Azure Assessment Accelerator Program

JUMP START YOUR CLOUD MIGRATION

Quisitive's Azure Assessment Accelerator Program is a comprehensive cloud migration assessment and assistance program for our clients, supported by subsidized funding from Microsoft. The program was designed to help organizations properly assess cloud readiness, evaluate best paths for their application environment and build a clear roadmap and ROI view for potential Azure migration.

Our program is comprised of three tiers of assessments to give our clients the flexibility in choosing the entry point into Azure that is most relevant for them. The first tier is a cloud foundation assessment which gauges organizational readiness to leverage cloud technology. The second tier offers seven workload specific assessments based on common use cases for cloud migration and the third tier offers a full-scope Azure assessment across multiple workloads and environments.

AZURE ASSESSMENT TIER 3

AZURE ASSESSMENT ACCELERATOR

Azure Accelerator helps organizations assess their cloud readiness maturity, evaluate best paths for their application environment and build a roadmap and ROI picture for potential Azure migration. At the conclusion of this assessment, you will receive a comprehensive ROI analysis, Azure consumption estimates, high-level cloud migration project plan, an application and infrastructure architecture review and an executive presentation of findings & recommendations.

AZURE ASSESSMENT TIER 2

DATA & INSIGHTS	CLOUD INFRASTRUCTURE	MODERN APPLICATIONS	BLOCKCHAIN/AI/IOT
DATA ESTATE — An assessment service designed to help organizations determine where they are on the maturity scale to move data workloads to the cloud and evaluate their current data and application environments	**DISASTER RECOVERY** — An assessment service designed to help organizations solidify system durability and reinforce business continuity	**APP MODERNIZATION** — An assessment service designed to help organizations modernize their applications utilizing Azure cloud services.	**SMART START WORKSHOP** — An assessment service designed to introduce blockchain to an organization and facilitate use case generation, evaluation, and selection.
	STORAGE — An assessment service designed to help organizations alleviate storage concerns and identify storage requirements.	**DEV/TEST** — An assessment service designed to help organizations migrate their on-premises development and test environments to the Azure cloud.	**SOLUTION DEVELOPMENT** — An assessment service designed to evaluate the business value of blockchain through a proof of concept or fully operational solution.

AZURE ASSESSMENT TIER 1

CLOUD FOUNDATION

An assessment service designed to help organizations determine where they are on the maturity scale to move to the cloud. This three-week evaluation identifies potential opportunities to utilize cloud technologies to augment or replace your existing environment and demonstrates the financial potential of Azure using various tools and expert analysis.

All assessments are subsidized by Microsoft in an effort to help eligible companies comprehensively assess whether moving forward with an Azure migration makes sense. Quisitive is a Microsoft National Solution Provider and one of only four partners who have access to funded Azure assessments, allowing us to quickly verify funding eligibility.

Let us help you determine which assessment is right for you.
