# QUISITIVE

# Secure AI Quick Start

## Accelerate AI responsibly with a data-driven security foundation

AI agents are already making decisions and accessing systems your controls weren't designed to manage. According to **Microsoft's 2025 Work Trend Index**, 81% of executives expect AI agents embedded across workflows within 18 months, yet only 24% say their organization is ready. Without the right identity, data, and governance foundations, AI introduces new exposure points that traditional security architectures can't contain.

**Secure AI Quick Start** is a fundable, Microsoft-aligned security engagement that rapidly analyzes organizational AI readiness and identifies critical security & governance improvements before scaling Copilot or other AI solutions.

In just three weeks, Quisitive delivers a Zero Trust assessment, a Purview-powered & Security Co-pilot-guided data security scan, and a custom Copilot that connects your posture with Quisitive's Security intelligence to provide a guided review.

You'll walk away with a board-ready view of your AI-related risks, a 30/60/90-day roadmap, and a clear plan to advance into Spyglass Managed Security Services or Managed AI Operations Services to accelerate your transformation.

## Why It Matters

> Understand your AI risk posture before scaling Copilot and AI

> Validate Zero Trust progress and identity governance

> Show measurable progress to your board and auditors

## What You Get

> A clear, defensible view of your AI-related security risks

> Visualized data exposure heatmaps powered by Microsoft Purview

> Guided insights and recommendations from Microsoft Security Copilot

> Executive summary and 30/60/90-day roadmap

> Interactive custom Copilot to analyze and review your custom findings (30 day access)

> Seamless attach path to Quisitive Spyglass or Managed AI Operations

# QUISITIVE

## Core Components:

### Zero Trust Snap Assessment

Evaluate your current identity, device, app, data, and governance posture.

Receive a prioritized list of top risks and recommended next steps.

**GET:** Baseline risk across all pillars with prioritized fixes

**VALUE:** Executive readout + 30/60/90 plan

### Customer-Run Data Collection

Run lightweight PowerShell scripts with least-privilege access - no MSA or long legal cycle required.

**GET:** Signed PowerShell bundle executed by customer

**VALUE:** Minimal lift, no partner access needed

### Interactive Results via Guided Agent

Access findings, risk scores, and AI-guided insights through a secure custom Copilot within Teams.

**GET:** Interactive exploration of your assessment by pairing your posture information with Quisitive Security Intelligence.

**VALUE:** 30-day interactive access

### Data Security Reality Check

A Microsoft Purview scan and Security Copilot triage reveal your most sensitive data exposures and the first five remediation actions.

**GET:** Purview + Security Copilot scan and triage

**VALUE:** Heatmap + top 5 recommended fixes

### Mini AI Use Case Triage  (Optional)

Get a tailored roadmap with defined owners, timelines, and links into Spyglass, AMS, or Managed AI Operations Services for next steps.

**GET:** Workshop ranking 3–5 AI ideas with security guardrails

**VALUE:** Top 3 recommendations + matrix

**Total cost:** $21K     **Typical duration:** ≤ 3 weeks from kickoff to executive readout.

This engagement qualifies for **Microsoft Commerce Incentive (MCI) Security funding** where available and where clients qualify, reducing or eliminating customer cost.

## The Quisitive Difference

- Premier Microsoft Cloud & AI Security Partner with over 1,400 security assessments delivered and decades of enterprise experience

- Microsoft MISA Member and certified MSSP, recognized for advancing secure cloud and AI adoption across industries

- Trusted by global enterprises to connect business AI priorities to measurable, secure outcomes

- Deep technical expertise across Microsoft Purview, Security Copilot, Defender, and Entra ID

- End-to-end managed services through Quisitive Spyglass and Managed AI Operations, enabling customers to move seamlessly from assessment to remediation

## Get Started

See where your AI risks are hiding before they become headlines.

**Contact Quisitive to schedule your Secure AI Quick Start** and get a clear, defensible view of your AI readiness and data exposure.
