# Uncompromising Security Coverage

For any facility where security is mission-critical, Quantum Labs SEAS-XS provides automated, LiDAR-powered control of video security systems, as well as powerful analytics capabilities that offer unique insights into where individuals are going, whether they should be there, where they gather, and even who they gather with.
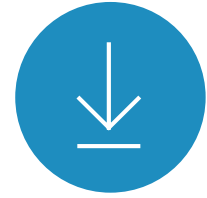

QuantumLABS
Dynamic Location Monitoring

Improved security

More completely and consistently ensure a safe environment for staff, visitors, and contractors

Rich insights

Use cloud-enabled intelligence to better understand how people and vehicles move through and interact with your space.

Reduced personnel costs

Automated LIDAR-powered security camera systems lessen the burden on human security personnel.

Quantum Labs helps SecureCorp provide the highest level of safety

SecureCorp have always looked for innovative solutions that provide our customers with a customizable of range of options to choose from. The SEAS-XS solution for high-security facilities ensures video analytics, including facial recognition and vehicle recognition, deliver optimal results via the LiDAR-controlled PTZ cameras.
