OUR PRODUCT - INSPECTION

Inspection

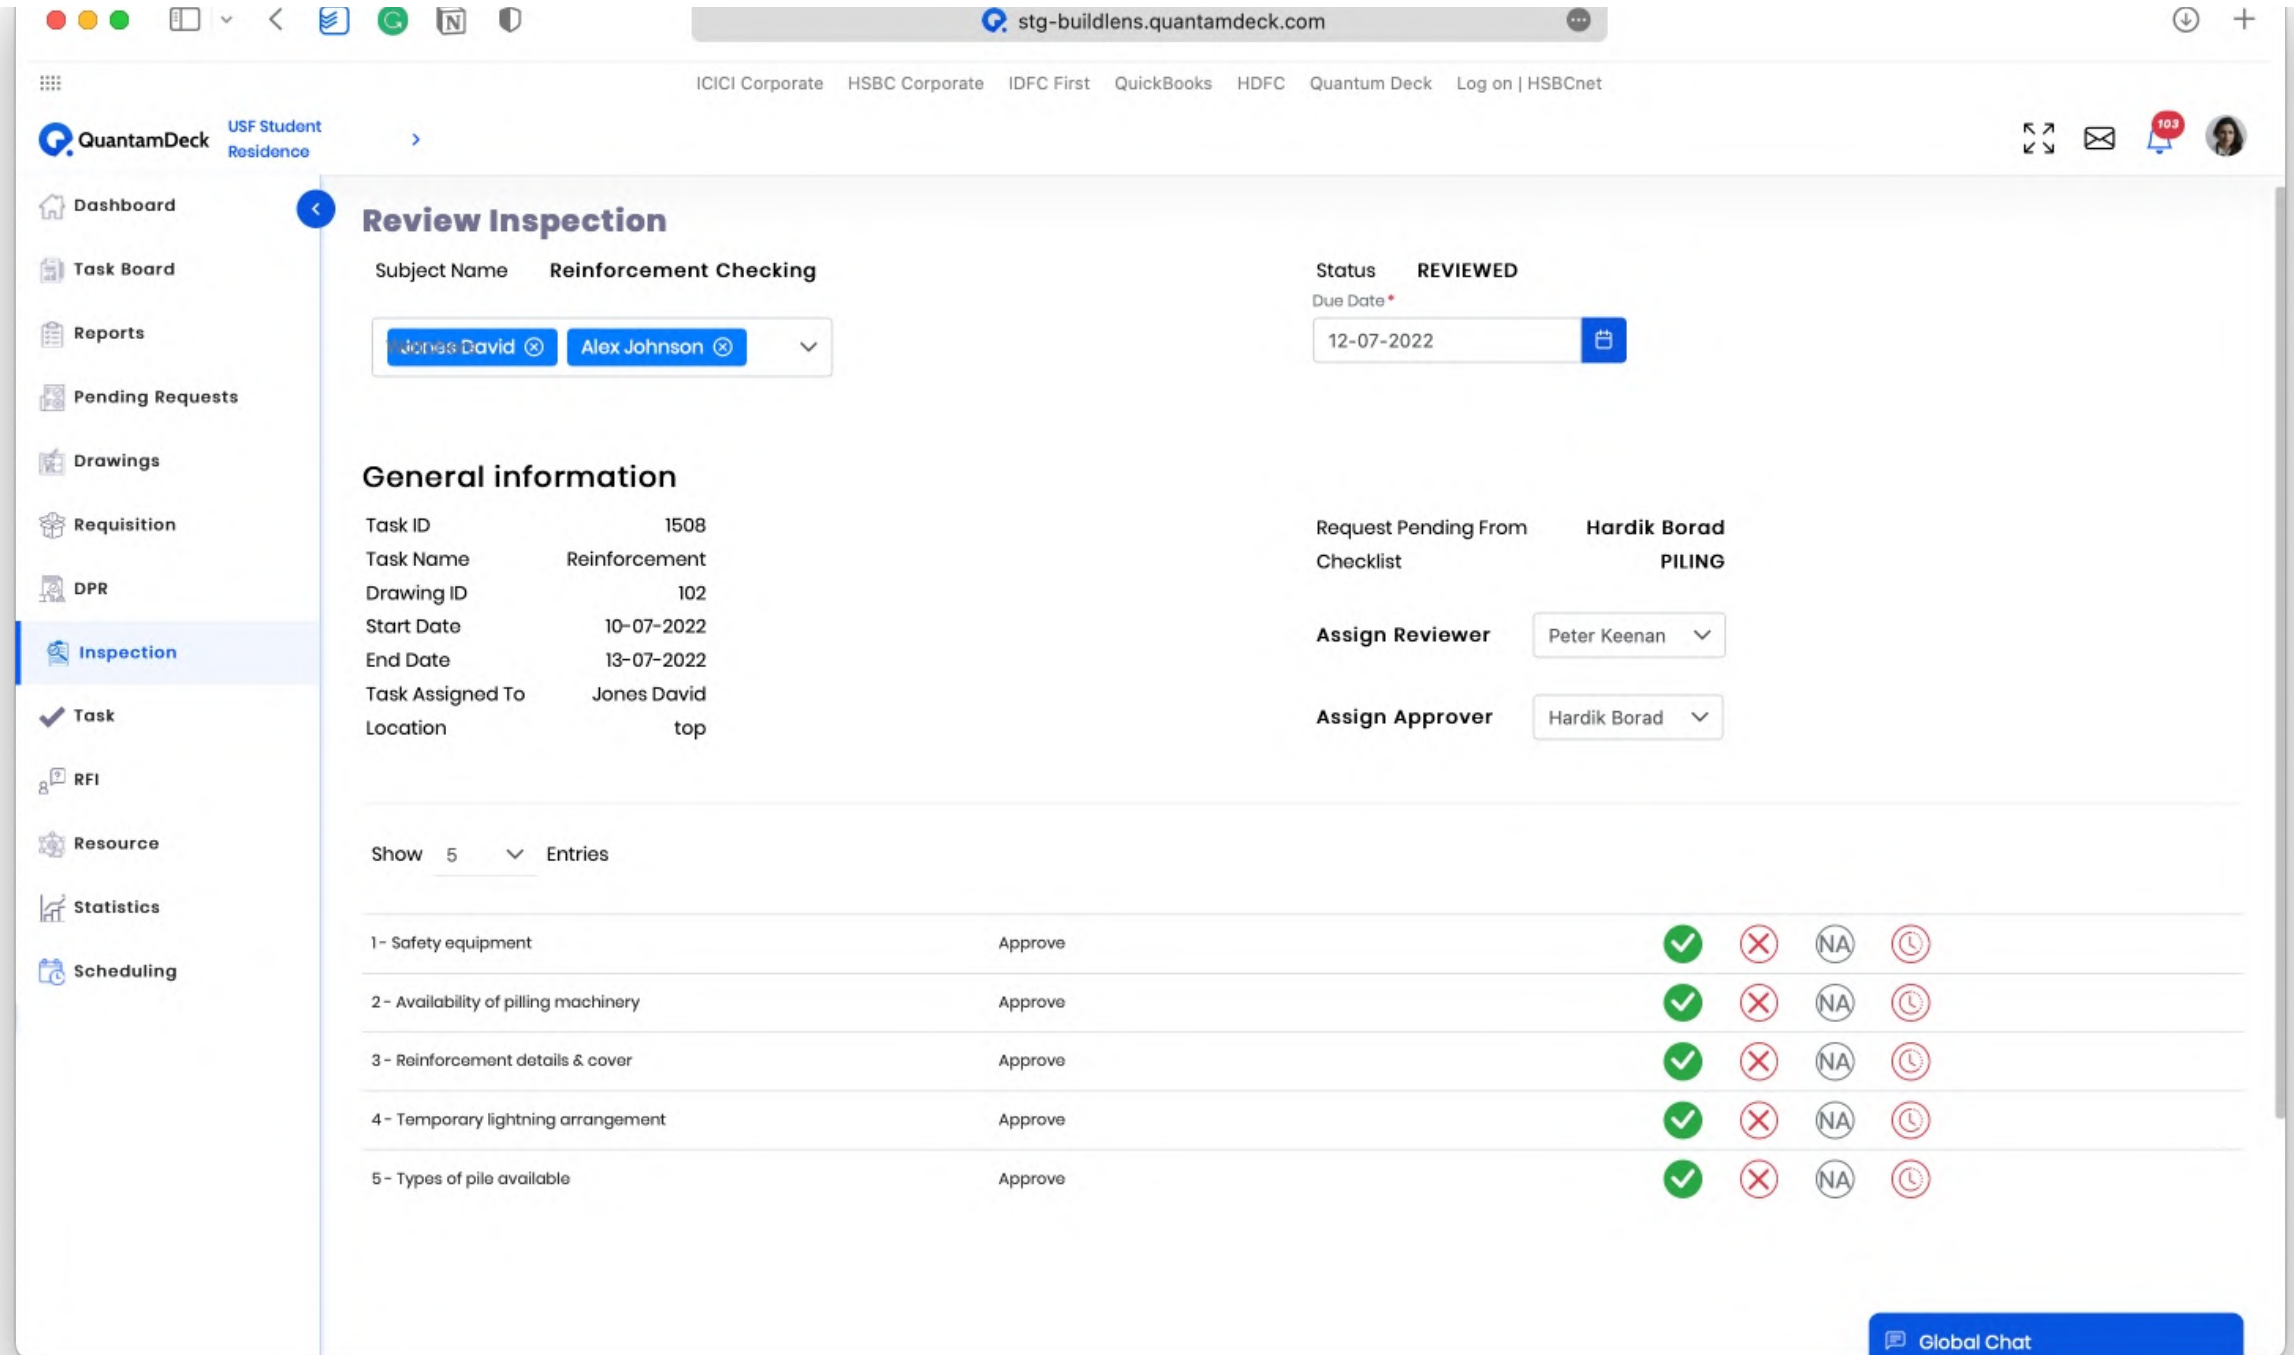

Improve your communication from the field to the office without easy-to-use construction inspection module. Eliminate paperwork and increase your visibility with everything in one place.

Quality Control

Keep tabs on your projects to ensure everything is meeting contract standards. By documenting quality control protocols.

Safety Management

Ensure your crew stay compliant with company protocols by making it easy to document their proactive safety measures. The easier it is to fill out a checklist, the more likely it is they'll get completed.

OUR PRODUCT - DAILY LOGS

Daily Logs

Intelligent Daily Logs reduce the time to fill in important information on a daily basis. Giving more flexibility to field engineers to do more construction than data entry.

Who did what, where, and when

Daily log is the first step to completing a thorough construction daily report. Input what happened on-site, where it took place, materials, manpower and machinery used and any other details you think of right then and there as they happen.

NOT JUST ANOTHER CONSTRUCTION MANAGEMENT SOFTWARE. IT'S A DIGITIZATION PLATFORM.

Enterprise digitization platform for the construction industry.

Customization at core

QuantamDeck's platform is built taking customization at its core. It is designed to understand and evolve to address Client's varied requirements.

Customize workflow, process, & modules.

It's never easy for an organization to switch to new enterprise software which is rigid in nature. QuantamDeck makes it easy to incorporate existing workflows and processes for a smoother transition to digital transformation.

Integrate existing legacy systems

We know there are great technologies like Microsoft Project, Excel, Primavera P6 and other such legacy systems that you may already be using. We don't want to replace them, instead, by integrating them, it enables the Client to make smarter decisions and manage risks efficiently.
