Quadra

Connect people with Knowledge and Expert with Microsoft Entra Permission Management (MEPM)

Microsoft Entra Permissions Management is a cloud infrastructure entitlement management (CIEM) product that provides comprehensive visibility and control over permissions for any identity and any resource in Microsoft Azure, Amazon Web Services (AWS) and Google Cloud Platform (GCP).

Why Quadra?

Quadra, a Microsoft Global Partner of the Year award winner, helps you improve your security posture by ensuring the principle of least privilege across identities and resources in your multi cloud infrastructure.

Get started today with **MEPM**	• Discover what resources every identity is accessing across your cloud platforms. • Use usage analytics to ensure identities have the right permissions at the right time • Implement consistent security policies across your cloud infrastructure. • Detect anomalous activities with machine learning-powered alerts and generate detailed forensic reports

Quadra's Approach & Deliverables

Given the complexity of identities, permissions and resources, it's essential to learn how to ensure the right people are accessing your environment, securely. In this workshop, we'll show you how to address "permissions gap" related risks and how to avoid future permissions creep.

By attending, you can:

Discover	Improve	Reduce	Plan
Identify **potential risks** related to identity and see opportunities for improvement.	Understand how Entra Permissions Management can help you address the **mitigation of the permissions gap**.	Reduce the complexity for IAM security teams to manage permissions across Multi cloud environments.	Get recommendations and next steps to move forward with **Entra Permissions Management**
