

Power BI In-a-Box

Pre-build data models that would take weeks to build from scratch

Get BI up and running straight away with D365

Easily customised and extended BI and reports from Day 1

No need for Data Integration / ETL for BI (uses out-the-box D365 DMF functionality)

QUANTIQ understand that the process for BI Modelling and Report Creation can be a lengthy process and have developed an Out-of-the-Box BI Solution for Microsoft Dynamics 365 that can accelerate what can be a drawn-out and expensive procedure.

QUANTIQ's Power BI In-A-Box has:

- Pre-built Power BI and SQL Data Models which are hosted on a scalable BI Platform on Azure. These have been built in a way that are readily extended to include your own business data beyond Microsoft Dynamics 365
- Sample Reports and Templates to accelerate report development
- BI Platform and models can also be offered as a Service following initial set-up and configuration

Key Features

An Out-the-Box BI Solution for D365*

- Extensive **pre-build Data Models**
- Example **Reports**
- Easily **extended** to include **client's data and reports**

Scalable BI Architecture

- **Scalable SQL Server** based platform for BI
- **Enterprise** Options for **Power BI** Data Models
- Extensible to include transaction **history** and **other data sources**

Ongoing BI Service

- **Initial setup** and configuration
- **Custom BI** creation for clients
- Flexible ongoing service and support options

What's Included?

*Data Models covering Finance & Supply Chain:

- Budget and Actual (G/L)
- Purchasing

- Sales
- Projects
- Customer Analytics
- Inventory
- Products
- Fixed Assets

- Retail

Sample **Power BI** App, Report & Template

Currently In Development:

- HR (Workers, Compensation, Payroll & Attrition)
- BC (Finance, Sales & Inventory)
- CE (In Design)

BI Architecture includes:

Bring Your Own Database (BYOD)

- Export of **130+ Entities** to an **Azure SQL Database**
- **Modelled & optimised** for Analytics
- Regular incremental update option
- Can hold **'history'** for reporting NOT in D365

Power BI Data Models (Datasets)

- **Standard:** Import mode for most solutions
- **Enterprise:** Large scale / high volume models
- Extensible to include further D365 Entities OR other datasets

Documentation included for Data Models

- Flexible ongoing service & support options

Why do you need it?

Out-the-Box Analytics

- Pre-build data models that would take weeks to build from scratch
- Get BI up and running straight away with D365

Customisable

- Easily customised and extended BI and reports from Day 1
- No need for Data Integration / ETL for BI

Extensible

- Include 'historic' transaction data for reporting
- Easily include your own data from other business applications, web services or files

Costings

Costings for this engagement are variable, and range from **£10,000-£25,000.***

*Costings are dependent on existing client infrastructure and Microsoft licensing entitlements. Costings exclude VAT. Travel time and expenses may be chargeable and are to be agreed prior to the commitment. Terms and Conditions apply. Costings are correct as of May 2020 - QUANTIQ reserve the right to amend.
