

## Managed Security 365

### IT security has never been so easy

Protect your Microsoft Cloud from attacks, data loss and sabotage - fully automatic and highly effective with Managed Security 365 from QualityHosting.

**70 %**

of German companies have been exposed to cyber attacks in recent years.<sup>1</sup>

**Only 25-30%**

is achieved by the average Microsoft 365 customer in Microsoft Secure Score.<sup>2</sup>

**68.880 €**

damage is caused by an average cyber security incident in medium-sized businesses worldwide.<sup>3</sup>

## The threat is increasing - are you prepared?

Although Microsoft cloud services offer many security features that could help against cyber threats, most remain unused. Too time-consuming, too extensive, too complex: Many users are overwhelmed by the security settings.

The consequences: Identity theft, data leakage or data loss, often with irreversible reputational damage.

## Managed Security 365 for Office 365 & Microsoft 365

### Protect your cloud with highest Microsoft security standards

Our service Managed Security 365 strengthens the security of Microsoft cloud services. As a managed service, it continuously and automatically monitors the security status of Microsoft cloud solutions, helping customers to manage their IT efficiently and easily.
