

# Neologik

***Neologik makes it easy for businesses to adopt an AI-First strategy.***

Neologik is an enterprise platform to manage AI models, agents, workflows and templates for multi-purpose business automation.

# Our mission is to accelerate data & document workflow productivity, securely

How do you **share best practices, policies and frameworks** for technology delivery in your organisation?

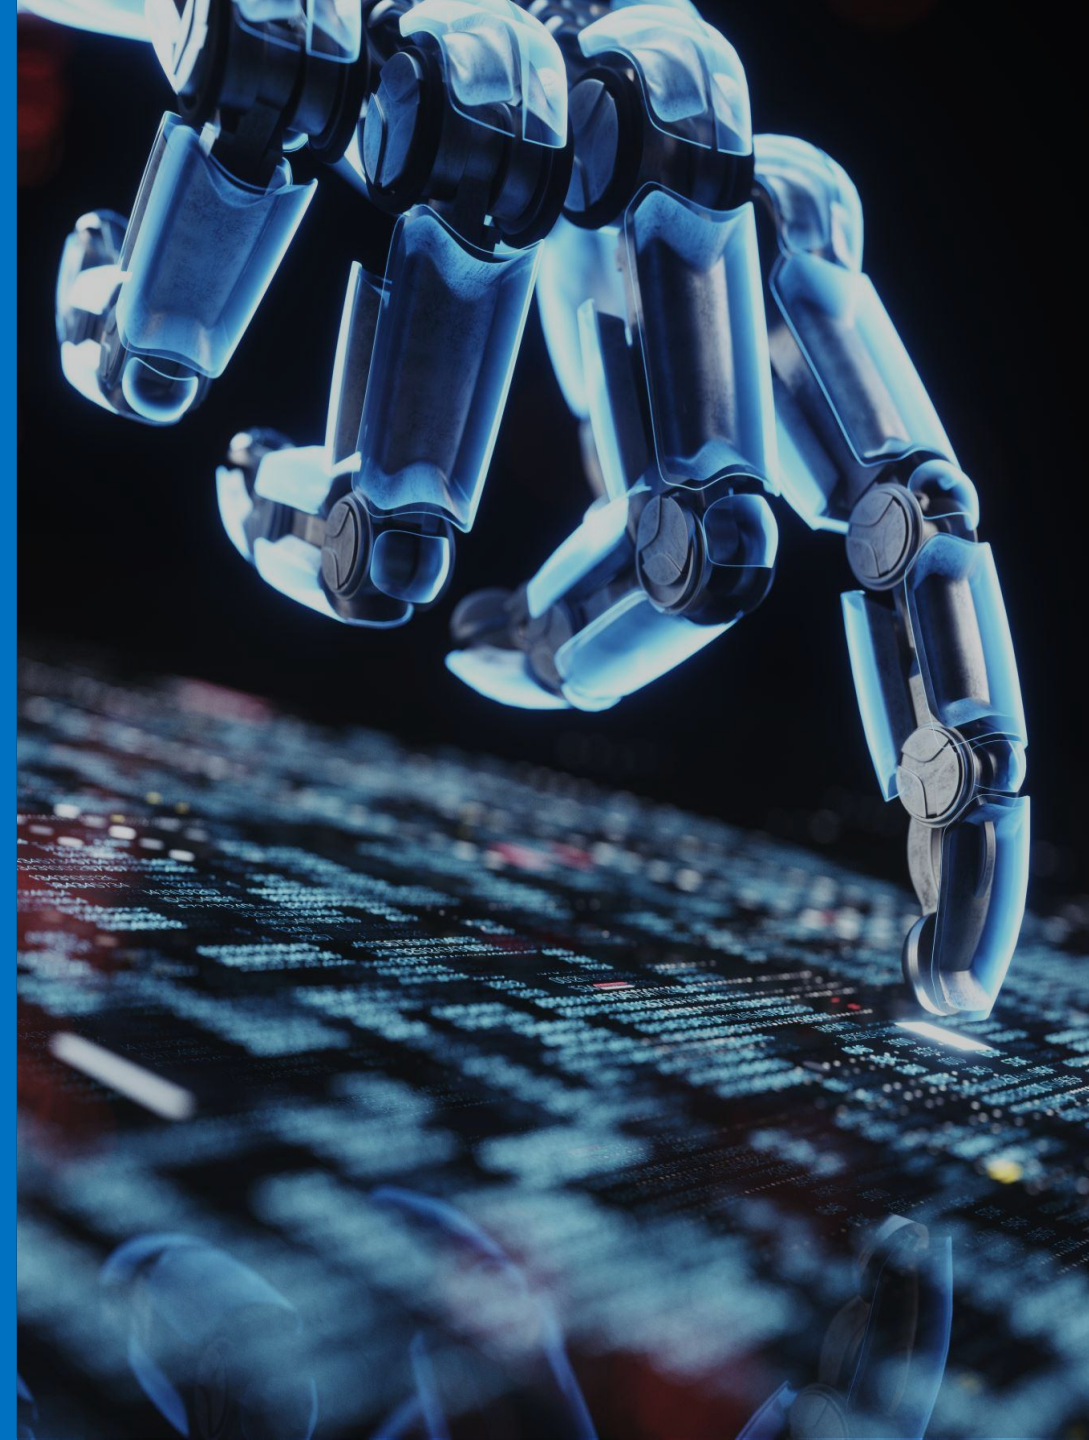

How do you **capture internal knowledge capital & IP** to promote consistency and better manage risks?

How do you **better equip new starters & accelerate integration** of acquired companies?

How do you **protect your IP in an AI-driven economy**?

# Neologik is an accurate, private & efficient multipurpose automation tool for workflow and documentation

1

## Accurate

Neologik Context Engine curates AI models with the right documents and data

You get the best possible answers from your AI outputs

2

## Private

Enterprises need an internal AI platform that is private and unique

Neologik is hosted in your IT infrastructure, inheriting your security controls

3

## Efficient

Managing AI LLM and AI SaaS sprawl is time consuming and expensive

Neologik is one platform that manages all your LLMs and optimises AI spend

AskQ offers a natural language consolidation of three **key information sources**, defined by you:

- 
1. All of the Neologik IP for consulting and delivery skills.  
This includes our unique syllabus to develop outstanding technology consultants.
  2. Your specific frameworks and policies for best practice.
  3. Selected and curated information from trusted sources on the Internet

# Neologik Context Engine (NCE) is the key to quality AI; this is where your content is curated, classified and ranked

# Within NCE, you can create & manage multiple AI agents, each tailored to your business needs with unique roles and expertise

## Agents

Manage your Agents & Workflows here

Agent: Sales

You are an expert sales agent, write using a professional tone in the third person

8 workflows

Workflow	Description
SOW Landing Zone Large	Create a statement of work document for an Azure large landing zone for a customer
AskQ Pitch Deck	Create an AskQ pitch deck into to present to a customer
Account Plan	Create an Account Plan for a customer
Account Summary	Create an Account Summary for a customer
Framework Agreement	Create a Framework Agreement for a customer
SOW Azure Web Portal	Create a statement of work document for an Azure Web Portal for a customer
RFP Response	Create an RFP Response based on an Excel template
Non-disclosure Agreement	Create a Non-disclosure Agreement for a customer

