

## Innovation Jumpstart

**Quisitive's Innovation Jumpstart helps organizations build a 'ready-to-execute' application innovation roadmap aligned to their business outcomes.**

This six-week program is designed to help customers achieve their prioritized business outcomes by providing a holistic 'ready-to-execute' plan for bringing new digital capabilities to life.

At the end of the six-week engagement, the customer will receive a customized architecture and blueprint that is ready for piloting or implementation.

### Program Activities and Flow

- ✓ **Week 1: Business Discovery Workshop**  
We begin with a discovery workshop to identify your priorities and desired business outcomes. The Quisitive team works with you to capture the goals and high-level requirements for the application, and the business and technical prioritization.
- ✓ **Weeks 2-6: Inspire and Design**  
Through envisioning workshops we explore your application needs in more detail and unpack the business value needs in order to create a customized transformation blueprint to directly support your business goals and detailed architecture proposals to get you started immediately.

#### Example Proposal Options Include:

- Rapid prototype and solution architecture for a Cloud Native Application
- Reference architecture for an intelligent data platform or modern application integration
- Proposal for DevSecOps adoption and change management
- Recommended path for application portfolio modernization
- Blueprint for low code and fusion development adoption
