Clarity Data

Data Management and Protection for Every Organisation

Quorum Cyber

Maintaining and managing an effective data security environment can be challenging. Many organisations fail to properly configure and optimise data loss prevention (DLP) and insider risk tools, leaving security gaps for criminals to exploit.

Introducing Clarity Data

Quorum Cyber's Clarity Data managed service puts you in the driver's seat when it comes to your data security and compliance.

Our comprehensive solution empowers you to take control of your data, wherever it resides, minimising the risk of data loss or regulatory fines, all while reducing your data management costs. With Clarity Data you can confidently navigate your data landscape with the assurance that your sensitive information is protected.

Take Your Data Protection to the Next Level with Clarity Data

Clarity Data combines Quorum Cyber's Microsoft, cyber security, and data compliance expertise to deliver a customised data protection programme that's right for your organisation.

Clarity Data is available as a standalone solution or a powerful complement to our managed security services (Clarity Defend, Clarity Extend, and Clarity Protect), creating a seamless integration that enhances your cyber security posture.

Integration allows in-depth, interconnected investigations to be conducted by Quorum Cyber's Security Operations Centre (SOC) analysts across your data, network, and identity signals, providing holistic incident reports detailing root causes and affected areas across your entire digital estate.

Clarity Data Benefits

✓ Reduce the risk of data breaches from both external attacks and insider threats.

✓ Real-time insights: stay informed with 24/7 access to our customer platform, Clarity, to see all security metrics and any incidents, plus how they are being managed, in real time.

✓ Develop data policies that align with your unique data landscape, user base, and regulatory compliance needs.

✓ Continuously fine-tune data security policies, update data classifications, and adapt to changing regulations.

✓ Meet compliance needs, including GDPR and ISO 27001, tailored to your industry and data landscape.

✓ Unlock deep insights into incident root causes by correlating data across multiple security dimensions.

✓ Monitor both sanctioned and unsanctioned apps, eliminating potential blind spots in the security strategy.

✓ Peace of mind – rest easy and lean on our team of certified data security experts and threat hunters who combine human ingenuity with AI and expertise in Microsoft technology.
