

Your AI-powered
**Intelligent Application
Management (iAM) platform**

Empowering Enterprises to Deliver Resilient,
Scalable, and Intelligent Application
Management.

Revolutionize the Way You Manage Applications and Operations

Qinfinite is your all-in-one solution for modernizing operations, optimizing application performance, fostering continuous innovation, and ensuring resilience at every stage.. Designed for enterprises embracing digital transformation, Qinfinite combines the power of ITOps, BizOps, and FinOps to deliver unmatched operational excellence.

With Qinfinite you can:

01

Create a living map of your entire IT landscape using Knowledge Graph.

02

Perform intelligent tasks autonomously with AI Agents.

03

Simulate and Test changes in a risk-free virtual environment using capabilities of Chaos Engineering with Intelligent Twins.

04

Reduce MTTR with AI-driven root cause analysis and intelligent automated incident resolution.

05

Leverage granular cost visibility and cloud spends through FinOps.

06

Bridge Business and IT for enhanced decision making using BizOps.

07

Accelerate legacy modernization by automating migrations, optimizing workloads, and enabling AI-driven operations for scalability

08

Access comprehensive KPI Dashboards to serve as single pane of glass for your business

09

Revolutionize IT Management with Qinfinite's AI Observability

10

Empower your IT teams and future-proof your enterprise with Qinfinite.

11

Say goodbye to reactive firefighting and hello to intelligent application management.

How Qinfinte Helps Enterprises Operate, Modernize, and Innovate

1 Operate: Stability, Efficiency & Reliability in day-to-day IT Operations.

Operate Smarter with AIOps: Automate repetitive tasks, predict failures, and reduce alert fatigue with our AI-powered platform.

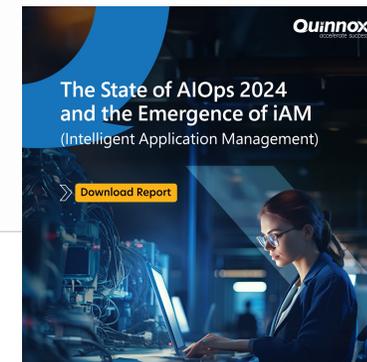

2 Modernize: Driving agility, fostering creativity, and accelerating delivery of new features and products.

Modernize with Ease: Transition legacy applications to modern architectures using Intelligent Twins that analyze dependencies, test changes, and provide actionable insights.

3 Innovate: Simplifying legacy systems, enabling seamless migrations, and optimizing the application ecosystem.

Innovate with Confidence: Adopt advanced chaos engineering practices to ensure systems are always prepared for the unexpected.

Realize ROI Faster

3X ROI within 12 months of deployment

Downtime Reduction

“Qinfinite is transforming the way we approach operational resilience. Their intelligent Twins provide deep insights, while Chaos Engineering ensures our systems are battle-tested for the future.”

CTO – Global Telecom Leader

“Qinfinite iAM is at the forefront of Intelligent Application Management, setting a benchmark in how enterprises modernize and transform their IT landscapes.”

“Qinfinite is a platform driven by AI/ML to manage and optimize IT Operations with end-to-end monitoring, predicting and preventing incidents, intelligent automation, and insightful analytics. While the traditional AMS platforms focus mostly on the IT layer to monitor and maintain the IT systems, infinite automatically discovers/assesses the IT systems and builds this intelligence into the business processes of the firm to provide a view to the user. Hence, this is a one-stop shop for a complete IT view, operations view, and business view for the users across the enterprise.”

Akhila Harinarayan - Senior Lead Analyst, ISG

“Justifying the cost and quantifying the value of AIOps by how it maps to business goals is challenging. Vendors like **Quinnox**, with its Qinfinite product, are trying to simplify this process. Organizations need to justify the ROI of their investments in AIOps solutions in concrete and measurable terms. Define clear business outcomes and metrics, navigate complex pricing models, and demonstrate long-term value.”

**Carlos Casanova, Principal Analyst,
Forrester**
