

## Quisitive's AI Innovate Program: From Conceptualization to Implementation

Quisitive's **AI Innovate program** is ideal for any organization eager to explore AI but unsure of where to begin. Our **AI Design Lab** provides a consultative framework, combining security, education, prompt school, use case exploration, and live-action prototyping to understand AI's potential and lay the foundation for its adoption within your organization. During the **AI Innovation Center**, Quisitive transforms your AI concepts into a practical use case testing area, providing the necessary tools and expertise to deploy customized AI solutions aimed at delivering efficiency gains, improving customer experiences, and driving innovation.

### AI Design Lab

#### What is included:

- 1. Security (2 hours):** Participants gain insights into AI concepts, terminology, and security best practices.
- 2. Education & Prompt School (2 hours):** Deep dive into AI technologies, use cases, and industry trends.
- 3. Use Case Identification and Live Action Prototyping (10 hours):** Collaboratively explore real-world scenarios using your own data sets. Prototype AI solutions to address specific business challenges. See your ideas come to life, accelerating the path from concept to reality.

#### Deliverables:

- > **AI Roadmap:** A strategic plan outlining the AI journey, including milestones, resources, and timelines.
- > **Deployment Plan:** Detailed steps for implementing AI initiatives within your organization.

### AI Innovation Center

#### What is included:

- 1. Strategic clarity and direction:** Understand where to start, set milestones, and align AI initiatives with your business objectives.
- 2. Guidance on effective deployment:** We guide you through the deployment process, ensuring seamless integration and optimal performance.
- 3. A secure and customized AI sandbox:** We deploy an AI testing area that fits your specific needs and addresses your unique challenges, creating a **Minimum Viable Product (MVP)**. You will witness your ideas come to life.

#### Deliverables:

- > **Your very own secure testing area:** A fully functional testing environment that will facilitate the development and testing of your AI solution.
- > **Roadmap for scaling and maintenance:** We provide guidance on scaling, maintaining, and evolving your AI solution.

#### Benefits:

##### Strategic Clarity and Direction:

Gain a clear roadmap for your AI initiative outlining milestones, resource allocation, and timelines, ensuring alignment with business goals.

##### Informed Decision Making:

Decision-makers become well-versed in AI concepts, risks, and opportunities, helping them make informed choices about AI investments.

##### Use Case Identification and Prototyping:

Ensure that AI aligns with your real-world business needs.

##### Tailored Solutions:

Explore AI possibilities within your unique context and challenges.

##### Jump Start Deployment Efforts:

Provides the foundation for successful AI adoption. You leave with a clear understanding of what lies ahead.

Your AI journey doesn't end — it evolves.