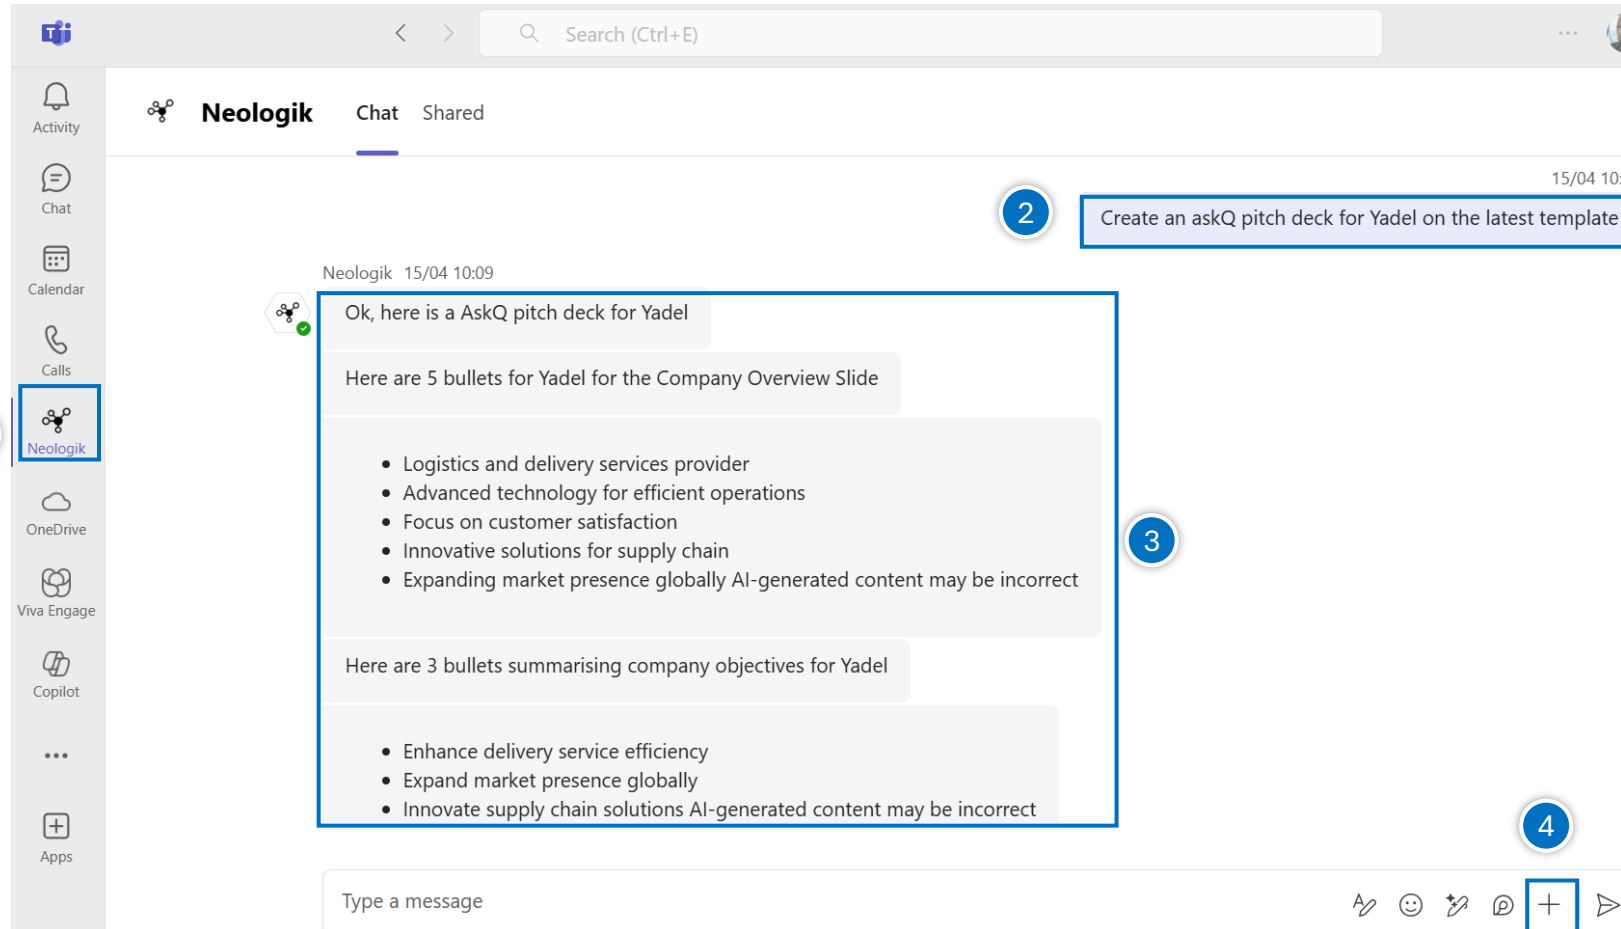

**1 Business needs**  
Create **multiple agents** depending on **use case** (*based on industry, geo location, business unit or language*)

