1. Objectives

- Evaluate the current application landscape.
 - Align applications with business objectives.
 - Identify gaps in functionality, performance, and compliance.
-

2. Key Goals

- **Understand Current State:** Inventory applications, architecture, and dependencies.
 - **Align with Business Needs:** Ensure applications support processes and deliver ROI.
 - **Optimize Efficiency and Cost:** Recommend modernization strategies (retain, rehost, replatform, replace, retire).
 - **Improve Security and Compliance:** Validate licensing and regulatory adherence.
 - **Support Strategic Decisions:** Provide roadmap for integration and scalability.
-

3. Benefits

- Reduced operational costs.
 - Enhanced security posture.
 - Improved resource utilization.
 - Clear modernization roadmap.
-

4. Typical Deliverables

- Application inventory and classification.
- Fit-gap analysis.
- Architecture diagrams and dependency maps.
- Optimization and migration recommendations.
