Quadrant Technologies | Superpower Slide

QUADRANT

Quadrant Resource offers agile engagement models in modern application development, embedded with SAP best practices on Microsoft Azure. Our team brings Azure advance specialization skills and deep experience across various business verticals that enable enterprises to build or migrate effectively to SAP on Azure. In addition, we have a dedicated team working at Microsoft Redmond specifically for Azure migration including Architecting, Development and operations of Azure Enterprise ecosystem which differentiates us from other services partners.

☐ Enterprises with SAP or non-SAP in a distributed ecosystem migrating to Azure ☐ Customers who have identified a spend commitment for expiring SAP on premise infrastructure ☐ Customer workloads that require cloud migration to meet SAP's support deadline by 2027	Quadrant Resources DBA Quadrant Technologies deploys customer-centric hybrid engagement models. Quadrant Resources SAP on Azure consulting includes Discovery/Assessment, Proof of Concept and Implementation services. Our Gold competencies in Cloud Platform, Application Development and Data Platform combined with partner edge Partnership with SAP ensures successful engagements with high customer satisfaction.

Key contacts
Keshavulu Bommineni

Microsoft contacts : **Lalitha Balakrishna**

Practice **SAP on Azure**

Number of employees : **2000+**

Location **Redmond, WA**

Industry focus **MFG, HEALTHCARE, FINANCE**

Regional coverage **GLOBAL**

Microsoft competencies
**SOLUTION PARTNER
APPLICATION DEVELOPMENT, DEVOPS
DATA ANALYTICS, APPLICATION
INTEGRATAION**

Sales plays SAP on Azure |OSS DB Migration to Azure OSS DB |Power Automate |Power BI

Partner offers **SAP on Azure, OSS, POWER BI**

Business problem
- Multiple SAP instances[ECC,PI-XI,BW,BO,FIORI]
- Lack of data integrity & availability for proactive business decision
- High maintenance cost with on-prem expiring hardware contract
- Low peak load Performance and Reliability

Solution
SAP On-Premise to SAP Azure Cloud Migration 10 weeks duration
- Migration of SAP to Azure, Disaster recovery setup between two datacenter for SAP ECC / PI / BW SAP ECC memory tuning
- Deployed production workload with DR in secondary region
- Premium SSD based storage for all SAP workloads (low latency, high performance), hub-spoke network topology per Azure best practices.

Outcome
Biz Productivity- 30% | DR readiness- 40% |Adv Data security- 100%
New SAP vers on Cloud| Smart failover, Disaster Recovery| SSO for Az AD

| **By territory:** North America, Mexico, India and Singapore | **By scenario** SAP Azure/Hybrid cloud assessment & POC | SAP on Azure migration |1:1 Architectural guidance | **By workload** SAP On prem to Azure cloud migration SAP application database migration to Azure |

Sales plays SAP on Azure |OSS DB Migration to Azure OSS DB |Power Automate |Power BI

Partner offers **SAP on Azure, OSS, POWER BI**

Business problem
- Multiple Legacy instances, no ERP solution in the ecosystem
- No real time data availability, applications data sync challenges
- Multiple user interface and lack platform integrity

Solution
POC for New SAP Implementation on Azure Cloud-2 Week duration
- 3-Tier SAP architecture for optimal scalability and resilience
- Demonstrated production workload with DR in secondary region
- Design incorporates with SAP certified Azure VMs & are optimized for in-memory hyper-threaded applications.

Outcome

SAP application availability –   30% | Capacity to scalability –   45%
