

Quisitive AI Operations Services

Operationalize AI securely, efficiently, and at scale

Most enterprises have started experimenting with AI, but few have turned those experiments into real business outcomes. Data is scattered, governance is inconsistent, and costs rise without clear accountability.

Quisitive's AI Operations Services provide the structure, governance, and expert support enterprises need to manage and scale AI with measurable results. Our services combine hands-on advisory, proactive monitoring, and the Airo™ AI Workspace to turn AI from experimentation into secure, production-grade operations.

Why AI Operations Services Matter

AI isn't failing - it's stalling. Many enterprises can't scale beyond pilots because data is fragmented, compliance is complex, and internal teams are overstretched. Building an in-house AI operations team can cost over **\$1 million a year** (CompTIA & ZipRecruiter, 2025).

Quisitive delivers the same strategy, governance, cost control, and 24x7 monitoring in a managed model - giving you full capability without the hiring burden or risk.

With Quisitive, you can:

- > Prevent stalled projects and "shadow AI"
- > Control spend through proactive monitoring and remediation
- > Maintain governance and compliance from day one
- > Keep pace with Microsoft's fast-evolving AI ecosystem

Business Problems We Solve

- > **Pilots stuck in proof-of-concept** limbo without a roadmap for production
- > Fragmented or stale data undermining AI accuracy
- > Limited internal capacity to build, monitor, and evolve agents
- > No KPI-level visibility into cost, ROI, or usage trends
- > Missed opportunities to integrate Microsoft Copilot, Azure AI, and Fabric efficiently

How It Works

1. **Define & Align** – Establish business goals, roadmap, and governance frameworks.
2. **Ready the Data** – Ensure sources, access, and compliance guardrails are in place.
3. **Build & Deploy** – Execute prioritized use cases, agents, and integrations.
4. **Monitor & Optimize** – Track performance, enforce policy, and evolve alongside Microsoft's AI ecosystem.

Quisitive's managed model gives enterprises a continuous cycle of innovation.

AI Services Packages to Suit Your Needs

| | Advisory & Cost Control \$17,700/mo* | Fully Managed AI \$33,000/mo* |
|---|---|----------------------------------|
| Airo™ AI Workspace Unified AI workspace built in Microsoft Azure with governance and security guardrails. | ✓ | ✓ |
| Dedicated AI Strategist & Customer Success Manager Strategic account management, roadmap planning, and governance guidance. | ✓ | ✓ |
| Strategic account management, roadmap planning, and governance guidance. Workshops and planning sessions to align AI goals, data readiness, and compliance. | ✓ | ✓ |
| Quarterly AI Workshops Strategy reviews on cloud spend, governance, and optimization. | ✓ | ✓ |
| Workspace Configuration & Onboarding Setup and enablement of Airo within your Microsoft environment. | ✓ | ✓ |
| Monitoring & Reporting Monthly usage and cost reports with policy validation. | ✓ | ✓ |
| Monthly Governance Review of Data Ensures data and AI usage align with security and compliance standards. | ✓ | ✓ |
| Quarterly Optimization Recommendations Strategic guidance to improve efficiency, accuracy, and adoption. | ✓ | ✓ |
| Weekly Roadmap Status Meetings Regular updates on progress, adoption, and new opportunities. | ✓ | ✓ |
| Monthly AI Tactical Sessions Deep dives on use-case development, AI data security, and compliance. | ✓ | ✓ |
| Cost Optimization & Remediation Proactive cost monitoring and targeted efficiency improvements (15–30% savings). | ✓ | ✓ |
| Reusable Prompt & Agent Libraries Shared, versioned AI components to accelerate productivity. | | ✓ |
| Monitoring as a Service (EverWatch) Continuous performance monitoring, policy validation, and alerting. | | ✓ |
| 24x7 Incident Response & Resolution Around-the-clock response for critical AI and Azure resources. | | ✓ |
| AI Operations Monthly environment reviews with budget alerts, performance reporting, and issue tracking – plus ongoing insight collection from real AI use cases, including user feedback and operational metrics. | | ✓ |
| Innovation Credits (Hands-On Assistance) Prompt engineering, UI updates, agent development, and new deployments. | As needed | Up to 10/mo |

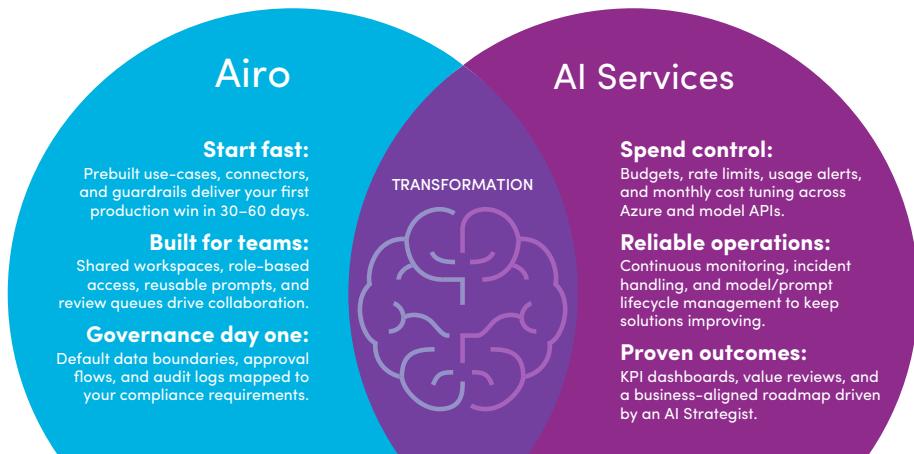

*Billed annually, minimum three-year term agreement.

INCLUDED WITH EVERY PACKAGE: AIRO + AI SERVICES

Airo AI Workspace

- > Unified AI workspace deployed inside your Azure tenant
- > Governance, security, and audit controls built in
- > Shared workspaces, reusable prompt libraries, and agent templates for collaboration

Together, Airo and AI Services deliver an enterprise-ready AI foundation: secure, efficient, and scalable.

Why Organizations Choose Quisitive

- > Airo AI workspace to launch/scale use cases fast
- > Secure by design implementation for custom AI solutions and emerging Agentic AI identities
- > Microsoft-first patterns for Copilot, Copilot Studio, and Azure AI with built-in governance
- > Agent Factory to design, build, and improve AI agents continuously
- > Data-first approach with governed connectors and high-quality retrieval
- > End-to-end support from proven experts

Proving AI's Value in Your Business

We measure success in business outcomes, not just usage stats. Every AI Operations Service engagement tracks clear, verifiable results, including:

- > **Time to Value:** Weeks from kickoff to first verified result
- > **Productivity Hours Returned:** Measurable hours saved each month
- > **Cycle-Time Reduction:** 20–40% faster on key processes
- > **Cost per Assisted Outcome:** ROI that improves with scale
- > **Task Automation Rate:** Real automation, not just activity
