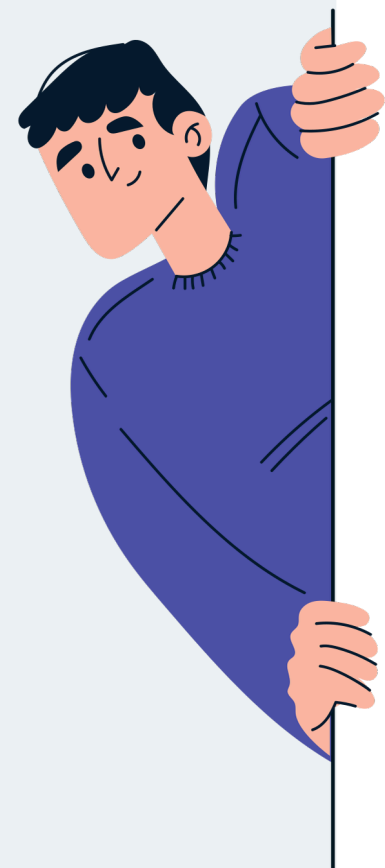

Our Vision

To be the foremost strategic AI partner, recognized for transforming businesses with advanced automation and digital solutions, and driving sustainable growth and success.

Our Mission

To empower businesses by driving revenue growth, enhancing operational efficiency, and elevating customer experience through intelligent AI agents and automated workflows.

Achievements

Creating Impactful Solutions

250+

Happy Clients

Our happy clients are the driving force behind our success.

750+

Successful Projects

It is not just our goal, it's our standard.

70+

Dedicated Resources

Our committed team brings expertise to every project.

Over 60,000 Hours Invested

Demonstrating our dedication to quality solutions.

130+ Long-Term Happy Client

Building lasting relationships and satisfaction.

Brands

Testimonial

Philmore J

Fintech

I highly recommend QServices for their exceptional quality and reliable service.

Amer Alic

Logistics

I am thoroughly impressed with the exceptional service and quality of work provided by Sahil and his team.

Alex VenderELS

Product Owner

I was impressed with QServices' professionalism and the exceptional quality of their work.

Steven Lewis

Real Estate

I had an excellent experience with QServices - their team delivered exceptional results and exceeded my expectations.
