QUISITIVE

AI-Powered ERP Transformation Journey

## From AI-Ready to Autonomous — your path to an intelligent, self-optimizing enterprise

Quisitive helps organizations evolve their ERP from automation to intelligence—and ultimately to autonomy. Through a tiered approach built on Microsoft Dynamics 365 Finance & Supply Chain and Microsoft AI, Quisitive enables businesses to modernize faster, work smarter, and operate continuously with minimal manual effort.

The Vision: From Visibility to Autonomy

Many organizations continue to struggle with disconnected business processes, delayed insights, and manual interventions that limit agility and performance. Finance, supply chain, and operations teams often react to problems after they occur—rather than preventing them.

Quisitive's AI-Powered ERP framework addresses these challenges by transforming Microsoft Dynamics 365 into a predictive, adaptive, and self-optimizing platform, guiding you through a proven three-stage journey toward intelligent, autonomous operations.

STEP 3
Autonomous ERP
18-20 Weeks

STEP 2
AI-Native ERP
12-14 Weeks

STEP 1
AI-Ready ERP
20-24 Weeks

Achieve self-optimizing operations
Deploy autonomous agents and predictive automation for touchless Procure-to-Pay, Order-to-Cash, and Issue-to-Resolution workflows
Result: Up to 70 % fewer manual tasks and real-time adaptive performance

Activate Copilot and intelligent agents
Enable Microsoft Copilot and Quisitive AI Agents to automate forecasting, procurement, and exception

Result: 25–40 % productivity gains and faster, data-driven decisions.

Establish your intelligent foundation
Deploy Dynamics 365 Finance & Supply Chain with built-in AI and predictive dashboards

Result: 30 % faster close cycles, 20 % less manual reporting, and a platform ready for copilots
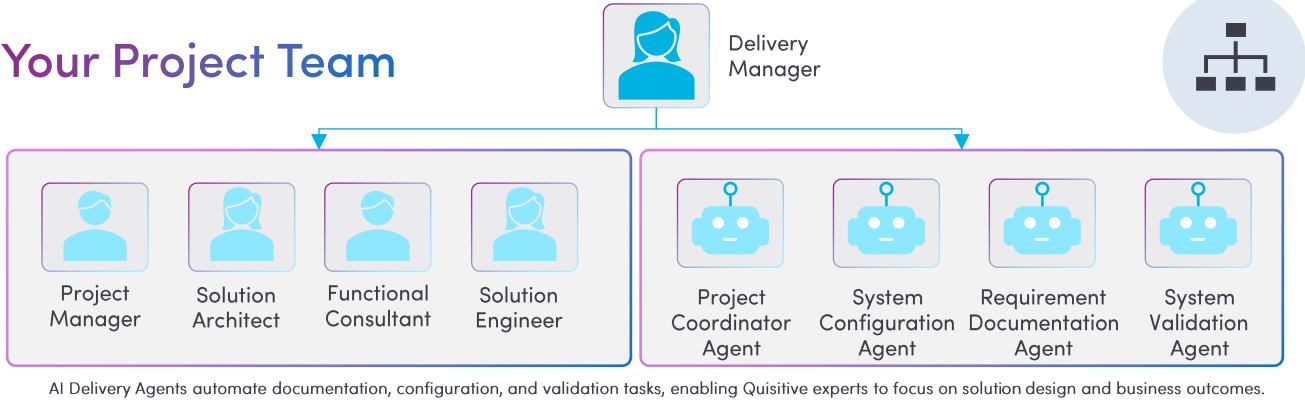

Key Benefits

- **Accelerate Modernization** – Move from legacy ERP to AI-enabled Dynamics 365 faster.
- **Drive Intelligent Productivity** – Empower users with Copilot and contextual insights.
- **Enable Touchless Operations** – Automate end-to-end processes with autonomous agents.
- **Continuously Optimize** – Improve performance through real-time data and AI.

QUISITIVE

Your Autonomous ERP Journey

Achieve touchless operations and measurable performance gains through Quisitive's autonomous, data-driven ERP model.

Step 1
AI-Ready ERP Foundation
Week 1–20
- Modernize legacy systems with Dynamics 365 Finance & Supply Chain.
- Configure industry-specific templates and core financials.
- Enable predictive dashboards and baseline AI insights.

Step 2
AI-Native Enablement
Week 21–34
- Activate Microsoft Copilot and Quisitive AI Agents for forecasting, procurement, and exception handling.
- Embed AI into daily workflows to guide users and accelerate decisions.
- Deliver Copilot adoption analytics and user training.

Step 3
Autonomous ERP
Week 35–54
- Deploy Autonomous Agents for touchless Procure-to-Pay, seamless Order-to-Cash, and predictive Issue-to-Resolution.
- Integrate IoT and real-time data for self-adjusting performance.
- Establish continuous optimization loops through predictive automation.

Step 4
Continuous Improvement & Scale
Week 55–60+
- Measure ROI and operational impact across business units.
- Expand automation scope to new regions and processes.
- Maintain a learning, adaptive ERP that evolves with your business.

Your Project Team

Delivery Manager

| Project Manager | Solution Architect | Functional Consultant | Solution Engineer | Project Coordinator Agent | System Configuration Agent | Requirement Documentation Agent | System Validation Agent |

AI Delivery Agents automate documentation, configuration, and validation tasks, enabling Quisitive experts to focus on solution design and business outcomes.

Why Quisitive

- Microsoft Solutions Partner for Business Applications and Data & AI
- Proven expertise in Copilot enablement, AI agent orchestration, and ERP modernization
- Exclusive AI Agent Library for finance, supply chain, and operations
- Deep collaboration with Microsoft's Biz Apps & AI engineering teams
- Trusted by enterprises to deliver measurable transformation and ROI

Investment

$85,000 – $650,000
(Actual pricing varies by process scope, number of copilots or agents deployed, and data-integration complexity)

Start Your AI-ERP Journey

Modernize, automate, and evolve your business toward autonomy with Quisitive's proven roadmap and Microsoft technology.