**2 Role-specific scope**  
Choose the **appropriate tone of voice & knowledge inputs** for your output

**3 Access to enterprise knowledge**  
Create **agent-specific workflows** and access to documents & data

# Users interact with documents, workflows, systems and knowledge using Microsoft Teams

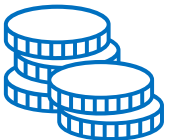

- 1 Neologik Agents**  
Select the appropriate agent (*bidding, sales, technical, general*)
- 2 Ask**  
Ask Neologik a question using natural chat language
- 3 Outputs**  
Depending on the instruction, get direct answers, summaries, documents or initiate system workflows
- 4 Upload**  
Add any documents for instant completion, summary and analysis of them

# Additional use cases across compliance, sales, systems, knowledge management and general workflow...

## Compliance

- Analysing client documentation and extracting meta-data
- Maintaining compliance datasets

## Sales

- Automated research for customer/prospect propensity to buy
- Automated RFP Responses (1<sup>st</sup> draft in minutes)
- Summarising client calls in D365
- Automated creation of customer pitch decks, proposals and CRM tasks

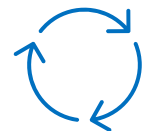

## Systems

- Natural language querying in various business applications, such as CRM & ERP systems

## Knowledge Management

- Creating unique Subject Matter Experts (SME) Agents
- Semantic search across all standard policy documents
- Onboarding assistant for new hires to learn customer specific systems, processes and provide templates

## General Workflow

- Automated speech-to-text, with sentiment and summarisations; creates a "searchable" client-immediate dataset
- Automated creation of NDA contracts

# Key construction industry use cases where Neologik boosts bid efficiency, accuracy, and scale

## Use Case 1: Smarter Knowledge Management & Bid Acceleration

**Challenges:** Difficulty accessing information, time-consuming manual processes, over-reliance on senior staff, and lack of structured libraries.

**Neologik Solution:** Neologik centralises and structures your bid content, making it easily searchable and accessible. By streamlining document management and leveraging AI-generated responses, teams can reduce reliance on key individuals and accelerate the entire bid process.

## Use Case 2: High-Quality AI Responses at Scale

**Challenges:** High volume of Pre-Qualification Questionnaires (PQQs), low-quality AI outputs, hallucinations, and resource constraints.

**Neologik Solution:** Neologik delivers reliable, high-quality AI-generated responses tailored for PQQs and bids. It minimises content errors, increases team capacity, and enhances competitiveness by automating repetitive tasks - allowing teams to focus on strategic work.

## Use Case 3: Seamless Integration & Workflow Efficiency

**Challenges:** Inefficient tools, lack of system integration, need for document comparison, knowledge sharing, and accurate visuals.

**Neologik Solution:** Neologik integrates with the existing systems, manages libraries, generates first-draft responses, and supports analysis and visuals. It boosts overall efficiency, reduces costs, and improves collaboration across teams.

# Backed by Microsoft

## What makes Neologik different:

- ▶ Documents, Data, Agents and Workflows are **curated, classified and version-controlled** which produce high-quality results. The sophisticated back end makes the front end simple.
- ▶ **Document Creator API**. No other AI solution has document creation with template management.
- ▶ It's **not a public** service, like ChatGPT: you don't give up your data.
- ▶ It's a **platform**, not a point SaaS solution. One platform enables 100s of solutions, without many complex commercial and technical relationships.

**Microsoft AI ISV in EMEA JumpStart programme**

**Available in the Microsoft Marketplace**

# Neologik provides own unique IP integrated with the best-in-class cloud services

## Our IP assets & processes

- ▶ Auto-doc classification (Inject and classify)
- ▶ Agent Library w. version control (by function or geography)
- ▶ Template management
- ▶ Workflow (intent) management
- ▶ Office document creator API
- ▶ Custom MS Teams Integration
