

## Airo™ AI Workspace

Simple. Secure. Scalable.

### The Challenge

AI adoption is accelerating, but most organizations remain stuck in pilot mode or siloed experiments. Despite rising investment, few have the governance, integration, or cost control needed to scale. The result: scattered tools, unmanaged data, and limited ROI. According to IDC, **88% of AI pilots never reach production**. Most fail due to lack of structure, visibility, and secure operations.

### The Solution: Qusitive Airo

Airo, included with **Qusitive's AI Operations Services**, provides the secure, governed workspace enterprises need to scale AI responsibly. Built on Microsoft Azure, Airo centralizes prompts, models, data, and agents — giving teams a shared environment to build, launch, and manage AI with confidence. Through AI Operations Services, Qusitive delivers the governance, monitoring, and optimization required to keep AI secure, cost-efficient, and continually improving.

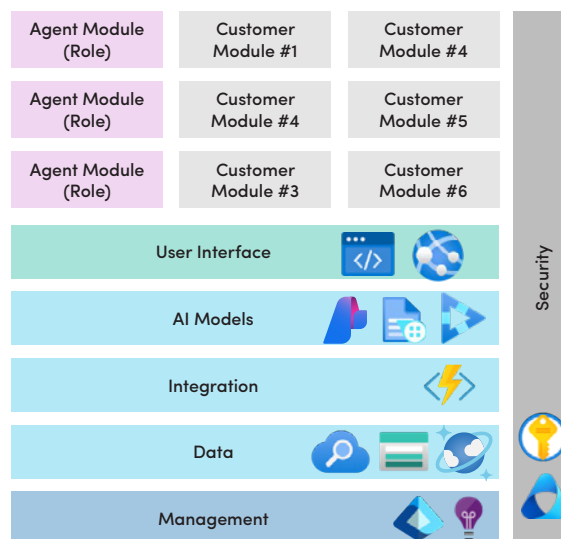

### Airo gives users:

- > Access approved company agents in one intuitive workspace
- > Save and reuse prompts for faster, consistent outputs
- > Work with documents, audio, and video using built-in summarization
- > Generate content with AI in company templates
- > Personalize responses with branded AI personas

### IT can now:

- > Centralize governance, monitoring, and cost control in Azure
- > Enforce identity, access, and prompt policies with Microsoft Entra
- > Run 1,900+ large language models with routing and transparency
- > Use RAG to securely connect multiple document types and query enterprise data
- > Manage agent access, usage limits, and prompt throttling
- > Enjoy continuous optimization, innovation and support through Qusitive

### Airo AI Workspace

### Key Features

- > **Agentic Platform** – Build, deploy, and scale reusable AI agents and workflows.
- > **Prompt Library** – Save, evaluate, and share prompts for consistency.
- > **Multi-Model Orchestration** – Run and manage 1,900+ large language models with transparency and flexibility.
- > **Retrieval-Augmented Generation (RAG)** – Query and generate insights directly from enterprise data.
- > **AI Personalization** – Create branded AI personas tailored to different roles.
- > **Document & Media Support** – Use documents, images, and audio with built-in summarization.
- > **Templates & Automation** – Generate content into pre-built templates.
- > **Collaboration Tools** – Share agents, prompts, and outputs securely.
- > **Microsoft Integration** – Built for Azure, integrated with Copilot, Fabric, & Entra.

## How It Works

1. **Design** – We work with you to define use cases, success criteria, and connect structured/unstructured data sources.
2. **Deploy** – Our team sets up the accelerator in your Azure tenant, activates LLMs, builds security roles, and loads sample agents.
3. **Enable** – We deliver training and governance workshops to help teams build, prompt, and launch confidently.
4. **Scale** – Use the admin console to track usage, refine prompts, and expand to new departments with built-in controls.

## Common Use Cases

- > Internal AI Assistants: HR, Finance, Legal, Marketing
- > Policy and Document Summarization
- > Client Service and Intake Bots
- > RFP/Proposal Generation and Q&A
- > M365 + Copilot + Fabric integration scenarios

## Timeline & Cost:

Included with Quisitive's AI Operations Services, Airo offers 2 levels of support to meet the needs and budgets of different organizations. Typical implementation is completed in 4–6 weeks, with ongoing managed services tailored to your scale and goals.

### ADVISORY & COST CONTROL

Includes the Airo AI Workspace with governance guardrails, strategic planning, onboarding, and cost optimization. Designed for organizations focused on AI readiness, compliance, and financial control, services include:

- Monthly usage reports,
- Quarterly workshops,
- Roadmap planning
- Tactical sessions
- Dedicated Customer Success Manager and AI Strategist

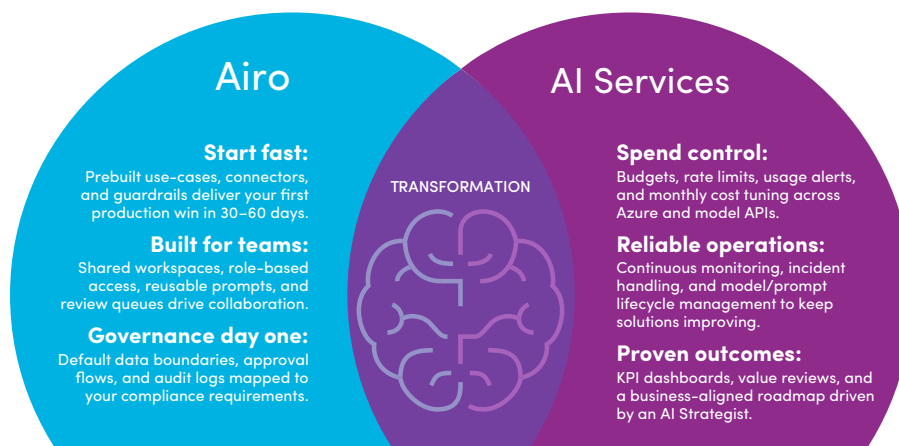

**\$17,700/month\*** (≈\$212,000/year)

### FULLY MANAGED AI

Includes everything in Advisory & Cost Control, plus full support for day-to-day AI management. Additional services include:

- Continuous monitoring (EverWatch) and 24x7 incident response
- Monthly environment reviews, issue tracking, and performance reporting
- Reusable prompt and agent libraries to accelerate development
- Innovation Credits (up to 10 per month) for hands-on assistance with prompt engineering, agent development, and new deployments
- Scalable innovation support to match your experimentation and growth needs

**\$33,000/month\*** (≈\$396,000/year)
