College Credits & PDF Certificates
All learners on our platform can apply their finished certifications and learning towards their degree with popular universities like Texas A&M Kingsville and University of Phoenix. We also issue printable PDF completion certificates.

The Skillset Mismatch Challenge.

The Challenge

The rules of a modern learner are changing in how people learn, retain and implement. People are tired of solely IT instructor led, or just online IT training.

there is an unstructured learning that is being consumed by employees through means such as blogs or YouTube, activities which are not being tracked or given credit to the learner.

All these challenges are creating a skillset mismatch and for organization to calculate ROI on learning & development dollars spent.

The Solution

The CLIPP platform offers self-paced online IT courses and virtual instructor led courses in a library format, with hands-on labs to simulate real life problems. We're offering instructor and peer-to-peer (P2P) mentoring, created psychometrically based assessments to measure the retention of vital information, to grow the student's skill set and ultimately validate their expertise.

Finally, CLIPP platform enables a learner to enter in their desired learning objectives and immediately assemble their own course, with content from multiple sources such as YouTube, ted.com, blogs, ebooks, their desktops and even their LMS. QuickStart believes strongly in personalizing IT training, so that we can convert it into a high-impact learning experience as well as building high performance technology teams and careers.
